PARTITIONS & SUBDIVIDERS

Use partitions to divide drawers in sections. Insert subdividers to make compartments. Partitions fasten to drawer bottom with screw and can be fitted from front to back or side to side. Subdividers slide into slots in partitions and side walls. Slots are .79" (20mm) apart.

NOTE: Taller partitions and subdividers for use with higher side walls (drawer height extensions) are available. Contact your Kennedy distributor for more information.

CUSTOM-BUILT WORKBENCHES

Follow these easy steps to custom build a workbench that's specific to your needs.

1. Select one or more worktop or countertop model HDS cabinets (pages 61-68) to serve as your workbench base.
2. If your workbench only uses one cabinet, an adjustable leg (page 77) must support the other end.
3. Choose between a 60" or 72" countertop width (page 77).
4. Determine if a retainer set, riser shelf, or toolboard panels (page 77) are necessary to complete your build.

It is highly recommended that modular cabinets be bolted to the floor to prevent tipping/serious injury.

HYBRID SERIES COMBINES POPULAR HDS CABINET FEATURES WITH THE ECONOMY OF 18 GAUGE ROLLER CABINET CONSTRUCTION.

Drawers can easily be divided and labelled for small parts storage and are safety interlocked to prevent tipping under heavy load conditions. Four-inch drawers support 120 lbs. of storage capacity while six-inch and eight-inch drawers feature double slides and support 200 lbs. An optional mobility kit can be added that allows cabinets to be taken directly to the job site or interchanged in flexible fabricating or assembly situations. These cabinets are a great way to store and transport heavily-used fasteners, tools, and supplies.

- Drawer dividers available, sold separately
- MDF work surface Included
- Stationary, adjustable legs adds 2 ¼" to height of cabinet
- 42010 Mobile package available (see HMS™ accessories)
