

**RELOCK DOUBLE STATION WORKHOLDING SYSTEM**
**Unique Modular Design is Efficient and Accurate**

Stay competitive in today's demanding manufacturing environment.

- Reduce set-up time with ReLock's modular design
- SnapLock feature allows to change or index jaws quickly
- Accurate and durable; precision manufactured from high grade materials
- Versatile array of jaws and accessories to vertical or horizontal machining applications

**RELOCK Workholding Systems**

**SnapLock Machinable  
Fixture Jaws**

- Versatile to allow job customization
- Remove or index in a matter of seconds

**AccuSnap Vise  
Jaw System**

- Picture shows master jaw, parallels and modular workstop
- Highly accurate set-up and changeover

**ReLock-8 Station**

- Unibody design
- Ideal for horizontal machining centres and rotary indexers on vertical machining centres
