

SQUARES & SQUARE SETS

BEVELED EDGE SQUARES - REFERENCE GRADE

Made from single pieces of selected tool steel. Both the blade and stock are fully hardened, ground and lapped which ensures straightness and parallelism. The blades are beveled on both edges, thereby providing virtually a line contact with the work.

TOOLMAKER'S ADJUSTABLE SQUARE

Made from quality steel, both the blade and stock are accurately hardened and ground to ensure straightness and parallelism. The square comes complete with a straight blade, an angled blade 45° on one end and 30° on the other end and a 4" steel rule graduated both in metric and imperial dimensions. Adjustment is made via the knurled knob.

ENGINEER'S PRECISION SQUARES

Hardened spring steel blades are permanently fixed to the stock by means of tapered self-locking rivets which ensure complete rigidity. Both the blade and stock are precisely ground to ensure straightness and parallelism.

STRAIGHT EDGES

STEEL STRAIGHT EDGES

- Extremely accurate reference line.
- Can be used for checking surfaces for straightness.
- Precision ground and finely finished.
- Perfect for drawing or scribing straight lines.
- Graduated & non-graduated models available.
- Tolerance 0.0005" per foot.

CAST IRON STRAIGHT EDGES

- Made of stress-relieved, cast iron for maximum stability.
- Cored and ribbed for increased rigidity and reduced weight.
- Top and bottom faces are precision ground parallel and straight to within 0.0001" per 12".
- Use for setting up and leveling machinery and equipment and for checking the flatness of surfaces or scribing.
- Also can be used for positioning above and parallel to a surface.
