## Aluminum Machining Chip Breaker AP

### Recommended Cutting Condition

$d=0.004\sim 0.200\text{inch}$   
 $f=0.0012\sim 0.0020\text{ipr}$

### Special Features

- 1) Uniquely designed inclined plane provides smooth chip flow and chip breaking at the same time, thus cutting force is lower and longer tool life can be acquired.
- 2) High rake angle of main cutting edge reduces cutting force and prolongs tool life.
- 3) "AP" type chip breaker equipped with mirror face on top face through special buffing process. This mirror face prevents sticking of workpiece material on cutting edge and provides smooth chip flow.

1. High rake angle  
 · Reduces cutting force

2. Unique chip breaker design  
 · Effective chip control  
 · Smooth chip flow

3. Special design for shock-absorbing  
 · Reduces edge build-up

5. 3 Dimensional unique design  
 · Fine surface finish & long tool life

4. Sharp cutting edge  
 · Distributes cutting force  
 · Increases tool life

## CCGT-AM (AM Chip breaker is for Aluminum)

- High stability of cutting edge secures great performance in high speed and interrupted cutting
- High speed of medium and interrupted operation

■ USE  
 Aluminum Cutting

## C.B.N. Turning Inserts

SOWA C.B.N. products are made from Cubic Boron Nitride powder and special ceramic binder.  
 SOWA C.B.N. can provide excellent cutting performance for hardened steel and cast iron having high hardness.  
 Using a C.B.N. can replace additional grinding processes, thus saving costs.

- Suitable for sintered alloy, hard material, heat treated alloy · Excellent surface finish at the cutting of hardened steel.
- Excellent for cast iron cutting

### Recommended Cutting Condition

\*For additional technical information see page E179

## Indexable Boring Bars

- Chipbreaker eliminates long stringer chips. Round shanks allow the operator to set positive or negative rake
- A new cutting edge may be presented by simply indexing the insert. It is not necessary to remove the tool from chuck or tool post

# BORITE

## ■ Depth of Cut, Feed and Width of Cutting Edge

- If the depth of cut and feed are greater than the width of cutting edge, the insert may break due to the increased cutting resistance of the insert
- If the depth of cut and feed are smaller than the width of cutting edge, it may lead to vibration or unstable machining due to no formation of the sub-cutting edge relief angle against no direct influence of tool deflection

## ■ Depth of Cut in Grooving Operation

- It can be performed as deep as T<sub>max</sub> of the holder

## ■ The Basis of Selection for Grades

### ■ Cutting Edge Type

## Effective Inclination and Relief Angle of Threading

Inclination angle of the Thread ( $\beta$ ) in the figure is decided by effective diameter (d) and lead ( $\ell$ ) of thread

The angle of inclination of the Thread ( $\beta$ ) is calculated by using the formula.

$$\tan \beta = \frac{\ell}{\pi d}$$

$\ell$ : lead

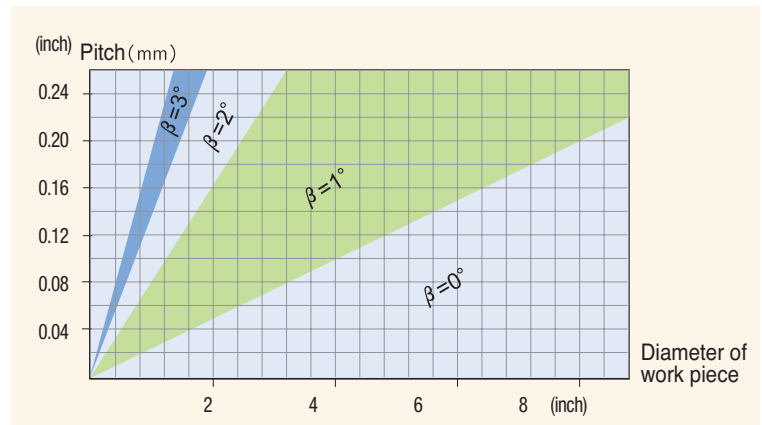

n:No.of Pitch,      p:Pitch,      d:Effective Diameter of Thread

$\alpha$  - Side Relief Angle ( $\alpha_L = \alpha_R$ )

$\lambda$  - Helix Angle

$\beta$  - Angle of Inclination

Effective Angle of Inclination of Each Cutting Condition

## Revision Method of Effective Inclination Angle

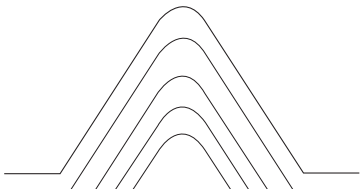

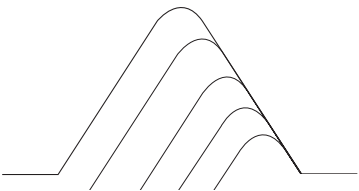

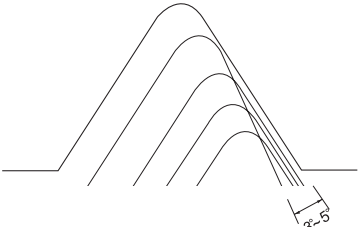

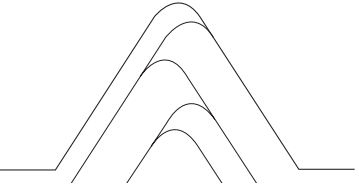

Threading holders (ETH, ITH) are drawn with revision of inclination angle,  $1^\circ \sim 2^\circ$  to be used for detailed threading.

But, shims are produced without revision of inclination angle (ST32C1, ST42C1).

If pitch of thread is bigger or diameter of thread is smaller, inclination angle of thread will be bigger and bigger inclination angle will make Insert relief angle (L, R) smaller.

This effects the shape of thread crest and tool life but revising inclination angle can solve it.

## Choosing Type of Infeed for Threading Operation

| Type of Infeed  | Features   |
|---|--|
|  <p data-bbox="321 556 430 577">Radial infeed</p>            | <ul data-bbox="646 331 1299 504" style="list-style-type: none"> <li>• Most commonly used</li> <li>• Suitable for relatively small pitch threading on soft material</li> <li>• Chattering may occur easily because of longer chip touch length and bigger load on nose of the insert</li> <li>• Bad chip control due to V type chip being produced</li> </ul>                           |
|  <p data-bbox="324 856 430 877">Flank infeed</p>             | <ul data-bbox="646 667 1380 766" style="list-style-type: none"> <li>• Suitable for bigger pitch thread or mild material, it can reduce chattering</li> <li>• Bigger wear may occur on right cutting edge</li> <li>• Good chip control either direction</li> </ul>  |
|  <p data-bbox="292 1155 462 1176">Modified flank infeed</p> | <ul data-bbox="646 934 1485 1102" style="list-style-type: none"> <li>• Modified type of flank infeed</li> <li>• Suitable for bigger pitch thread or mild material, this method can reduce chattering</li> <li>• Good chip control with either way of chip flow</li> <li>• Wear can be reduced with infeeding right cutting edge</li> <li>• Recommended for 2 pitches thread</li> </ul> |
|  <p data-bbox="300 1453 454 1474">Incremental infeed</p>   | <ul data-bbox="646 1249 1437 1386" style="list-style-type: none"> <li>• Suitable for bigger pitch thread or mild material, it can reduce chattering</li> <li>• This method gives the insert even wear and longer tool life with using both side of cutting edge by turns</li> <li>• Coiling of chip from right and left may be occurred due to the chip flow in turn</li> </ul>        |

### ■ Note

- 1) Above conditions are calculated upon using PM30P and PM20S grade.
- 2) Total D.O.C is based on C+ 0.05 ~ +0.08mm and no more excess is necessary.
- 3) D.O.C, 0.05 ~ 0.1mm is recommended for pass
- 4) To avoid breakage of the insert at the first pass, make chamfer of 0.3~0.5 on the corner of workpiece.
- 5) Using coolant helps improve insert tool life and surface finish.

### ■ Note

- 1) Above conditions are calculated upon using PM30P and PM20S grade.
- 2) Total D.O.C is based on C+ 0.05 ~ +0.08mm and no more excess is necessary.
- 3) D.O.C, 0.05 ~ 0.1mm is recommended for pass
- 4) To avoid breakage of the insert at the first pass, make chamfer of 0.3~0.5 on the corner of workpiece.
- 5) Using coolant helps improve insert tool life and surface finish.

# Milling Insert Code System

## 6 Height of Cutting Edge

|  | Symbol |        | Height of Cutting Edge (t) |       |
|--|--------|--------|----------------------------|-------|
|  | Metric | Inch   | mm                         | Inch  |
|  | -      | 0.5(1) | 0.79                       | 1/32  |
|  | T0     | 0.6    | 1.00                       | 0.040 |
|  | 01     | 1(2)   | 1.59                       | 1/16  |
|  | T1     | 1.2    | 1.98                       | 5.64  |
|  | 02     | 1.5(3) | 2.38                       | 3/32  |
|  | 03     | 2      | 3.18                       | 1/8   |
|  | T3     | 2.5    | 3.97                       | 5/32  |
|  | 04     | 3      | 4.76                       | 3/16  |
|  | 05     | 3.5    | 5.56                       | 7/32  |
|  | 06     | 4      | 6.35                       | 1/4   |
|  | 07     | 5      | 7.94                       | 5/16  |
|  | 09     | 6      | 9.52                       | 3/8   |
|  | 11     | 7      | 11.11                      | 7/16  |
|  | 12     | 8      | 12.70                      | 1/2   |

\* ( ) Symbol for small size insert

## 8 Edge Preparation

## 9 Hand of Tool

## 5 Cutting Edge Length, Diameter of Inscribed Circle

Use 1/32" unit for an insert having smaller I.C. under 1/4"

Use 1/8" unit for an insert having larger I.C. over 1/4"

\* Indicate cutting edge length in case of tetragon & rhombus

## AP/AD Multifunctional Insert

① Long tool life at high speed, high feed and deeper cutting by low cutting resistance and strong cutting edge.

② Distinguished features of Alpha-Curve reduce cutting resistance and improve the strength of cutting edge and wear resistance.

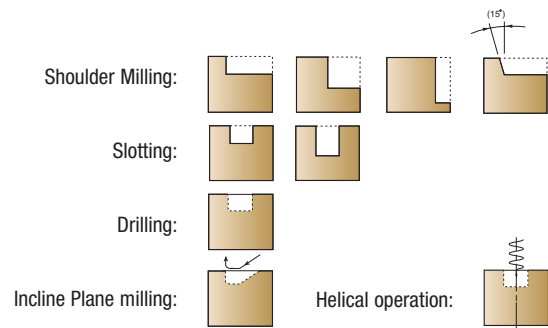

③ Low cutting resistance is realized by unique design i.e Alpha-Curve cutting edge and optimal convex and concave design.

④ High efficiency machining is available by the ideal application of the grade to material.

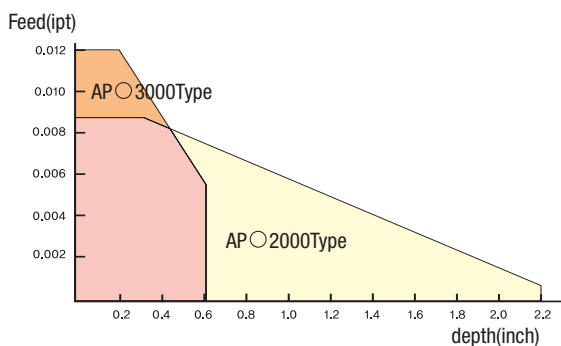

### Inserts Feature & Application

- Innovative curve cutting edge and chip-breaker design ensures ideal 90 degree cutting and lower cutting resistance
- Various applications are available with multi-functional cutters (Facing, Slotting, Square Shoulder Milling, etc.)
- Application specific optimization improves insert life
- Excellent performance ensured at large depth of cutting operations due to strong cutting edge and low cutting resistance

### AP / AD Mill Application Range

### Tips

1. The cutting speed and feed can be adjusted in accordance with the machine's power and conditions of workpiece.
2. We recommend you operate them with small radial depth (RD) and large axial depth (AD) at the square shoulder milling applications.
3. We recommend you use compressed air during the slotting and pocket milling applications for better chip removal.
4. When encountering chattering during the operation, decrease the cutting speed.

## AP/AD Recommended Depth of Cuts

(D : Cutting Diameter)

### Recommended Cutting Conditions (for Single-Edge Type)

(Standard for side cutting, reduce condition 20~30% for slotting)

| Workpiece Material                  | Grade          | Cutting Diameter |             |                          |             |                        |             |                          |             |
|-------------------------------------|----------------|------------------|-------------|--------------------------|-------------|------------------------|-------------|--------------------------|-------------|

## Max Mill Technical Information

### Comprehensive Milling Cutter with High Productivity

1. Adjustable pitch of cutter by changing the number of inserts for the specific cutter diameter, and several chip breakers offer a wide application range.
2. Light cutter body allows high speed machining without chattering, thus it is possible to use a low horse power machine.
3. Smooth cutting with low cutting force accomplished with high rake angle.

#### ■ Machining Example

#### ■ Chip-Breakers

|                 | Chip-Breakers | Cutting Edge Shape | Use and Features of Chip-Breakers   |
|-----------------|---------------|--------------------|---|
| Light Cutting   | Non C/B       |                    | Superior surface roughness at finishing due to ground-type cermet insert.   |
|                 | F2            |                    | Superior cutting quality for light and difficult-to-cut material cutting through the low-cutting-resistance type of chip breaker. |
| General Cutting | M             |                    | Suitable for wide range of cutting due to special shape design for general cutting.   |
| Roughing        | R8            |                    | Tough cutting edge provides stable and consistent cutting performance even at severe intermittent cutting.                        |
| For Aluminum    | A             |                    | Superior quality for aluminum cutting resulting from applying proper cutting-edge treatment and buffing of surface.               |

## Features of Max Mill Insert

### ■ Inserts Feature & Application

- Innovative curve cutting edge and chip-breaker design ensures ideal 90 degree cutting and lower cutting resistance
- Various applications are available with multi-functional cutters (Facing, Slotting, Square Shoulder Milling, etc.)
- Application specific optimization improves insert life
- Excellent performance ensured at large depth of cutting operations due to strong cutting edge and low cutting resistance

### ■ Advice

1. The cutting speed and feed can be adjusted in accordance with the machine's power and conditions of workpiece.
2. We recommend you operate them with small radial depth (RD) and large axial depth (AD) on square shoulder milling applications.
3. We recommend you use compressed air during the slotting and pocket milling applications for the better chip removal.
4. For chattering during the operation, decrease the cutting speed.

## Insert Choice(Chip Breaker/Grade)

| ISO(Workpiece) | Low Cutting Resistance Type | General Type | Stronger Cutting Edge Type |
|----------------|-----------------------------|--------------|----------------------------|
| P              | F2 / PM25C                  | M / PM25C    | M / PM30P                  |
| M              | F2 / PM30C                  | F2 / PM30C   | M / PM30C                  |
| K              | F2 / KM20C                  | F2 / KM20C   | F2 / KM20C                 |

## Special Features of Alumi Mill

1. Mirror face of insert top provides smooth chip flow and prevent edge build-up.
2. High rake angle of cutting edge provides high quality surface finish through reduce cutting force.
3. Square shouldering and contouring is available.
4. Rigid cutter allows high speed machining.
5. Suitable for high speed machining which provides high productivity.
6. Precise ground insert and high rake angle reduces cutting force significantly.

## Application

### S.F.M.

**PM10C** - Die Steels 300-500 sfm  
(P05-P15) - Alloy Steels 400-650 sfm

**PM35P** - Die Steels 300-400 sfm  
(P05-P15) - Alloy Steel 350-500 sfm  
- Stainless Steel 300-400 sfm

- Information for uncut part by using Input.R for CAM program.
- Uncut can be changed by poor machine condition or weak clamp of workpiece, etc.

## Double Sided High Feed Milling Inserts

- High rake angle cutting edge reduces cutting load making this insert excellent for high feed and multi-functional machining
- Double sided design makes this a very economical insert
- Negative geometry has been designed for rigidity of cutting edge and double sided function
- Symmetrical cutting edge is applicable for both R and L type tools

**Nose-R**

- Security of rigid edge in ramping, pocket machining
- Round edge line suitable for high lead
- Insert geometry extrinsic to R/L type machining

**Chip breaker**

- Reduction of cutting load due to high rake angle
- Improvement of chip flow
- Prevention of damage on clamping face of insert

**Minor cutting edge**

- Improvement of surface roughness.
- Design for decreasing thrust force

**Major cutting edge**

- High feed by application of high rake cutting edge
- Realization of low cutting resistance in high feed
- Symmetrical insert design for R/L type tool

## WNMX

**Features**  
Excellent geometries for a variety of materials

## DS8 45° Face Mill

2" - 5" (coolant hole)

6" - 8" (no coolant hole)

Coolant through

### Features:

- Innovative double-sided, high rake angle insert makes it possible to use 8 cutting edges
- Low cutting load due to the positive setting and high rake angle chip breaker
- Designed wiper technology in minor cutting edge provides excellent surface finish
- Smooth and stable chip control

See pages E124 through E126 for Cutting Conditions

### JMBE

- Four types of inserts are available with one holder
- Single screw for clamping : Simple clamping system
- MQL system - Suitable for longer tool life & improving surface quality

### Advantages of MQL system

(Minimum quantity lubricant)

- Environmental friendly system
- Decreased coolant cost
- Lubrication of cutting edge
- Improved chip control  
(Injection of coolant directly to the cutting edge)
- Increased tool life & improved surface quality

# Jet Mill

### Features:

- High accuracy indexable end mill for mold finishing
- Optimum machining of mold has been achieved due to the MQL system
- Easy clamping with simple screw on system

## Pro SP/NP Drill (3XD)

- Strong shank and excellent design optimizes the performance of hole-making
- Special abrasive wear resistant surface treatment protects the shank from machined chips, increasing tool life
- Strengthened drill body provides better performance even in difficult cutting conditions
- Specially designed flute guarantees excellent chip evacuation and long durability

## Combo Turning & Drilling Tool

### Features

- Double coolant system
- Excellent chip evacuation and tool life
- Ideal flute design minimizing stress concentrations

### Uses

- External/Internal turning
- Facing
- Drilling

## NC Spot Drills

**NC Spot Drill with indexable carbide insert.**  
**High efficiency! Low cost!**  
**CNC lathes, CNC turning centres, and machining centres.**

### Features

- Spotting produces better hole position and geometrically uniform holes
- Available in a variety of shank diameters
- One tool will perform multiple applications
- Long tool life
- Each insert has 2 cutting or 4 cutting edges
- Suitable for spotting, chamfering, grooving, and engraving
- 45°, 60°, 82°, 90°, 100°, 120°, 142° angle for different applications
- Increase cutting speed with coated carbide inserts

- a Engraving
- b Spotting
- c Chamfering
- d Grooving

## Inserts

- NC10**
- High positive angle and fully ground cutting edge and relief angle
  - Universal grade for non-ferrous metal, cast iron, and stainless steel
- NC40**
- General purpose, universal grade for all unhardened steel
  - Fully ground cutting edge and relief angle
- NC60**
- Cermet insert, for hardened steel up to 56HRC
  - Reduces heat and low tool wearing at the cutting edge

- NC9076**
- High positive geometry and sharp edge
  - For non-ferrous material such as aluminum, titanium, brass, copper, and long cutting chip metal
  - Produces excellent surface finish on non-ferrous metal
- NC2071**
- Universal grade for all unhardened steel, free cutting steel and tool steel up to 750N/mm<sup>2</sup>
  - Cutting geometry has been designed to optimize the tool's performance and to use in high speed machining

## 90° NC Spot Drills

### Mini Spotting Drill — N9MT05T1 Insert

Insert not included

- Smallest indexable spotting drill holder
- Single cutting edge design gives higher precision when spotting
- Applications:
  - Spotting, engraving, and chamfering on milling machines, machining centres
  - Spotting, facing on CNC lathes

| Shank | Model No.     | Length | Insert           | Max Depth | Max Dia. | Application | Code No. | Price \$ |

## 60° NC Spot Drills

### NC Spotting Drill — V9MT0802/V9MT12T3 Inserts

- Single cutting edge design gives higher precision when spotting
- Applications:
  - Spotting, engraving, grooving, and chamfering on milling machines, machine centres
  - Spotting, facing, on CNC lathes

Insert not included

| Shank | Model No.        | Length | Insert | Max Depth | Max Dia. | Code No. | Price \$ |
|-------|------------------|--------|--------|-----------|----------|----------|----------|
| 8mm   | 00-99616-09V     | 60mm   | V9MT08 | 7.3mm     | 9mm      | 612544   | 97.00    |

# Indexable Cutting Tools

## Engraving 45°/60°

This is a revolutionary new concept of engraving tools with indexable carbide inserts. They offer the ability to produce **HIGH QUALITY ENGRAVING** in most materials. The latest coated carbide grades help you to obtain higher speed and feed rate, dramatically reducing your cycle time.

### Features

- High Positive Rake Angle - suitable for engraving all types of materials, such as plastic, non-ferrous metals, aluminum, copper, carbon steel, stainless steel
- Multi-Side grinding - full peripherally ground insert to ensure efficient repeatability. It performs excellently without producing burrs, especially in copper, aluminum, and stainless steel
- High Speed, High Feed Rate - Designed to run at speeds up to 40,000rpm. Feed rate 0.08mm (0.003")/rev apply to aluminum; 0.05mm (0.002")/rev apply to stainless steel
- Economical - Each insert has 2 cutting edges. No sharpening required. Tool length is unchanged. No need to reset after changing insert or cutting edge. Excellent repeatability.

### Inserts

- NC2032**
- For all kinds of steel from 30~50 HRC, carbon steel, alloy steel and cast iron
  - TiAIN coating provides longer tool life
- NC2071**
- Universal grade for all kinds of steel <30HRC, non-ferrous metal, and stainless steel
  - The cutting geometry of this insert has been designed with a strong cutting edge

- NC9031**
- For non-ferrous metal, aluminum, brass, copper, plastic, acrylic, and stainless steel
  - Very sharp edge for shallow engraving
- NC2035**
- For steel with heat treatment up to 56HRC
  - Latest ALDURA coating to reduce heat and tool wear

| Grade  | Coating | P     | M               | K         | N           | H                    | S        |

 6" - 8" No Coolant Hole

### Features of the DS8 Insert

- Innovative double-sided high rake angle insert makes it possible to use 8 cutting edges
- Smooth cutting with low cutting load that has been acquired from the unique geometry and high rake angle of cutting edge guarantees excellent surface finish
- The combination of the innovative geometries and the variety of grades provides wide coverage for milling applications
- Applicable for various workpieces including Steel, Cast Iron and Stainless Steel

## DS4 End Mill Kits

Coolant through

### Consists of:

- 1 - DS4 90° End Mill
- 10-20 LNMX100605PNR-F2 Inserts or
- 10-20 LNMX151008PNR-M Inserts

### Features of the DS4 Insert

- Chip breaker has a high rake angle for smooth chip control
- Step design improves chip control by reducing the cutting load
- Major cutting edge for low cutting
- Concave design to avoid interference between each cutting edge
- Specially designed minor cutting edge improves surface finish
- Periphery face has a strong and negative face (Clearance angle 0°).

## Special Features

- 1) Having superior wear resistance and toughness at the same time due to special crystalline structure of film
- 2) High bonding strength between film and substrate by adopting new-coating technology.

- TiN** Reduces Friction-Force
- Al<sub>2</sub>O<sub>3</sub>** Wear Resistance, Prevents Edge Build-Up
- TiC** Wear Resistance
- TiCN** Enhancing Wear-resistance and toughness by adopting New-Coating Tech.

## Introducing The New & Improved PT25C

### Features of PT25C [New coating layer with oxidation resistance and adhesion]

- Universal grade especially for machining forged automobile components and bearing steel both in continuous and interrupted cutting
- Available for all kinds of steels - carbon steel, alloy steel, rolled steel, tool steel, mild steel, bearing steel and other special kinds of steel
- New coating technology increases welding resistance and chipping resistance, which leads to longer tool life

Stable tool life  
 > Higher production stability

Longer tool life & Higher removal rate  
 > High cutting conditions and shorter cutting time available

Ideal combination of a grade and chip breakers  
 > Prolongs tool life  
 > Wide applications ranging from roughing to finishing

Disperse cutting force > Reduce chipping >  
 Increase tool life > Improved productivity

[ For Finishing ]

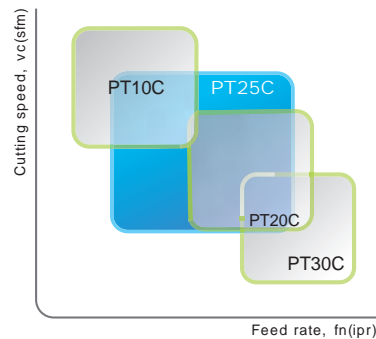

[ For medium-finishing ]

[ For medium machining ]

**Increased wear resistance, welding resistance, and chipping resistance**

### Application and Features

- General grade for all kinds of steel (carbon steel, alloy steel, rolled steel, tool steel, mild steel, bearing steel, etc.) in both continuous and interrupted machining
- Longer tool life in high speed machining due to improved wear resistance and plastic deformation resistance
- Improved coating layer with superior adhesion improves chipping resistance and stability of machining
- Fine finished coating surface provides welding resistance, superior lubrication, and lower cutting load

#### Wear resistance

#### Welding resistance

#### Chipping resistance

### Recommended Cutting

| Workpiece | Recommended grade   | vc(sfm) | ISO             | Application range |
|-----------|---------------------|---------|-----------------|-------------------|
| P Steel   | Continuous cutting  | PT10C   | 984(656~ 1,312) | P01               |
|           |                     | PT25C   | 918(590~ 1,246) | P10               |
|           |                     | PT20C   | 820(492~ 1,148) | P15               |
|           | Interrupted cutting | PT30C   | 656(492~ 820)   | P20               |
|           |                     | PTM50C  | 623(328~ 754)   | P20               |
|           |                     |         |                 | P30               |
|           |                     |         |                 | P35               |
|           |                     |         | P40             |                   |

CVD Coating Grades

| Grade | ISO                    | Special Features  | Use     |

## Special Features

- 1) PVD coating technique has inherent advantage such as superior chipping resistance of coated film itself and maintains the toughness of carbide substrate. Thus it is possible to increase the tool life approximately 2~4 times longer than carbide cutting tools.
- 2) PVD coating can make sharp cutting edge without blunting of sharp substrate.
- 3) Ti-base coating film can provide excellent surface finish and high accuracy machining due to the low affinity of Ti film and workpiece.

## SOWA PVD Trio

- PM30P** Steel milling grade equipped with tough substrate and Nano-TiAlN coating film.
- MT30P** Exclusive grade for turning of stainless steel consisting of tough substrate and TiAlN coating film.
- MM30P** Exclusive grade for milling of stainless steel consisting ultra fine grain size substrate and TiAlN coating film.

## Cermet Grades

### Comparing with Coated Carbide

1. Suitable for light cutting (finishing)
2. Better wear resistance and surface finish can be acquired at the same cutting condition

## Guide of Grade Selection

**Special Features**

CBN is a cutting tool material made under ultra high pressure and temperature sintering mixture of cubic boron nitride and special ceramic binder material. CBN tool is suitable for high speed precise machining of hardened steels and cast irons. Machining with CBN can replace conventional grinding process effectively.

## Cutting Conditions

### Hardened Steel

#### ● Grade

| Grade | Application Range                      | Hardness | TRS (kgm <sup>2</sup> ) |
|-------|--|----------|-------------------------|
| KB320 | Comprehensive grade for hardened steel | >45HRC   | 100 ~ 110               |
| KB330 | Severe intermittent cutting            | >45HRC   | 110 ~ 120               |
| KB420 | For difficult intermittent operations  | >45HRC   | 110 ~ 120               |

TRS = Transverse ruptural strength

#### ● Application

### Cast Iron

#### ● Grade

| Grade | Application Range            | Hardness      | TRS (kgm <sup>2</sup> ) |
|-------|------------------------------|---------------|-------------------------|
| KB350 | Cast Iron, Ductile Cast Iron | 180 ~ 230 HRB | 100 ~ 110               |
| KB360 | Machining of Cast Iron       | 180 ~ 230 HRB | 95 ~ 110                |

TRS = Transverse ruptural strength

#### ● Application range

| Workpiece                  | Hardness (HRB) | Part Name         | Cutting Speed (sfm) |     |      |      |      |
|----------------------------|----------------|-------------------|---------------------|-----|------|------|------|
|                            |                |                   | 325                 | 650 | 1325 | 1975 | 2625 |
| GC250 (Ferrite & Pearlite) | 180            | Oil Pump Housing  |                     |     |      |      |      |
|                            |                | Brake Disc        |                     |     |      |      |      |
| GC300 Pearlite             | 250            | Engine Block      |                     |     |      |      |      |
| Alloy Iron Pearlite        | 250            | Scroll Compressor |                     |     |      |      |      |
|                            |                | Brake Drum Liner  |                     |     |      |      |      |
| GCD400 Ferrite & Pearlite  | 150            | Differential Case |                     |     |      |      |      |
| GCD700 Bainite             | 300            | Brake Body        |                     |     |      |      |      |
|                            |                | Knuckle           |                     |     |      |      |      |

### Sintered Alloy

#### ● Grade

| Grade | Application Range                                       | Hardness      | TRS (kgm <sup>2</sup> ) |
|-------|---|---------------|-------------------------|
| KB360 | Machining of sintered alloy, roll, heat resistant alloy | 180 ~ 230 HRB | 95 ~ 110                |

TRS = Transverse ruptural strength

#### ● Application range

|                       | Valve seat of gasoline engine | Valve seat of gasoline engine |
|-----------------------|-------------------------------|-------------------------------|
| Flange Cutting        |                               |                               |
| Traverse Cutting      |                               |                               |
| Hardness of Workpiece |                               |                               |

### Heat Resistant Alloy

#### ● Grade

| Grade | Application Range                                       | Hardness      | TRS (kgm <sup>2</sup> ) |
|-------|---|---------------|-------------------------|
| KB360 | Machining of sintered alloy, roll, heat resistant alloy | 180 ~ 230 HRB | 95 ~ 110                |

TRS = Transverse ruptural strength

### Cutting Test Examples

#### ● Heat Treated Steels

Workpiece: SUJ2(62-64 HRC) Cutting condition: V=250, 325, 650, 825sfm  
Insert: SNGN 432 f=0.004ipr d=0.008inch  
Cutting condition: BM200, BM300, BM400

#### ● Gray Cast Iron (No45B)

Workpiece: Gray cast irons (No35B) Cutting condition: V=1650sfm  
f=0.012ipr d=0.005inch, Wet cut

#### ● Gray Cast Iron (No35B)

Workpiece: Gray cast irons (No35B) Cutting condition: V=2300sfm  
f=0.01ipr d=0.01inch, Wet cut

## SOWA Ceramic Grades

| SOWA Grade | ISO                    | Special Features  | Use     |
|------------|------------------------|---|---------|
| GP100      | P01 - P10<br>K01 - K10 | Universal grade for machining cast iron and hardened steel. Tougher alternative to GP300. High thermal shock resistance. Al <sub>2</sub> O <sub>3</sub> +TiC grade with micrograin structure. | Turning |
| GP300      | P01 - P15<br>K01 - K15 | GP300 was developed for extremely hardened steel and high hardness alloy steel. It is a Al <sub>2</sub> O <sub>3</sub> +TiCN grade with micrograin structure.                                 | Turning |
| S300       | P01 - P15<br>K01 - K15 | Designed for high cutting speed of cast iron with heavy interruption.   | Milling |
| S400       | P01 - P20<br>K01 - K20 | The toughness and hardness of the edge were highly improved against wear for high speed cutting with heavy interruption. Especially in the automobile industry.                               | Milling |

## Recommended Cutting Condition

## Special Features

SOWA uncoated carbide grades have exceptional wear resistance and toughness at the same time through special alloy design with WC, Co, and additives like TaC, TiC etc.

1. Excellent resistance to thermal crack allows cutting with coolant.
2. Specially designed alloys have fine micro structure and low affinity with workpiece.
3. They have excellent toughness in general.

### ● Special Features

| ISO | Composition   | Characteristics  | Workpiece   |
|-----|---------------|--|---|
| P   | WC-TiC-TaC-Co | Excellent thermal shock resistance and resistance against plastic deformation      | Carbon Steel, Alloy Steel                         |
| M   | WC-TiC-TaC-Co | Comprehensive grades have excellent thermal shock resistance and superior strength | Alloy Steel, Stainless Steel                      |
| K   | WC-Co         | Hard and strong grades   | Cast Iron, Non-ferrous metal, Plastic, Acryl, etc |

| ISO | Grade  | Hardness (HRA) | TRS (kg/mm <sup>2</sup> ) | Young's Modulus (x103kg/mm <sup>2</sup> ) | Thermal Conductivity (cal/cm·Sec·°C) | Thermal Expansion Coefficient (x10 <sup>-6</sup> /°C) |
|-----|--------|----------------|---------------------------|---|--------------------------------------|---|

## Aluminum Machining — Chipbreaker A

**1. Wide Chip Pocket & High Rake Angle**

- Smooth chip evacuation
- Prevents edge build-up
- Reduces cutting force

**2. Reinforce Cutting Edge Strength**

- Increases main cutting edge toughness
- Induces smooth chip flow at shallow depth of cut
- Prevent chipping

**3. 2 Step Chip Breaker**

- Induces smooth chip curl.
- Reduces cutting force at high speed, high feed machining

**4. Curved Cutting Edge**

- Sharp cutting edge provides effective shallow cutting
- Excellent surface finish of workpiece and smooth cut

### ■ Recommended Cutting Condition

### ■ Cutting Condition

| Workpiece                   | Hardness    | Recommended Grade | Recommended Cutting Condition |             |                     |
|-----------------------------|-------------|-------------------|-------------------------------|-------------|---------------------|
|                             |             |                   | Speed (sfm)                   | Feed (ipr)  | Depth of Cut (inch) |
| Aluminum and Aluminum Alloy | 20°~125 HRB | KT10U<br>KTM10U   | 650 ~ 2650                    | 0.004-0.016 | 0.020-0.040         |

# Chipbreaker Recommendation As Per Workpiece

**1. Workpiece Material : 1010, 1015, 12L14, 5015, 1112, etc.  
Soft Steel  
Hardness : Under 180HRB (18HRC)**

## ■ Chipbreaker, Grade, Cutting Condition Recommendation

| Workpiece   | Chipbreaker & Grade Selection |                             |                                  |                                 | Insert Shape |          |          |          |              |          |

# ASIMETO®

## Exactly what you need.

Everything we do is as exacting as the tools we make. Asimeto is the creator and manufacturer of high-precision measuring instruments - designed and registered exclusively in Germany. Asimeto tools are very competitively priced and are sold through the Asimeto distribution network. Our ultimate commitment to quality allows us to ensure strict production standards and reliable technical service for our global customers.

The quality and measuring accuracy of all Asimeto precision tools is guaranteed by the Asimeto Calibration Laboratory. All tools are inspected for conformance to the Asimeto design specifications and are then processed through the Asimeto calibration laboratory. Only the latest state of the art calibration equipment has been selected, from the leading global manufacturers, to ensure that the calibration costs are contained by increasing throughput, without compromising measurement accuracy or repeatability.

## CALIBRATION

Every Asimeto tool is supplied with its own calibration certificate. All tools are calibrated by our **ISO 17025** accredited lab at no extra charge to the customer.

## 12 + 12 CARE PROGRAM

To supplement the industry standard 12 month warranty an additional 12 month warranty is available by registering your individual purchase online at [www.asimeto.com](http://www.asimeto.com) within 30 days from the date of purchase.

## Digital Outside Micrometers with SPC Output

ASIMETO

- Accuracy: Per B89.1.13-2001 specification
- Carbide measuring faces
- Automatic on/off to maximize battery life
- Inch/Metric conversion
- Absolute or incremental measuring modes

## QuantuMike

Mitutoyo

### Speed

- Get the job done four times faster! Mitutoyo's patented high precision lead screw feeds the spindle by 2mm per revolution of the thimble instead of the standard 0.5mm.

### Reliability

- Expect excellent repeatability results thanks to the patented ratchet thimble mechanism. It transmits microvibrations along the spindle to the contact face to provide a constant measuring force and encourage good workpiece contact.

### Ergonomic

- The ratchet works from the thimble as well as the speeder, so it's always easy to use - even when taking one-handed measurements

### Features:

- 0.00005" / 0.001mm resolution
- +/- 0.00005" / 1um accuracy

| Mitutoyo Model No. | Range (in./mm)      | SPC | Sowa Code No. | Price \$ |

## T444 Outside Micrometers

**Starrett**

- No-glare satin chrome finish which resists rust
- Advanced sleeve design with staggered lines and distinct figures for precise and easy readability
- Balanced frame and thimble design to ensure easy handling and better readability
- Provides quick and easy adjustment
- Graduation: 0.0001"

| Range | Starrett No. | Sowa Code No. | Price \$ |
|-------|--------------|---------------|----------|
| 0-1"  | T444.1XRL-1  | 633913        | 197.00   |

## Digital Disc Micrometers — Non-Rotating Spindle

**ASIMETO**

- Resolution: 0.00005"/0.001mm
- Non rotating spindle
- Ratchet stop
- Inch/Metric conversion
- Absolute or incremental measuring modes
- Automatic On/Off
- Sizes over 1" come with standard

| Range           | Accuracy | Notes                             | Code No. | Price \$ |
|-----------------|----------|-----------------------------------|----------|----------|
| 0-1" / 0-25mm   | ±0.0001" | Disc Diameter 0.79"               | 7145011  | 618.22   |
| 1-2" / 25-50mm  | ±0.0002" | Disc Diameter 0.79" with Standard | 7145021  | 676.74   |
| 2-3" / 50-75mm  | ±0.0002" | Disc Diameter 0.79" with Standard | 7145031  | 752.88   |
| 3-4" / 75-100mm | ±0.0002" | Disc Diameter 0.79" with Standard | 7145041  | 834.79   |

## Digimatic Disc Micrometer

**Mitutoyo**

- With SPC Output
- Resolution 0.00005"/0.001mm

| Mitutoyo Model No. | Range (in.) | Grad (in./mm) | Sowa Code No. | Price \$ |
|--------------------|-------------|---------------|---------------|----------|
| 323-350            | 0 - 1"      | 0.001"/0.01mm | 840656        | 707.00   |

## 220 Series Mul-T-Anvil Micrometer

**Starrett**

- Graduation: 0.001"
- Balanced frame and thimble design
- Ring-type knurled lock nut
- Interchangeable anvils rigidly held in vise type frame, and are quickly interchanged by a single lock screw adjustment
- Two hardened anvils furnished – round 0.120" diameter (3mm) and flat 0.125" (3mm) and 0.060" (1.5mm) thick – sizes approximate
- Accommodates special anvils up to 5/16" (8mm) thick
- Can be used as height gauge by removing vise jaw
- Satin chrome finish
- Rigid one-piece frame of drop forged steel
- Extremely hard and stable one-piece spindle
- Micro-lapped measuring faces

| Range | Starrett No. | Sowa Code No. | Price \$ |
|-------|--------------|---------------|----------|
| 0-1"  | 220XFL-1     | 629813        | 512.00   |

## Digital Blade Micrometers

**ASIMETO**

- For measuring the groove diameter of shafts, keyways, and other hard to reach portions
- Ratchet stop
- Non-rotating spindle
- Carbide measuring faces
- Inch/Metric conversion
- Absolute or incremental measuring modes

| Range           | Resolution         | Accuracy | Blade Dimensions Depth x Length | Code No. | Price \$ |
|-----------------|--------------------|----------|---------------------------------|----------|----------|
| 0-1" / 0-25mm   | 0.00005" / 0.001mm | ±0.0001" | 0.030" x 0.250"                 | 7117011  | 747.70   |

Note: individual rods are matched with micrometer and should not be interchanged with other sets.

## 823 Series Tubular Inside Micrometers

**Starrett**

- Graduation: 0.001"
- Extension rods made of steel tubing, light in weight, extremely rigid
- Rods are approximately 3/8" (9.5mm) diameter
- Rods are insulated, with the exception of 1/2" (13mm) and 1" (25mm) sizes
- Each rod marked with length
- Hardened and ground anvils on rods are adjustable for length
- Head anvil is hardened and ground
- Interchangeable anvils on both 1/2" (13mm) and 1" (25mm) heads
- Quick reading figures – every thousandth numbered on inch reading tools
- Lock nut furnished on 1" (25mm) heads

| Range     | Description          | Starrett No. | Sowa Code No. | Price \$ |
|-----------|----------------------|--------------|---------------|----------|
| 1 1/2-8"  | With 5 Rods & Handle | 823AZ        | 629521        | 569.00   |
| 1 1/2-12" | With 8 Rods & Handle | 823BZ        | 629023        | 684.00   |
| 4-24"     | With 7 Rods          | 823CZ        | 629024        | 885.00   |
| 4-32"     | With 8 Rods          | 823DZ        | 630264        | 981.00   |

## 124 Series Inside Micrometers

**Starrett**

- Graduation: 0.001"
- Rod diameters are approximately 1/4" (6mm)
- Rods are insulated
- Each rod marked with length
- Hardened and ground anvils on rods, adjustable for length
- Head anvil is hardened and ground
- Quick-reading figures – every thousandth numbered on inch reading tools
- Furnished with case

| Range | No. of Rods | Starrett No. | Sowa Code No. | Price \$ |
|-------|-------------|--------------|---------------|----------|
| 2-8"  | 6           | 124AZ        | 629581        | 478.00   |
| 2-12" | 10          | 124BZ        | 629021        | 571.00   |

## Tubular Inside Micrometers

**Mitutoyo**

- Ideal for fast, accurate inside measurement of cylinders, rings and parallel surfaces
- Adjustable zero-setting helps provide accuracy
- Scale on thimble and sleeve is laser etched for easier reading in all conditions
- Carbide measuring surfaces provide better accuracy and wear resistance

| Mitutoyo Model No. | Range (in.) | Grad (in.) | Sowa Code No. | Price \$ |
|--------------------|-------------|------------|---------------|----------|
| 137-212            | 2-12        | 0.001"     | 844684        | 517.00   |

## IP67 Coolant Proof Digital Calipers

ASIMETO

- Absolute function, there is no need to set the zero
- Hold function for easy reading
- Absolute or incremental measuring modes
- Inch/Metric conversion
- Metal Housing, the design will allow the caliper to be used in normal workshop conditions and is resistant to coolant, water, dust or oil
- Auto power on/off
- Power: 3V lithium battery

## Digimatic Scale

Mitutoyo

- No rack, no pinion, no glass scale. Digimatic Scale is safely embedded in the hardened stainless steel blade
- All units come with two mounting brackets, each located at either end of the scale
- Battery life approximately 2 years

| Mitutoyo Model No. | Range (in./mm) | Resolution (in./mm) | Output | Sowa Code No. | Price \$ |
|--------------------|----------------|---------------------|--------|---------------|----------|
| 572-211-20         | 6"/150mm       | 0.0005"/0.01mm      | YES    | 847859        | 320.35   |

## Digital Indicators

- Tolerance measurement feature
- Inch/Metric conversion
- The maximum, minimum, or runout value can be displayed during measurement
- Absolute and incremental measuring modes
- SR44 battery
- Flat Back (attached) and Lug Back supplied
- 3/8" stem diameter for inch models and 8mm stem diameter for metric models

ASIMETO

## IP65 Absolute Digital Indicators

- Absolute or incremental measuring modes
- Tolerance measurement feature allows for the upper and lower tolerance for maximum and minimum
- Inch/Metric conversion
- Flat back (attached) and lug back supplied
- 3/8" stem diameter
- 360 deg. screen rotation
- Cable data output: 7900070
- Wireless data transfer: 7901002

## Digimatic Indicators ID-N/B

Mitutoyo

- Proven ABSOLUTE sensor
- Rated to IP66 water- and dust-proofing standard and oil resistance improved
- Slim body design is advantageous for multi-point measurements
- Improvement in workability with the LCD readout-rotation function
- Back plunger design (ID-B).
- Built-in tolerance judgment function
- Switchable resolution
- Waterproof data output connector
- Built-in hold/preset function

Slim type ID-N

## Quick Set / True Test Indicators

Basic Model Includes:

- Horizontal type, series 513
- 0.078" carbide contact point
- 3/8 dovetail and nut

Complete Model Includes:

- All basic accessories
- 0.039 and 0.118 contact points
- Swivel clamp for 5/32 and 3/8 dovetail
- 5/32 dovetail arm

## 711 Series Dial Test Indicators

- Graduation: 0.001" Dial Reading 0-15-0
- Steel contact points length: 5/32" (4mm)
- Steel contact points ball diameters: 0.035" (0.9mm), 0.062" (1.6mm), 0.120" (3mm)
- Ideal for precise measurements in machining, layout, and inspection work
- Smooth, jeweled lever action
- Positive reversing switch
- Hard chrome-plated ratchet contact point
- Swiveling tubular body
- Easy reading dials, half-shaded yellow for clarity

Starrett

## Extended Range Dial Test Indicator Sets #1

ASIMETO

- Double the range of most indicators
- Jeweled movement

### Standard Accessories:

- Calibration certificate, instruction manual, warranty card, indicator, wrench
- Height gauge bar with swivel clamp w/ 5/32", 7/32", 1/4" holes
- Axial support with 3/8" stem and dovetail
- Reduction sleeve 3/8" to 5/32"
- Two dovetail stems, 3/8" and 5/32"
- Three contact points: 0.4" (hardened steel), 0.08", 0.12" (Tungsten Carbide) x 5/8" long

| Range  | Graduation | Accuracy | Dial Dia. | Indicator            | Code No. | Price \$ |

| 0.060" | 0.001"     | ±0.0012" | 30mm      | Horizontal (7503061) | 7504815  | 283.73   |

## Extended Range Dial Test Indicator Sets #2

ASIMETO

- Double the range of most indicators
- Jeweled movement

### Standard Accessories:

- Calibration certificate, instruction manual, warranty card, indicator, wrench
- Xtra-Mag magnetic base with 2 universal ball sockets
- Micro-fine adjustment screw
- 3-9/16" extension arm
- Two dovetail stems, 3/8" and 5/32"
- Three contact points: 0.4" (hardened steel), 0.08", 0.12" (Tungsten Carbide) x 5/8" long

| Range  | Graduation | Accuracy | Dial Dia. | Indicator            | Code No. | Price \$ |
|--------|------------|----------|-----------|----------------------|----------|----------|
| 0.060" | 0.0005"    | ±0.0012" | 38mm      | Horizontal (7504561) | 7504821  | 298.21   |

## Dovetail Stem Sets

ASIMETO

- Includes stem and knurled clamping ring
- Used in conjunction with a magnetic base clamp to mount a test indicator with a dovetail

| Size  | Code No. | Price \$ |
|-------|----------|----------|
| 3/8"  | 7500311  | 9.74     |
| 5/32" | 7500313  | 9.74     |

## Swivel Clamp

ASIMETO

- Used to mount an indicator via either a dovetail stem or directly by a dovetail
- Clamps directly onto the main post of a magnetic base

| Description                          | Code No. | Price \$ |
|--------------------------------------|----------|----------|
| For 3/8" & 5/32" Dia. Dovetail Stems | 7500251  | 48.18    |
| For 8mm & 6mm Dia. Dovetail Stems    | 7500252  | 47.47    |

## Centering Holders

ASIMETO

- Allows large diameter cylinder or holes to be centered

| Description     | Code No. | Price \$ |
|-----------------|----------|----------|
| 8mm Dia. Stem   | 7500350  | 50.74    |
| 0.25" Dia. Stem | 7500351  | 32.58    |

## Half Round Combination Holder

STM

- Two-point adjustment
- 1/4" shank
- For dovetail and 5/32" stem indicators

| Description                   | Code No. | Price \$ |
|-------------------------------|----------|----------|
| Half Round Combination Holder | 200816   | 27.17    |

## Test Indicator Points

ASIMETO

- Carbide, Steel, or Ruby ball

## Straight Metric Indicator Stem Bushing

- Accepts 8mm stem, converts to 3/8" diameter stem
- Straight bushing, no head
- 0.500" length
- Brass, Nickel Plated

ASIMETO

| Description                            | Code No. | Price \$ |
|--|----------|----------|
| Straight Metric Indicator Stem Bushing | 7500320  | 3.41     |

## Select-A-Point Kit

The most useful accessory kit for all dial indicators - a complete set of 22 different points, increasing the versatility of your indicators.

- Fits all AGD 1, 2, 3, 4 drop style indicators, 4-48 threads

| Description        | Code No. | Price \$ |
|--------------------|----------|----------|
| Select-A-Point Kit | 200820   | 18.54    |

## Articulating Arm Magnetic Bases

- Accepts test indicators with dovetail clamping mechanism
- Dial gauges can be held by the 3/8" or 8mm diameter stem or by the lug backing plate
- Arm has 3 articulating joints that can be locked with the single hand knob
- The rotary knob switches natural magnet on or off
- The precision surfaces and the bottom V are securely fastened to the ferrous workpiece or machine table when the rotary knob is in the on position
- Slot: 6.5mm
- Working Angle 150°
- 7602011 does not have fine adjustment

ASIMETO

| Magnetic Power | Magnetic Base (L x W x H) | Height | Code No. | Price \$ |
|----------------|---------------------------|--------|----------|----------|
| 30 kg          | 36 x 30 x 35mm            | 195mm  | 7602011  | 79.68    |

## Holders With Fine Adjustment On Base

**Unique single direction fine adjustment at base.**

- Powerful on/off magnetic base
- Holds 3/8" and dovetail
- Unique central locking mechanism with spring loaded bearing
- Five axis holder
- Instant fixation in any position
- Easy to set up into required position
- Black finished arms

| Arm Length and Diameter |                       |                    |          |          |

## Holder With Double Fine Adjustment — MG6161

- New double fine adjustment
  - Bottom: unique single direction
  - Top: universal swivel clamp
- Holds 6mm, 8mm, 3/8", dovetail, and lug back
- Five axis holder
- Unique central locking mechanism with Noga designed spring loaded bearing
- Powerful magnetic base 80kgf

| Model No. | Code No. | Price \$ |
|-----------|----------|----------|
| MG6161    | 165501   | 366.22   |

## PH Holders With Fine Adjustment At Base

- Single direction fine adjustment at base
- Powerful on/off magnetic base
- Universal Swivel Clamp for all dial & test indicators
- Holds 6mm, 3/8", dovetail and lug back
- Strong arm lock by using the unique 3-point system
- Easy to set up gauges into required system
- Black finished arms

| Arm Length and Diameter |                        |                       |          |          |

| Model                   | Post Dia. x Length(mm) | Arm Dia. x Length(mm) | Code No. | Price \$ |
| PH3100                  | 10 x 120               | 8 x 110               | 165471   | 84.96    |
| PH2040                  | 14 x 203               | 12 x 185              | 165365   | 104.03   |

## Noga Economy Magnetic Base — PH6400

- Solid arm locked by using Noga unique 3-point clamping system
- Universal swivel clamp for 3/8", 8mm, 6mm, dovetail and back lug
- Improved fine adjustment on the magnet base
- Powerful 176 lbf on/off magnetic base
- Post - 14mmX200mm Arm - 12mmX190mm

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| PH6400 | 165472   | 157.72   |

## Noga Standard Holder — DG1033

- 11" Reach
- Noga central locking mechanism with Noga designed spring loaded bearing
- Powerful On/Off magnetic base 80kgf
- Dial gauge holder is 3 dimensional

| Arm Length and Diameter |                       |                    |          |          |
|-------------------------|-----------------------|--------------------|----------|----------|
| Model                   | Bottom Arm Length(mm) | Top Arm Length(mm) | Code No. | Price \$ |
| DG1033                  | 110                   | 101                | 165350   | 278.57   |

## Noga Heavy Duty Holder — MG1033

- Has fine adjustment
- Noga central locking mechanism with spring loaded bearing
- Powerful magnetic base 80 kgf

| Arm Length and Diameter |                       |                    |          |          |
|-------------------------|-----------------------|--------------------|----------|----------|
| Model                   | Bottom Arm Length(mm) | Top Arm Length(mm) | Code No. | Price \$ |
| MG1033                  | 133                   | 113                | 165355   | 135.99   |

## Five Axis Holder — NF1024

- Unique, 5 axis, 3 dimensional holder
- Patented 360 degree fine adjustment at the base
- Central locking mechanism
- On/Off magnetic base 17 kgf

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| NF1024 | 165360   | 258.83   |

## Noga Centerflex — NF1018

- Centerflex, holds indicators with dovetails and 3/8" diameter stems
- Test Indicator holder arm with 5/16" diameter and 1-9/16" long stem
- Most useful for centering holes on milling machines

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| NF1018 | 165420   | 151.44   |

## F/A Top Attachment — FA1500

- Holds indicators with 3/8", 6mm, 8mm stems and dovetails
- M6 thread
- Fine adjustment

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| FA1500 | 165421   | 72.75    |

## Universal Surface Gauges

Fully hardened and ground base serves as an accurate reference surface. Machined Vee groove in the base allows the gauge to be used conveniently on curved surfaces.

| Base Dim. (in.) | Spindle Length (in.)      | Scriber Length (in.) | Model No. | Code No. | Price \$ |
|-----------------|---------------------------|----------------------|-----------|----------|----------|
| 2-3/16 x 1-5/8  | 7" with extra 4" spindle  | 3                    | SG/4-7    | 231246   | 78.48    |
| 3-1/8 x 2-1/2   | 12" with extra 9" spindle | 7                    | SG/9-12   | 231248   | 113.65   |

## Digital Interchangeable Rod Type Depth Gauges

- The total measuring range is accomplished with threaded depth rods in 1"
- The base surface is precisely finished and hardened for accurate repeatable measurements
- Inch/Metric conversion
- Stroke 12.7mm
- Includes 10 rods

| Range      | Resolution     | Accuracy       | Base Length | Code No. | Price \$ |
|------------|----------------|----------------|-------------|----------|----------|
| 0-4"/100mm | 0.0005"/0.01mm | ±0.001"/0.02mm | 63x17mm     | 7475040  | 447.29   |

## Absolute Digital Depth Calipers

- Extra large LCD readout
- Inch/Metric conversion
- Precision ground measuring surfaces

| Range           | Resolution       | Accuracy | Code No. | Price \$ |
|-----------------|------------------|----------|----------|----------|
| 0-6" / 0-150mm  | 0.0005" / 0.01mm | ±0.001"  | 7327067  | 138.51   |
| 0-8" / 0-200mm  | 0.0005" / 0.01mm | ±0.0015" | 7327087  | 173.14   |
| 0-12" / 0-300mm | 0.0005" / 0.01mm | ±0.0015" | 7327127  | 402.71   |

## Absolute Digital Depth Calipers With Single Hook

- Stationary measuring surface on the beam protrudes at right angles (hook) to allow for measurement of depths, internal groove positions, and other intricate measurements
- All measuring surfaces are hardened

| Range           | Resolution       | Accuracy        | Code No. | Price \$ |
|-----------------|------------------|-----------------|----------|----------|
| 0-6" / 0-150mm  | 0.0005" / 0.01mm | ±0.001"/0.02mm  | 7322067  | 196.22   |
| 0-8" / 0-200mm  | 0.0005" / 0.01mm | ±0.0015"/0.03mm | 7322087  | 219.18   |
| 0-12" / 0-300mm | 0.0005" / 0.01mm | ±0.0015"/0.04mm | 7322127  | 444.21   |

## Dial Interchangeable Rod Type Depth Gauges

- The total measuring range is accomplished with threaded depth rods in 1"
- The base surface is precisely finished and hardened for accurate repeatable measurements
- Stroke 1"
- Includes 4 rods

| Range | Graduation | Accuracy | Base Length | Code No. | Price \$ |
|-------|------------|----------|-------------|----------|----------|
| 0-4"  | 0.001"     | ±0.002"  | 2.5"x0.63"  | 7473041  | 292.46   |
| 0-4"  | 0.001"     | ±0.002"  | 4"x0.63"    | 7473043  | 333.42   |

## Digital Tire Depth Gauge

- The origin point is retained throughout the life of the battery
- Inch/Metric conversion
- Spherical end anvil

| Range         | Resolution     | Accuracy        | Base Length | Code No. | Price \$ |
|---------------|----------------|-----------------|-------------|----------|----------|
| 0-1.2"/0-30mm | 0.0005"/0.01mm | ±0.0015"/0.03mm | 60mm        | 7321010  | 147.49   |

## Dial / Digital Bore Gauges

Mitutoyo

- Interchangeable anvils
- Carbide ball contact point for durability
- Optional extension rods can be attached
- A digimatic indicator can be attached in place of the dial gauge

| Mitutoyo Model No. | Capacity (in.)  | Grad (in.)       | Sowa Code No. | Price \$ |

Note: For 0.0005" Graduation Purchase Code # 7402065 Dial Indicator

## ABSOLUTE Digimatic Snap Bore Gauges

Mitutoyo

- TiN coated contact points
- Large LCD digits for error-free reading
- 330° rotatable display unit for easy reading at any angle
- GO/NO-GO judgment function
- ABSOLUTE linear encoder eliminates over-speed errors
- With SPC output
- Can measure deep holes by attaching optional extension rod
- Supplied in fitted wooden case

## Steel Surface Plate Stands

- Fabricated from 2" x 2" 1/4" thick angle iron, welded together for extra strength—easily support more than twice the weight of the surface plate
- No assembly required; ready to use
- Gray enamel finish
- For exact height, add stand height listed in chart to surface plate thickness
- Made in Canada

| Plate Size (in.) | Weight (lb) | Stand Height (in.) | Code No. | Price \$        |

## S829 Series Small Hole Gauge Set

- Hardened-ball measuring surface with two-point contact
- Radius on each gauge is less than the minimum diameter to be measured, which provides the two-point contact necessary for maximum accuracy
- Smooth, sensitive adjustment for better feel, giving more accurate measurements
- The adjustment of the gauges beyond their range is restricted by a safety stop that prevents breakage

Starrett

| 4200-100  | Centre finder | 606340   | 45.22    |

## Depth & Angle Gauge

The ability to measure depths and angles is combined in this versatile tool. The head is made from selected steel and has an attractive black finish. It is graduated both left and right to 15°, 30° and 45° and the rule can be set to any of these angles. A 6" (150mm) steel rule is fitted to the head and can be locked in final position for depth or angular measurements by a knurled nut.

STM

| Rule Length | Code No. | Price \$ |
|-------------|----------|----------|
| 6"          | 231274   | 25.71    |

## Bore Gauges (Taper Gauges)

Manufactured from stainless steel, these have permanently engraved graduations. Accurate taper throughout the length of the gauge. Available with imperial or metric graduations.

STM

| Range      | Model No. | Code No. | Price \$ |
|------------|-----------|----------|----------|
| 1/32"-5/8" | DG/1-15   | 231276   | 32.17    |
| 1-16mm     | BG/1-15   | 231277   | 32.19    |

## Edge & Centre Finders

STM

Edge and Centre Finders are time saving positioning tools for use on jig boring, milling machines etc. These are used for accurate locating work edges, shoulders, grooves, centre points and scribed lines.

## 827 Series Edge Finders

Starrett

- 0.200" Contact Diameter
- Locate work surfaces easily, quickly and accurately
- Body and contacts made of tool steel, hardened, ground and lapped to close tolerances for diameter and concentricity
- Furnished in protective case

| Description                              | Body Dia. | Starrett No. | Sowa Code No. | Price \$ |

## Digital Protractors — Level Type

- This protractor provides an immediate digital reading of any angle in a full circle with 0°-90°-0°-90°-0° readings
- ABS/ZERO button allows two measuring modes, Standard and Alternate Reference
- Four 90° quadrants for display purposes
- HOLD button for freezing a reading in an unreadable position
- V-grooves on top and bottom for use on curved surfaces
- 7490162 comes with a magnetic bottom for easy fixing

| Range | Resolution | Accuracy | Code No. | Price \$      |
|-------|------------|----------|----------|---------------|
| 360°  | 0.1°       | ±0.1°    | 7490160  | <b>258.45</b> |
| 360°  | 0.1°       | ±0.1°    | 7490162  | <b>218.48</b> |

## STM Universal Bevel Protractor

- Base available for setting up jobs on surface plates, milling machines, etc.
- Dial face and vernier are finished in satin chrome to insure easy reading
- Vernier reading in 5 minutes of the arc
- Blades is fastened by a knurled thumb lock which can be set at any desired point
- An angle attachment for acute angle measuring is also available
- Blade slides full length
- Fine adjustment knob for measuring or setting of minute angles
- Protractor dial is graduated over 360° (in 0° to 90° sectors) and rotates around the full circle
- Hardened stainless steel, rust and wear resistant for long life
- With magnifier glass for easy and faster reading
- Protractor accepts both 6" and 12" blade
- Positive rigid locking clamps
- Includes fitted case

| Description                         | Blade Size | Code No. | Price \$      |
|-------------------------------------|------------|----------|---------------|
| Protractor head with magnifier lens | 6 and 12   | 205610   | <b>185.77</b> |
| Magnifier                           | —          | 205645   | <b>36.24</b>  |

## Degree Protractors

This stainless steel protractor comes with either a semi-circular or a rectangular head. The head has permanently deep etched graduations, 0 to 180° in opposite directions thus permitting reading an angle directly and also its supplement. The 6" (150 mm) blade has a graduation line on one end that permits accurate setting and reading of angles.

| Type        | Code No. | Price \$     |
|-------------|----------|--------------|
| Round       | 231266   | <b>30.10</b> |
| Rectangular | 231268   | <b>32.58</b> |

## Depth Gauge with Protractor

A versatile tool, the Depth Gauge with Protractor allows for measurement of both angles and depths.

- Stainless steel
- Graduations: 0-180° in opposite directions
- 6" (150 mm) steel rule

| Type        | Code No. | Price \$     |
|-------------|----------|--------------|
| Round       | 231270   | <b>33.48</b> |
| Rectangular | 231272   | <b>36.45</b> |

## Protractors

- Measures angles from 0-180°
- Used for drawing radial lines, transferring angles and setting bevvels
- Head measures 3-5/16" x 2"
- Features 6" arm and knurled thumb lock nut
- Blade secured firmly by lock nut at any angle
- Made of tempered steel with satin chrome finish

| Model No. | Style       | Description            | Code No. | Price \$     |
|-----------|-------------|------------------------|----------|--------------|
| 5170      | Rectangle   | Supplied with 6" arm   | 606150   | <b>81.46</b> |
| 5180      | Semi-Circle | Supplied with 6" arm   | 606152   | <b>81.46</b> |
| 5190      | Rectangle   | With 6" graduated rule | 606154   | <b>94.59</b> |

## Scribers

### MS/3-ST

3 interchangeable threaded points, short straight, short bent and long bent

### MS/4

Single ended light duty

### MS/MG/6

Tungsten carbide tip for marking on hard materials. Permanent magnet on the other end for picking up small metal parts

### MS/P/3

Scriber point is held by a knurled chuck and can be reversed when not in use

### MS/ST/9

Double ended – combining a needle point with a chisel end

MS/7 - Double ended with one straight point and one point bent at 90°

MS/H/8 - Double ended heavy duty with one straight point, the other bent at 90°

| Overall Length | Model No. | Code No. | Price \$     |

| 3"        | CS/2      | 231322   | 63.73    |

## Engineer's Precision Squares

Hardened spring steel blades are permanently fixed to the stock by means of tapered self-locking rivets which ensure complete rigidity. Both the blade and stock are precisely ground to ensure straightness and parallelism.

- Internal and external squareness as per BS939 Grade B

STM

| Blade Length (in.) | Model No.    | Squareness | Code No. | Price \$ |

Set 1 contains one each of 2", 3", 4" and 6" Squares  
Set 2 contains one each of 2", 4" and 6" Squares

## Magnetic Cylinder Square

- Designed to easily check squareness on component parts
- Base is perpendicular to shaft within 0.0001" over the length of the square. Magnetic base eliminates clamping distortion and speeds set-up
- Manufactured from steel selected and normalized to insure stability and uniformity

## Rockwell Type Hardness Tester

- For testing the hardness of various materials to determine the Rockwell hardness to scales A, B, and C
- Unit is designed with mechanical loads for precise hardness readings
- Conform to the requirements of ASTM E18, ISO 6508-2, and GB/T 230.2 standards
- Readings provided to a minimum resolution 0.5HR

### Standard Accessories:

- Diamond cone penetrator 1pc
- V-notch anvil 1pc
- Small flat anvil 1pc
- Large flat anvil 1pc
- Rockwell standard 5pcs
- 1/16" steel ball penetrator 1pc
- Instruction manual 1pc

| Range                            | Test Force                            | Test Height | Throat Depth | Code No. | Price \$ |

## Impact Hardness Tester

### Features:

- Used for determining the hardness of ferrous and non-ferrous metals
- Hardness is displayed in an "L" value that can be converted into Brinell, Rockwell, Vickers, and Shore Hardness

### Specifications:

- Range: 330-890HL
- Impact capacity: 11 Nmm
- Testing direction: Arbitrary
- Power: DC 6.0 V
- Mass of impact body: 5.5g
- Diameter of carbide ball: 3mm

## Profile Projector — PH-A14

Mitutoyo

### High Performance

- Mitutoyo's lens technology and workmanship unite to provide a bright, crisp image for error free inspection
- The PH-14's generous XY workstage travel (8x4) provides users with ample range to cover application needs
- The workstage provides high accuracy and can handle a workload of up to 100lbs

### Affordability

- Our customer's will benefit in acquisition savings from Mitutoyo's Global manufacturing strength and efficiency. We have brought together proven quality components and combined them to produce for our customers our new PH-14 optical comparator

### Flexibility

- Mitutoyo has designed the PH-14 for your toughest in-process, shop floor, or quality room inspection needs
- A wide variety of lens, magnifications and other accessories are available to fit your every measuring need

CALL OUR ORDER DESK FOR PACKAGE PRICING!

FIVE YEAR MFG. WARRANTY

Save Time. Save Money. Save Now!

### Absolute AT715 Linear Scales

- Absolute electro-magnetic induction system achieves IP67 rating to resist the harshest contamination found in machine tool environments
- Patented ABSOLUTE technology system detects and outputs an absolute position - no reference point setup needed at every power-on
- Scale position detection is not affected by electric noise such as power spike, brown out or power-off
- Water and splash-proof signal cable connector for easy installation and maintenance

### KA Display Counter

- High cost performance 2 axis counter with many standard functions
- Can be used as "standard counter" or "lathe counter" by modifying parameters
- Selectable resolution

IP67

Choose from these popular sizes, or call us for many other custom size options to fit your application needs.

## 12" x 30" Knee Mill Package

Mitutoyo

### Package Contains:

- 174183A 2 Axis KA Counter
- 539805 12" AT715 Scale
- 539814 30" AT715 Scale
- Y axis bracket
- X axis screw kit
- Tray with arm

## 2-Way Steel Parallels — Matched Pairs

- Made of tool steel, hardened to 58-62 HRC and ground in matched pairs on two side
- Provides an economical alternative to 4-way ground parallels, when only two parallel sides required
- Size tolerance of the ground height is  $\pm 0.001"$  while being held to a total of 0.0001" between the pieces of a matched pair
- Total parallelism over the 6" length is 0.0001"

## 4-Way Steel Parallels — Sets of Matched Pairs

- Each set includes four pairs of parallels in the sizes shown
- Furnished in a wooden holder marked with sizes
- Parallel specifications same as for matched pairs of the same size

| Model No. | Pairs/Set | Size Range                               | Weight (lb) | Code No. | Price \$        |
|-----------|-----------|--|-------------|----------|-----------------|
| P4W-SET-A | 4         | 6x1/4x1/2, 6x1/4x3/4, 6x1/2x3/4, 6x1/2x1 | 6           | 251847   | <b>1,895.15</b> |
| P4W-SET-B | 4         | 8x1/2x1, 8x3/4x1, 12x3/4x1, 12x1x2       | 30          | 251848   | <b>4,135.40</b> |

## 4-Way Steel Parallels – Individual

- Hardened steel parallels are ground to such close tolerances on four sides that there is no need to buy matched pairs for many common uses
- Can be used individually or matched with any other individual 4-way parallel at any time
- Different sizes can be used together - for example a 6"x1/2"x1" can be used with a 8"x3/4"x1" on the 1" dimension
- Held to size  $\pm 0.00025"$  on four sides
- Adjacent sides within 0.0005" per square inch
- Opposite sides parallel within 0.0001" per 6 inches

| Model No.  | Length | Width | Height | Weight (lb) | Code No. | Price \$ |
|------------|--------|-------|--------|-------------|----------|----------|
| P-06025038 | 6"     | 1/4   | 3/8    | 1           | 251849   | 153.70   |

## 4-Way Steel Parallels – Matched Pairs

- Made of tool steel, hardened to 58-62 HRC and ground in matched pairs on four sides. For use where extra precision is required
- Pairs are matched in size on the width and height to a tolerance of  $\pm 0.0002"$  on 6", 8" & 12" lengths and 0.0003" for longer lengths
- Total parallelism, straightness over the full length and size tolerance between pieces of a matched pair is 0.0001" on 6" & 8" lengths, 0.0002" on 12" lengths & 0.0003" on longer lengths
- Adjacent ground sides are square with each other within 0.0004", except the 6"x1/4"x3/4", 6"x1/4"x3/8" and 6"x1/4"x1/2" sizes, which are square within 0.0005"

| Model No.    | Length | Width | Height | Weight (lb) | Code No. | Price \$ |

## Tool Steel Straight Edges

- Extremely accurate reference line
- Can be used for checking surfaces for straightness
- Precision ground and finely finished
- Perfect for drawing or scribing straight lines
- Graduated & non-graduated models available
- Straight within 0.0005" per foot

| Model No.                           | Length | Width   | Thickness | Weight (lb) | Code No. | Price \$ |

## Cast Iron Straight Edges

- Made of stress-relieved, cast iron for maximum stability
- Cored and ribbed for increased rigidity and reduced weight
- Top and bottom faces are precision ground parallel and straight to within 0.0001" per 12"
- Use for setting up and leveling machinery and equipment and for checking the flatness of surfaces or scribing
- Also can be used for positioning above and parallel to a surface

## Precision 1-2-3 Blocks

- These blocks are very useful in mounting work for precision grinding, layout work, etc.
- Blocks are hardened to 58-60 HRC and ground to surface finish 6-10 micro inches
- Tolerances are guaranteed to 0.0001" for squareness per inch
- 0.0002" for parallelism
- Blocks are matched and measure 1" x 2" x 3"

| Description | Code No. | Price \$ |
|-------------|----------|----------|
| 2 Piece set | 230876   | 57.70    |

## 1-2-3 or 2-4-6 Blocks

- Heat treated and case hardened to 55-60 HRC
- Precision ground and case hardened
- Squareness of all sides is within 0.0001"
- Parallel Accuracy 0.0003"
- Surface finish 6-16 micro inches
- 23 holes-5 are tapped in 3/8-16
- Supplied in pairs

| Size  | Description    | Code No. | Price \$ |
|-------|----------------|----------|----------|
| 1-2-3 | 23 Holes       | 230870   | 31.24    |
| 2-4-6 | 23 Holes       | 230872   | 239.48   |
| 1-2-3 | No Hole (Pair) | 230874   | 39.57    |

## Precision Tri Blocks

- Hardened steel, ground on all six sides
- Available as single blocks or in matched pairs, per chart below
- B-123-H1-M has one 1/2" through hole in 2" x 3" face
- 11-hole models have 5/16-18 tapped holes
- 23-hole models have 3/8-16 tapped holes
- All models, except PB123, come with fitted, wooden box
- B-123-H11-M, B-123-H23M, B-234-H23-M & B-246-H23-M have drilled, counter-bored and tapped holes to allow screw mounting and conversion into angle plates and other precision set-ups

| Model No.   | Single or Pair | Holes | Square        | Flat & Parallel | Size                           | Weight lbs | Code No. | Price \$ |

## Engineers Black Book — 3rd Edition — Imperial Edition

The all new 3rd Edition has been released with 40% more page content. Full Colour - Pocket Sized - Lay Flat Format - Highly Durable - Anti-Grain. Easy to use Pocket Book contains a wealth of up to date, useful, practical, and hard to find information.

- Tables
- Standards
- Grind Wheel
- Conversion Factors
- Bolts & Nuts
- Formulae
- Tapers
- Keys and Keyways
- Tapping Drill Sizes
- Speeds and Feeds
- Tolerances
- G Codes
- Spur Gear Calculations
- Engineering Drawing Standards
- Hardening and Tempering
- Geometrical Construction
- Sharpening Information
- Illustrations
- Lubricants-Coolants
- Plastics
- Weights of Metals
- Equivalent Charts
- Tungsten Carbide

Free set of self-adhesive bookmarking tabs

## Pocket Reference Book — 4th Edition

Information for do-it-yourselfers, engineers, craftsmen, students, teachers, managers, maintenance & industrial personnel, and travelers. The ultimate reference and problem solver. The uses for this book are endless! 864 pages of valuable information in an easy to use pocket reference book. 3.2" x 5.4" x 0.8"

- Automotive
- Steels & Metals
- Electrical
- Tools
- Weights & Properties of materials
- Geology
- Math
- Welding
- Conversion tables
- and much more

## The Machinery's Handbook Latest Edition

Celebrating nearly 100 years as "The Bible of the Mechanical Industries", the latest edition brings together volumes of knowledge, information and data gathered, revised and improved upon from experts throughout the mechanical industries. Extraordinarily comprehensive yet easy to use since it premiered, Machinery's Handbook provides mechanical and manufacturing engineers, designers, draftsmen, toolmakers, and machinists with a broad range of material, from the very basic to the more advanced. It has always, and continues to provide industry fundamentals and standards while it moves into the 21st century with material reflecting technological advances and offering vast editorial improvements, making this latest edition the best tool...ever!

Offering interactive math, the new latest edition CD continues to combine the complete contents of the Handbook with the power, versatility, and convenience of Adobe PDF. These compact files can be viewed, navigated, and printed exactly as they appear by anyone with Adobe Acrobat Reader, which is included free on this disk. Now more than ever the CD combined with print edition is the most powerful tool you'll need to easily and effectively perform your job!

‡ Not DIN Coolant

## BT40 DIRECT COOLANT End Mill Holders

### NOW 3 COOLANT OPTIONS ALL IN ONE!

- Coolant through the spindle
- DIN coolant through flange option
- Coolant through the body
- All ground body, bore, nose, flange
- TIR, 0.0001" / 0.003mm OD to ID
- AT2 Taper Accuracy
- Certified Steel
- RFID chip hole

**DIRECT COOLANT**

**PREMIUM BALANCE**  
**G6.3 at 30,000rpm**  
**CERTIFICATE INCLUDED**

## Blank Bars

Blank bars are suitable for all applications, including deep boring. While the tapers are ground and hardened, the projections are not.

- Traverse ground shank to obtain optimum accuracy
- Meets or exceeds ANSI specifications
- Material to be machined - SNMC 415H

| Taper             | L  | D    | Code No. | Price \$ |

## Milling Machine Arbors

### For 30-40-50 National Standard Taper Spindles

Milling Machine Arbors are made of top quality one piece forgings. Carefully heat treated and surfaces ground with extremely narrow tolerances assure a rigid setup and accurate machining operations. All threads are ground. Arbors are equipped with assorted width solid spacers and necessary running bushings with standard keyways and threaded arbor nut.

Drawbar Threads for #30 Taper - 1/2" - 13

Drawbar Threads for #40 Taper - 5/8" - 11

Drawbar Threads for #50 Taper - 1" - 8

## ER Spring Collet Dimensional Data

ER collet system is made of special elastic steel material under excellent heat treatment and precise grinding process, so it has precise accuracy, powerful clamping ability, and is durable. This collet can clamp for a specific standard size and its next size. It can be widely used for boring, milling, drilling and tapping as well as for grinding operation, and is available for all sizes.

| Type | A (mm) | B (mm) | L (mm) | øD (mm) | DIN 6343 Precision | GS Precision |
|------|--------|--------|--------|---------|--------------------|--------------|
| ER11 | 11.5   | 18     | -      | 0.5-7   | 0.02               | 0.010        |
| ER16 | 17     | 27     | 6      | 0.5-10  | 0.02               | 0.010        |

## Mounting Instructions for ER Collets

- Place collet inside nut and rotate the nut to engage with the extractor spiral in collet groove
  - Only then mount nut and collet together into the collet holder or machine spindle
- Note: Never use a 11-12mm collet to clamp a 12mm diameter, but rather use a 12-13mm collet

Introducing...

## EXTREME PRECISION 5 MICRON COLLETS

Nothing else compares.

DIN 6343 Precision Collets have a runout of 20-30 microns (0.02 - 0.03mm)  
 GS High Precision Collets have a runout of 10-20 microns (0.01 - 0.02mm)  
 The new **GS Extreme Precision AA Collets** have a runout of only 5 microns (0.005mm)

### Features & Benefits:

- 16 slots allows sufficient collapse while increasing the area of contact with less tendency to distort
- All edges are deburred and rounded to promote good interface with the taper of the chuck without the tendency to damage it. This results in more consistent repeatability
- Collets are polished to eliminate blemishes that promote corrosion. Better corrosion resistance will result in longer product life of both the collet and the holder between the collet and the cutting tool shank
- Minimized variation of cutting edges
- Maximized Concentricity
- Evenly distributed cutting edges for high performance machining
- Highly polished OD surfaces reduce the amount of force absorbed by friction between the collet and the collet chuck seat, increasing the grip force on the cutting tool. The inside bore of the collet is intentionally left unpolished to increase the friction
- Improve system performance and lower cost per piece when used with quality GS chucks
- Consistent cutting profiles ensure the job stays within desired tolerances

The result of an improved AA collet in a quality GS chuck is increased gripping force, improved rigidity, decreased runout, and a renewed confidence in your collet chuck system.

## ER11 Collets

Our ER collet system is made of special alloy steel material under excellent heat treatment and precise grinding process, so it has precise accuracy, powerful clamping ability, and is durable. This collet can clamp for a specific standard size and its next size. It can be widely used for boring, milling, drilling and tapping as well as for grinding operation, and is available for all sizes.

- Size range: 0.5mm - 7mm (0.019" - 0.275")
- ER11 collets collapse approximately 1/64" with full accuracy

AA Collets have a runout of only 5 microns (0.005mm)

- See page G21 for Dimensional Data

## ER16 Collets

Our ER collet system is made of special alloy steel material under excellent heat treatment and precise grinding process, so it has precise accuracy, powerful clamping ability, and is durable. This collet can clamp for a specific standard size and its next size. It can be widely used for boring, milling, drilling and tapping as well as for grinding operation, and is available for all sizes.

- Size range: 0.5mm-10mm (0.019" - 0.393")
- ER16 collets collapse approximately 1/32" with full accuracy

REGULAR

AA Collets have a runout of only 5 microns (0.005mm)

## ER20 Collets

Our ER collet system is made of special alloy steel material under excellent heat treatment and precise grinding process, so it has precise accuracy, powerful clamping ability, and is durable. This collet can clamp for a specific standard size and its next size. It can be widely used for boring, milling, drilling and tapping as well as for grinding operation, and is available for all sizes.

REGULAR

- Size range: 1mm - 13mm (0.039" - 0.511")
- ER20 collets collapse approximately 1/32" with full accuracy

AA Collets have a runout of only 5 microns (0.005mm)

## ER25 Collets

Our ER collet system is made of special alloy steel material under excellent heat treatment and precise grinding process, so it has precise accuracy, powerful clamping ability, and is durable. This collet can clamp for a specific standard size and its next size. It can be widely used for boring, milling, drilling and tapping as well as for grinding operation, and is available for all sizes.

AA Collets have a runout of only 5 microns (0.005mm)

## ER25 Tap Collets

- For synchronous, rigid tapping operations using ER collet chuck
- Collet bore is exact tool diameter with square drive for accuracy and rigidity

## ER32 Collets

Our ER collet system is made of special alloy steel material under excellent heat treatment and precise grinding process, so it has precise accuracy, powerful clamping ability, and is durable. This collet can clamp for a specific standard size and its next size. It can be widely used for boring, milling, drilling and tapping as well as for grinding operation, and is available for all sizes.

AA Collets have a runout of only 5 microns (0.005mm)

## ER32 Tap Collets

- For synchronous, rigid tapping operations using ER collet chuck
- Collet bore is exact tool diameter with square drive for accuracy and rigidity

## ER40 Collets

Our ER collet system is made of special alloy steel material under excellent heat treatment and precise grinding process, so it has precise accuracy, powerful clamping ability, and is durable. This collet can clamp for a specific standard size and its next size. It can be widely used for boring, milling, drilling and tapping as well as for grinding operation, and is available for all sizes.

AA Collets have a runout of only 5 microns (0.005mm)

## ER50 Collets

Our ER collet system is made of special alloy steel material under excellent heat treatment and precise grinding process, so it has precise accuracy, powerful clamping ability, and is durable. This collet can clamp for a specific standard size and its next size. It can be widely used for boring, milling, drilling and tapping as well as for grinding operation, and is available for all sizes.

- ER50 collets collapse approximately 5/64" with full accuracy

| Size (mm)       | Size (in.)         | Code No. | Price \$      |

## ER40 Tap Collets

- For synchronous, rigid tapping operations using ER collet chuck
- Collet bore is exact tool diameter with square drive for accuracy and rigidity

## CAT Taper SA High Precision Collet Chucks

- DIN coolant through the flange at no extra charge
- Run out accuracy is > 5µm at 4xD of the cutting tool shank
- 8° tapered collet seats deeper in the body of the holder providing increased rigidity. This results in concentricity and stronger gripping power
- Wrench not included
- AT2 Taper Accuracy
- RFID chip hole

## CAT Taper TG Collet Chucks

- DIN coolant through the flange
- Shank traverse ground to obtain optimum accuracy
- Meets or exceeds ANSI specifications
- Wrench not included
- Factory balanced to save spindle life, tool life and increased productivity
- Threaded through holes for a back-up screw (tool stop) or coolant through when removed
- TIR, 0.0006"
- AT2 Taper Accuracy
- RFID chip hole

**PREMIUM BALANCE**

## TG75 Standard & Sealed Collets

- 1/64" collapse per collet
- 0.0005" in TIR precision per DIN 6341
- 80 ft/lbs maximum tightening torque

### Sealed Collets

- Sealed for coolant-through applications
- Pressure resistance tested to 1000 psi
- Sealed with rubber

## TG100 Tap Collets

- For synchronous, rigid tapping operations using TG collet chuck
- Collet bore is exact tool diameter with square drive for accuracy and rigidity

\*ss = small shank  
\*LS = large shank

## Standard TG100 Collet Sets

- 1/64" collapse per collet
- 0.0005" in TIR precision per DIN 6341
- 90 ft/lbs maximum tightening torque

| No. of Pieces | Range (in.) | Increment (in.) | Code No. | Price \$        |

• See page G38 for Dimensional Data

## TG150 Standard Collets

- Unique 8" taper design affords highest gripping power
- True double angle, for extreme concentricity
- 16 jaws giving powerful gripping and parallel clamping
- A unique self releasing system is built into the collet and clamping nut to eliminate cutting tools sticking in collets
- 1/64" collapse per collet
- 0.0005" in TIR precision per DIN 6341

## Standard TG150 Collet Sets

- Unique 8" taper design affords highest gripping power
- True double angle, for extreme concentricity
- 16 jaws giving powerful gripping and parallel clamping
- A unique self releasing system is built into the collet and clamping nut to eliminate cutting tools sticking in collets
- 1/64" collapse per collet
- 0.0005" in TIR precision per DIN 6341

## CAT40 Milling Chucks

- DIN coolant through the flange at no extra charge
- Rough milling or 'hogging' operations
- Improved tool life over regular end mill holders
- '360°' gripping contact
- Extreme rigidity over taper collets
- TIR, 0.0002"
- AT2 Taper Accuracy
- RFID chip hole

## CAT40 DUAL CONTACT Milling Chucks

- Improves rigidity and reduces vibration allowing for increased feed rates and increased tool life
- DIN coolant through the flange at no extra charge
- Rough milling or 'hogging' operations
- '360°' gripping contact
- Improved tool life over regular end mill holders
- Extreme rigidity over taper collets
- TIR, 0.0002"
- RFID chip hole
- AT2 Taper Accuracy

# BALANCEABLE SHRINK FIT TOOLING

Requires a balancing machine

## Features and Benefits

- With threaded holes on holders over 6mm I.D. in order to balance.
- Improved concentricity.
- Improved balance design with no moving pieces.
- Low Centrifugal Forces due to low holder mass.
- Maximum gripping power with exceptional concentricity.
- Concentricity 0.0001"/0.003mm
- Chip load distributed evenly along cutting edge of tool which results in longer tool life.
- Constructed of H13 Tool Steel for exceptional durability and cycle life. With proper use, toolholder life should exceed that of standard end mill holders.
- Tool is gripped 360° along the entire length of bore resulting in an evenly distributed clamping force.
- Short projections are possible because no mechanical clamping devices are used. This results in greater rigidity and resistance to bending.
- Simple and fast to use. The total time elapsed to remove one cutting tool and insert another is less than 10 seconds.
- Through-spindle coolant capability.
- Coolant through holders require no special backup screws or seals. The fit between the I.D. of the tool holder and cutting tool shank forms the seal, preventing the coolant from flowing anywhere else except through the coolant ports. Coolant ports can be closed with a 3mm set screw. The use of Heat Shrink Tooling allows for greater speeds and feeds, better finishes, increased tool life, and increased productivity due to its High Speed Machining capability and simplicity of use.
- Note: No coolant ports or threaded balance holes on holders under 6mm I.D.

WITH 4 COOLANT PORTS

## CAT40 Shrink Fit Holders With Coolant Ports

- Holders are balanceable with a balancing machine
- Balanced to G2.5 at 30,000rpm
- 4 threaded Coolant ports in the nose, can be closed with a 3mm set screw
- Maximum gripping power with exceptional concentricity
- TIR ≤0.0001" / 0.003mm
- AT2 Taper Accuracy
- Tool is gripped 360° along the entire length of bore resulting in an evenly distributed clamping force
- Material: H13 Tool Steel
- The hot hardness (hot strength) of H13 resists thermal fatigue cracking which occurs as a result of cyclic heating and cooling cycles
- RFID chip hole

## CAT50 Shrink Fit Holders With Coolant Ports

- Holders are balanceable with a balancing machine
- Balanced G2.5 at 30,000rpm
- 4 threaded Coolant ports in the nose, can be closed with a 3mm set screw
- Maximum gripping power with exceptional concentricity
- TIR ≤0.0001" / 0.003mm with tool shrunk in holder
- AT2 Taper Accuracy
- Tool is gripped 360° along the entire length of bore resulting in an evenly distributed clamping force
- Material: H13 Tool Steel
- The hot hardness (hot strength) of H13 resists thermal fatigue cracking which occurs as a result of cyclic heating and cooling cycles
- RFID chip hole

## HSK100A Shrink Fit Holders With Coolant Ports

- Holders are balanceable with a balancing machine
- Balanced G2.5 at 30,000rpm
- 4 Coolant ports in the nose
- For maximum gripping power with exceptional concentricity
- TIR of  $\leq 0.0001'' / 0.003\text{mm}$  with tool shrunk in holder
- AT2 Taper Accuracy
- Tool is gripped 360° along the entire length of bore resulting in an evenly distributed clamping force
- Material: H13 Tool Steel
- The hot hardness (hot strength) of H13 resists thermal fatigue cracking which occurs as a result of cyclic heating and cooling cycles
- RFID chip hole

## DRIVEN TOOLS

**2 Year Warranty**  
(against manufacturer defects)

### Main Technical Features

- Main body designed to maximize rigidity and reduce vibration
  - Specially treated corrosion resistant steel body
  - Angular contact bearings + taper roller bearings on output spindle for better rigidity and longer life
  - Gleason spiral bevel gears with completely ground involute form
  - Internal coolant option
  - Designed, manufactured and assembled in Italy
  - 2 Year warranty against manufacturer defects
- ▼ Direction of rotation is opposite to the machine spindle  
 ▼ Direction of rotation is the same as the machine spindle

ANGLE HEADS

ATC Series

### Designed for Automatic Tool Change Machines

#### Design

The compact design, along with mentioned specifications allows for the highest performances, high speeds and long tool life

Case Hardened and ground shank and shaft

Positioning pin with automatic release

Modular anti-rotation group

Standard 10Bar coolant through pin

Graduated ring

Treated steel head body with 360° position and internal air pressure, maximum rigidity and corrosion resistant. Minimum thermal expansion

#### Output

- ER Collet (Standard)
- Weldon
- Shell mill holder
- Special

Angular contact preloaded ball bearings of precision class ABE 7/9

Gleason ground spiral bevel gears for maximum performance and minimum vibration

Tool Holding

## CAT Taper Tension/Compression Tap Holders

- Quick-change - push back on the holder sleeve and the adapter with tool is removable
- Press on the end of the adapter nose and the tool is removable - all in a few seconds
- Smooth stroke - even under full torque load, the tension-compression stroke is full and free
- Interchangeability - our adapters and holders are interchangeable with Universal-Bilz quick change holders and adapters
- AT2 Taper Accuracy
- RFID Chip Hole

## HSK Rigid Tap Holders

- Quick-change - push back on the holder sleeve and the adapter with tool is removable
- Press on the end of the adapter nose and the tool is removable - all in a few seconds.
- Interchangeability - our adapters and holders are interchangeable with Universal-Bilz quick change holders and adapters
- AT2 Taper Accuracy
- RFID Chip Hole

## Straight Shank Tension/Compression Tap Holders

- Straight shank tooling may be used to extend tooling reach for extended length operations
- This option is less costly than extended length integral shank tooling
- They may be used with any size machining centre or lathe
- When loaded into larger holders, their reduced O.D. permits tapping applications within large holes or whenever tight clearances are encountered

## Torque Control Tap Collets & Sets

### Tap System #1

- Tap Collets are fully compatible with Bilz System #1. Size Range: #0 - 9/16" hand tap and 1/8" pipe tap

### Tap System #2

- Tap Collets are fully compatible with Bilz System #2. Size Range: 5/16" - 7/8" hand tap and 1/4" - 1/2" pipe tap

### Tap System #3

- Tap Collets are fully compatible with Bilz System #3. Size Range: 1/2" - 1-3/8" hand tap and 3/4" - 1" pipe tap

## Positive Drive Tap Collets, Reducers & Sets

### Tap System #1

- Tap Collets are fully compatible with Bilz System #1. Size Range: #0 - 9/16" hand tap and 1/8" pipe tap

### Tap System #2

- Tap Collets are fully compatible with Bilz System #2. Size Range: 5/16" - 7/8" hand tap and 1/4" - 1/2" pipe tap

### Tap System #3

- Tap Collets are fully compatible with Bilz System #3. Size Range: 3/8" - 1-3/8" hand tap and 1/2" - 1" pipe tap

## SYNCHROLIZE TAPPING SYSTEM FOR RIGID TAPPING

The Synchronize system has 0.008" of compensation in compression and 0.039" of compensation in tension.

- The Synchronize tapping chuck is the better solution, it gives you the possibility to work with axial compensation
- Tap capacity: M3-M12, M6-M20, M14-M33
- Triple life of tap in comparison to a traditional tapping system
- Quick change of the tap and of the adapter
- Suitable for rigid tapping with micro compensation
- Uses ER Tap Collets full and free
- Up to 9" of gauge length can be obtained when using the extension system
- No need for tap collets due to the opposing set screws in the tap adapters

### CAT Taper Synchronize Tap Chucks

- Slim nose design
- Up to 200% increase in tap life

| Taper | Tap Range Hand | System | Nose Dia. (in.) | Gauge Length (in.) | Code No. | Price \$ |
|-------|----------------|--------|-----------------|--------------------|----------|----------|
| CAT40 | #0 - 1/2       | 1      | 1.693           | 2.087              | 531610   | 717.91   |
| CAT40 | 3/8" - 3/4     | 2      | 2.323           | 2.874              | 531614   | 892.45   |

## SYNCHROLIZE EXTENSION SYSTEM

Up to 9" of Gauge Length

### Synchronize Tap Adapter Bodies

| System | Length Added | Code No. | Price \$ |
|--------|--------------|----------|----------|
| 1      | 5mm          | 338132   | 423.55   |
| 2      | 7mm          | 338134   | 486.08   |

### Synchronize Terminals

| System | Tap Range  | Collet Style | Length | Code No. | Price \$ |
|--------|------------|--------------|--------|----------|----------|
| 1      | #0 - 1/2   | ER16         | 50mm   | 338138   | 438.37   |
| 2      | 3/8" - 3/4 | ER25         | 79mm   | 338140   | 448.33   |

### Synchronize Extensions

| System | Length | Code No. | Price \$ |
|--------|--------|----------|----------|
| 1      | 25mm   | 338144   | 114.68   |
| 1      | 50mm   | 338146   | 134.64   |
| 2      | 50mm   | 338148   | 174.38   |
| 2      | 100mm  | 338150   | 199.31   |

### Synchronize Assembly Supports

| System | Code No. | Price \$ |
|--------|----------|----------|
| 1      | 338156   | 209.29   |
| 2      | 338158   | 229.23   |

## Sowa High Performance Taps

For tough materials,  
stainless steels and  
aluminum.

See Chapter C

## BIG Accu-Tapper Reversing Type

Designed with Reversing Mechanism for Use on Non-reversing Spindles

- Equipped with safety clutch to prevent tap breakage in case of overload; provides smooth transition and rapid change from forward to reverse
- Axial float assures smooth tapping and guards against breakage and cross tapping
- Guaranteed depth control to  $\pm 0.1\text{mm}$  ( $\pm 0.004''$ )
- JACOBS RUBBER FLEX COLLETS are standard accessory.

## Mini Arm Type Air Tapping Unit — VAT-712

- Air tapping spindle
- Parallel arm
- Table mounting column
- Air combination
- 6 ANSI Tap Collets #10-1/2"
- Radial jib
- Air pressure: 6~8 kgs/cm<sup>3</sup>
- Air Cylinders included
- Requires: 5HP compressor
- Without stand plate

\* Base not included

| Tap Range | Speed RPM | Work Range | Weight (kg) | Code No. | Price \$ |
|-----------|-----------|------------|-------------|----------|----------|

## Small Arm Type Air Tapping Unit — VAT-1412

- Air tapping spindle
- Parallel arm
- Table mounting column
- Air combination
- 6 ANSI Tap Collets #10-1/2"
- Radial jib, increases arm reach by 500mm
- Air pressure: 6~8 kg/cm<sup>3</sup>
- Air Cylinders included
- Requires: 5HP compressor
- Without stand plate

\* Base not included

| Tap Range | Speed RPM | Work Range                | Weight (kg) | Code No. | Price \$ |

# DRILL CHUCKS

HIGH PRECISION

PREMIUM TOLERANCE

TIN COATED JAWS FOR IMPROVED LIFE

GS Keyless Drill Chucks designed to achieve the highest accuracy and rigidity possible

GS Super Heavy Duty Ball Bearing Drill Chucks are made to the highest tolerances in the market

## CAT Taper Integral Keyless Drill Chucks

These chucks provide exceptionally high torque - up to three times the gripping strength of conventional drill chuck / taper holder combinations. The design eliminates any possibility of chuck / holder misalignment, and it assures separation safety.

- High precision, premium tolerance
- The jaws feature a TiN coated surface treatment to assure durability
- AT2 Taper Accuracy
- RFID Chip Hole

| Taper | Cap. | L     | L1    | D    | Code No. | Price \$      |

## Super Heavy Duty Ball Bearing Drill Chucks

GS Ball Bearing Chucks are specially designed for HEAVY DUTY drilling applications on production drilling machines, jig borers, milling machines, lathes and radials. The ideal choice for those jobs that require close tolerance drilling. The ball thrust bearing reduces friction in the chuck's closing mechanism, so the operator can apply more gripping power on the twist drill shank.

- High precision, premium tolerance

| Chuck Model | Capacity (in.) | Mount | Code No. | Price \$      |
|-------------|----------------|-------|----------|---------------|
| 13BXH       | 3/64-1/2       | JT6   | 536500   | <b>76.40</b>  |

## Plain Bearing Drill Chucks

GS Plain Bearing Chucks are specially designed for stationary drilling, turning, milling, and woodworking machines.

- Sleeve design eliminates the possibility of tooth breakage
- Hardened jaws and body help to avoid wear and lengthen the life of the chuck
- Each chuck supplied with a key

| Chuck Model | Capacity (in.) | Mount | Code No. | Price \$     |
|-------------|----------------|-------|----------|--------------|

| Fits 5/8" chucks | 534431   | <b>13.88</b> |

## Super Precision Keyless Drill Chucks

Keyless chucks are engineered to quickly loosen and tighten a tool on the chuck collar of the drill, either by manual operation or when torque is applied. Rotating the chuck collar in a counterclockwise direction will loosen the tool.

- High precision, premium tolerance
- The jaws feature a TiN coated surface treatment to assure durability

## Jacobs Plain Bearing Geared Key Chucks

- Exceptionally high accuracy, gripping power and durability
- Wide range of capacities for use on threaded and taper-mounted spindles
- Jaws treated to ensure thread life and high gripping surface hardness

## Jacobs Ball Bearing Key Type Super Chucks

Extra accuracy, extra gripping power, for extra heavy duty work.

The ball bearing super chuck is especially designed for EXTRA HEAVY DUTY drilling applications on production drilling machines, jig borers, milling machines, lathes and radials. The ideal choice for those jobs that require close tolerance drilling. The ball thrust bearing reduces friction in the chuck's closing mechanism, so the operator can apply more gripping power on the twist drill shank.

## Jacobs Arbors & Adapters

Always specify Jacobs arbors to serve the finest performance from Jacobs drill and tap chucks. They are precision ground to our master gauges and guarantee the finest possible accuracy and fit.

### When Ordering Arbors

Any of the following is correct; Show style and size of the mounting shank and the model number of the Jacobs chuck to which the arbor will be fitted.

Example: A #2 Morse taper shank arbor for #34 Jacobs chuck.

Show the style and size of the mounting shank plus the actual Jacobs taper desired.

Example: A #2 Morse taper shank with a #3 Jacobs taper.

Simply use the part number price in the standard arbor charts shown below.

Example: One #610153 Jacobs chuck arbor

Bridgeport to Jacobs Taper

Morse Taper to Jacobs Taper

Straight Shank to Jacobs Taper

## High Precision Industrial Keyless Chucks

Precision design combines keyless operation with the ultimate in drill chuck accuracy.

- Precision tested and certified to 0.0016" TIR or better
- All components exposed to wear are completely hardened to maintain accuracy and extend chuck life
- Permits use on a wide range of high accuracy drill presses, jig borers, milling machines and production drilling equipment
- Self-tightening feature automatically increases gripping force proportional to increased torque to prevent tool shank slippage
- For general machining applications

## High Torque/High Precision Industrial Keyless Chucks

- Furnished with milled wrench flats and spanner wrench to allow the application of supplementary gripping torque
- Light tightening increases gripping torque up to 3 times higher than hand tightening
- Resists tool loosening on high speed machines with right hand rotation and instant spindle stop

## Jacobs Tap Chucks

Complete range of flexible collet tap chucks for tapping machines and portable tappers. Simplify tap changing and provide unmatched accuracy.

- Designed for use with the versatile Jacobs® Rubber-Flex® collet which accepts and precisely centers both decimal and metric shank diameters
- Simple operation – one quarter turn of chuck screw allows nut to disengage back jaws
- Tap shank sighting hole presents full view of tap square during changeovers
- Each chuck, with one interchangeable Rubber-Flex® collet, handles a wide range of tap sizes to speed tap size changes
- Positive-drive chuck jaws always locate square of tap shank to ensure superior performance
- Available with choice of Jacobs®, round or square hole mounts

## Jacobs Die Grinder Chucks

Compact tap chuck designed for use with Rubber-Flex® Collets holds mounted grinding burrs and rotary files on pneumatic and electric die grinders.

- Compact design facilitates use for a wide range of applications
- Integral seal protects collet components from abrasives and swarf
- Rubber-Flex® Collets furnished separately for tools with collet seating cones built into spindles

## Rubber-Flex® Collets

Unique in design and operation, the Jacobs® Rubber-Flex® Collet can generate two to three times the gripping power of a conventional split-steel collet.

- Parallel jaw insert surfaces exert uniform, accurate gripping force up to three times greater than can be achieved with split-steel collets
- Each collet accepts and precisely centers a wide range of both decimal or metric diameters (within individual capacity ranges) to speed setups and increase machining productivity
- Durable one-piece construction
- Synthetic rubber retains flexibility and resists deterioration from heat, coolants and cutting compounds
- Steel jaw inserts precision ground (after molding process) to assure maximum gripping accuracy (parallelism)
- Hardened for greater wear resistance than split-steel collets
- Each collet bore is held concentric to the O.D. tapers, both front and back, to minimize TIR
- Automatically seals tool O.D. to permit coolant flow through tool reducing wear
- Seals collets and machine spindles to protect from abrasive particles and swarf

## Rubber-Flex® Collets vs Conventional Collets

### Oversized Bar

Conventional split-steel collets provide maximum gripping efficiency only at actual bored or nominal capacity.

### Undersized Bar

They lose parallelism when chucking bars even a few thousandths over or under this capacity. This significantly reduces gripping strength and accuracy.

### Rubber-Flex® Collet

Rubber-Flex® Collets exert uniform gripping pressure throughout the collet contact length (within individual collet capacity ranges) regardless of bar tolerance deviations

## Tap Chuck Collets

- Each collet accepts and precisely centers a wide range of both decimal or metric diameters to speed setups and increase machining productivity
- Synthetic rubber retains flexibility and resists deterioration from heat, coolants, and cutting compounds
- Steel jaw inserts precision ground to ensure maximum gripping accuracy, and hardened for greater wear resistance than split steel collets
- Seals collets and machine spindles to protect from abrasive particles and swarf

Jacobs®

## Lathe Chuck Collets

- Each collet accepts and precisely centers a wide range of both decimal or metric diameters to speed setups and increase machining productivity
- Synthetic rubber retains flexibility and resists deterioration from heat, coolants, and cutting compounds
- Collets J910, J911 and J912 have a contact length of 0.90" (23mm)
- Steel jaw inserts precision ground to ensure maximum gripping accuracy, and hardened for greater wear resistance than split steel collets
- Seals collets and machine spindles to protect from abrasive particles and swarf
- All other lathe chuck collets have full length contact

## Hand-Tite® Keyless Drill Chucks

Increases operator productivity and convenience by speeding bit changeovers and eliminated downtime caused by loss of chuck keys.

- Keyless operation permits fast bit changes without lost key delays
- Superior gripping force provides high mechanical advantage to convert hand tightening torque into superior bit gripping force
- Ergonomic design increases hand tightening efficiency and user comfort

- Versatile models available to fit all 10mm (3/8") and 13mm (1/2") variable speed corded and cordless portable drills
- Precision operation by meeting or exceeding stringent DIN run-out and dimensional specifications
- Constructed of high performance materials to maximize durability and performance

## Adapt-A-Drive® Chuck

Converts any cordless screwdriver to a multi-purpose mini-drill for bit sizes up to 1/4".

- Easy conversion – integral hex mount locks the Adapt-A-Drive® chuck into the screwdriver bit socket
- Ideal for use in starting screw holes for use in hard-to-reach spaces

## Jacobs Drain Chucks

- Specifically designed for use with flexible coil spring tools
- Allows coil spring to pass through chuck
- Chuck may be hand tightened to secure coil spring at desired length transmitting tool rotation to shaft
- Ideal for soil pipe and sewer cleaning tools

\* Smaller, intermediate sizes primarily for hand-operated percussion drilling machines

\*\* With through hole for right and left hand rotation

## Rohm Ball Bearing Drill Chucks

- Bodies and jaws hardened and ground
- One piece gear/scroll ring eliminates loss of clamping torque
- Dependable and accurate performance
- Easy operation
- Extended life

## Rohm Chuck Keys

- Hand tools used to tighten and loosen screwed elements
- Manual tools are used for construction and repair work that requires simple execution with low energy use

## Rohm Supra Keyless Drill Chucks

- Self-tightening for higher clamping torque
- High percussion design
- All metal construction for extended life
- Jaws and bodies are hardened and ground
- Rapid clamping and releasing without use of a wrench

## Rohm Spiro Keyless Drill Chucks

### Design:

Pointed shape of sleeve, high runout precision 0.05mm, wearing parts are hardened.

### Usage:

Permanent self tightening action perfectly suitable for use with high speeds on drilling machines, machining centres and special drilling heads.

## Rohm Ejectors

- Taper drift
- Utensils designed to facilitate the use of the different measurement, calibration or tracing systems

| Rohm Id. No. | For Morse Taper | Length (mm) | Code No. | Price \$ |
|--------------|-----------------|-------------|----------|----------|
| 017076       | 1 & 2           | 140         | 391831   | 9.31     |
| 017077       | 3               | 190         | 391832   | 13.30    |
| 017078       | 4               | 225         | 391833   | 19.95    |
| 017079       | 5 & 6           | 265         | 391834   | 33.47    |

## Rohm Hand Ejectors

- Taper drift for one-hand-operation
- Utensils designed to facilitate the use of the different measurement, calibration or tracing systems

| Rohm Id. No. | For Morse Taper | Length (mm) | Code No. | Price \$ |
|--------------|-----------------|-------------|----------|----------|
| 317236       | 1-3             | 320         | 391836   | 114.37   |
| 317258       | 4-6             | 380         | 391837   | 138.32   |

## Rohm Extra-RV 80 Portable Keyless Drill Chucks

### Radial Locking

Keyless drill chucks in plastic or metal design with radial locking, for corded and cordless drills, for percussion drilling, with hexagon for assembling and disassembling on the machine spindle.

- No further locking when drilling and screwing, especially percussion drilling
- Very ergonomical, easy to handle, with metal nose piece
- With carbide inserts in the clamping jaws (size 13)
- For all drills with a maximum torque of 100Nm and up to 1500 W
- With through-hole for clockwise and anti-clockwise rotation (thread M5 and M6)
- The plastic parts carry the material description and can therefore be easily recycled
- If necessary, use maintenance spray

With Retaining Ring

### Metal Design Without Retaining Ring

## Type B CNC Toolholder Bushings

- Split style
- Shorter length
- Clamp on flat
- Bushing collapses to hold tool
- Used for drills, boring bars, and other tools

| Bushing Type | Dia. (A) | Bore (B) | Length Under Head (C) | Code No. | Price \$ |
|--------------|----------|----------|-----------------------|----------|----------|
| B            | 1-1/2"   | 1/2"     | 2-1/2"                | 470510   | 103.05   |
| B            | 1-1/2"   | 5/8"     | 2-1/2"                | 470511   | 103.05   |

## Universal Boring And Facing Masterhead

### Solve ALL Your Boring and Facing Problems

- Ideal for boring in a wide range of diameters
- Hardened and precision ground for long life and extreme accuracy
- Allows for multi-tool boring
- Suitable for precision boring of cylindrical holes and for machining of external cylindrical surfaces

## Principal Component Part of Head Vhu-36

- |  |   |
|--|---|
| 1. Braking ring                        | 10. Stop dog  |
| 2. Engaging ring                       | 11. Stop dog pin  |
| 3. Control ring                        | 12. Knob for rapid traverse control (only in Vhu 1-1/4) |
| 4. Scale                               | 13. Lubricator  |
| 5. Slide                               | 14. Screw for clutch adjustment                         |
| 6. Setting screw                       | 15. Clutch  |
| 7. Holes for tools                     | 16. Retaining rod                                       |
| 8. Clamping screws                     |   |
| 9. Screw for locking slide in position |   |

## Basic machining operations shown for the Vhu type universal boring heads:

1. Boring of holes
2. Spotfacing of small end large-diameter end faces
3. Recessing inside holes
4. Recessing on surfaces of parts
5. Free recessing
6. External diameter machining
7. Boring of tapered holes
8. External machining of taper
9. Facing of rear end faces
10. Thread cutting

## Precision Boring Heads

- Ideal for mill or jig bore operation
- These heads readily adapt to many different machines due to interchangeable shanks

| Head Dia. | Hole Size | Offset | Code No. | Price \$ |

## Height Presetter

**Fast Accurate Measurement of Vertical Height Magnetic Base for Horizontal Operation.**  
Reference point of work can be measured very quickly and accurately without damage to tool teeth.

| Size | Description      | Code No. | Price \$ |
|------|------------------|----------|----------|
| 4"   | Height Presetter | 337950   | 1,371.19 |

## Height Presetter — Optical Type

- Height 50mm
- With magnetic base
- The red lamp will light up when touched
- Accuracy 0.005 mm
- Combined vertical and horizontal in a unit
- Weight: 0.3 kg

| Model No.               | Code No. | Price \$ |
|-------------------------|----------|----------|
| HP-50ZM (Magnetic Base) | 337970   | 741.55   |
| HP-50Z (Standard Base)  | 337971   | 662.68   |

## Electronic Tool Length Setter

- High accuracy
- Easy operation
- Be sure to remove all chips and oil from the sensor plate and the base of the HP-50E as well as from the workpiece and tool
- To move the tool approaching the sensor plate slowly
- When touching, the "LED" turns on immediately and "H" is just 50.00 mm (or 2")
- LED will not function if batteries are not set in correctly
- Designed to be used on ferrous and non-ferrous materials

| Model No.                 | H      | Base Dia. | Sensor Plate Dia. | Code No. | Price \$ |

## Touch Point Sensor

**Model No. VPS-20**

- Red pilot can be seen clearly
- High sensitivity location sensor
- Location of end surface, outside circle dia., inside circle dia. of the workpiece for processing can be detected with full effect
- Whole travel of red pilot is illuminating, detecting also can be done during turning while spindle stops

| D  | d1 | d2 | L   | I1 | I2 | Type      | Code No. | Price \$ |

## Machinists' Mate

**Self-Contained Visual Aid - 1/2" Shank**

For Machine Set-Up

- Checks machine, tool and workpiece set-up
- Acts as edge finder on vertical milling machines
- Trams table quickly
- Parallels vise
- Checks "spindle run out" – simply, quickly, accurately
- Emits light to indicate precise contact of part at ±0.0001"

| Shank Dia. | Code No. | Price \$ |
|------------|----------|----------|
| 1/2        | 145600   | 55.28    |

## NC/CNC Trolley

Complete Tool Trolley with 4 Tool Trays and Inserts.

- Trays bolt in
- (w)1002mm x (D)650mm x (H)830mm
- Weight: 51kgs

| Desc.                            | Taper Type | Inserts Per Tray | Replacement Plastic Inserts Code No. | Price \$ | Tool Cart Code No. | Price \$ |
|----------------------------------|------------|------------------|--------------------------------------|----------|--------------------|----------|
| Trolley, 4 trays hold 28 inserts | 40         | 7                | 326986                               | 9.28     | 326985             | 1,176.75 |
| Trolley, 4 trays hold 20 inserts | 50         | 5                | 326996                               | 8.95     | 326995             | 1,176.75 |

## Standard Draw Bar — SDB-2J

- 7/16-20 thread
- 4140 heat treated Alloy Steel

| Machine Type                      | Bar Length (in.) | Hex Length (in.) | Code No. | Price \$ |
|-----------------------------------|------------------|------------------|----------|----------|
| 2J Head Bridgeport Variable Speed | 18               | 5.5              | 151700   | 114.44   |

## Deluxe Tool Setting Stand

Quick and easy way to change cutters and pull studs.  
Protects the taper of holder with protective insert.  
Available in all tapers.

- Select between horizontal or vertical tool holding; quick and simple operation
- For CAT, BT & NMTB Tapers

| Vertical | Horizontal                    | Code No. | Price \$ |
|----------|-------------------------------|----------|----------|
| 40 Taper | 40 Taper x 2 (only BT & NMTB) | 335250   | 992.35   |
| 50 Taper | 50 Taper x 2 (only BT & NMTB) | 335260   | 992.35   |
| 50 Taper | 50 Taper x 1 / 40 Taper x 1   | 335240   | 253.99   |
| 40 Taper | 50 Taper x 1 / 40 Taper x 1   | 335230   | 253.99   |

## Tool Holder Locking Device

- For CAT, BT & NMTB Tapers

| Description                    | Code No. | Price \$ |
|--------------------------------|----------|----------|
| 30 Taper                       | 335270   | 398.42   |
| 40 Taper                       | 335275   | 398.42   |
| 50 Taper (Only CAT50 & NMTB50) | 335280   | 398.42   |

## Tool Holder Locking Fixture

- Weight: 4.5 kg

| Description | Code No. | Price \$ |
|-------------|----------|----------|
| HSK63       | 335225   | 1,384.99 |

## Simple Tool Setting Stand

Quick and easy way to change cutters and retention knobs.  
Protects the taper of holder with protective insert.  
Available in all tapers.

- This is an excellent helping tool for simple, rapid and safe tool holding
- For CAT, BT & NMTB Tapers

| Model | Code No. | Price \$ |
|-------|----------|----------|
| TL-30 | 335200   | 533.84   |
| TL-35 | 335205   | 533.30   |
| TL-40 | 335210   | 533.84   |
| TL-50 | 335220   | 533.84   |

## Spindle Taper Wipers

- For easily and quickly cleaning spindle holes
- Plastic body, the taper wiper is made of special cotton material therefore not damaging the spindle
- The BT & DIN tapers are the same

| Model No. | Taper | Total Length | Code No. | Price \$ |
|-----------|-------|--------------|----------|----------|
| VTW-30    | #30   | 168mm        | 326210   | 57.63    |

## GS160G 6" Precision Milling Machine Vise

This vise has been redesigned with new industry leading workholding features.

- Jaw opening: 9.13" / 232mm
- Bed height: 2.875" ±0.0005"
- Weight: 68lbs / 31kg
- Narrower body style to allow more vises on a machine table
- The bearing pack has been relocated to help reduce oil/water/chip leakage into the vise body
- The thrust bearings have been replaced with ball bearings to make the pack stronger and more stable
- Spherical segment creates all-directional alignment and reduces jaw lift for improved performance
- Spindle does not protrude past the end of the body
- Brush seal design
- Perpendicularity (running face and jaw plate): 0.0004"
- Parallelism (running face to bottom of bed): 0.0006"
- Material: FCD-60 (80,000psi)
- Stationary jaw: 4 bolt stationary design reduces lift
- Pull-type design: Reduces stress on body during clamping
- Chip evacuation: Straight through the body on sides and ends. Locations strategically chosen to not reduce body strength
- Max. Clamping Force: 30378 ft/lbs

### 10 YEAR WARRANTY!

## GS675 6" Precision Milling Machine Vise

- Vises are matched (Bed Height: 2.875")
- An integral key and large fasteners reduce deflection by 50%
- 4-jaw plate positions allow extra capacity with the jaw plates in the outside position
- The swivel base is graduated 360° in one degree increments
- Chip cover protects leadscrew from damage
- The quality movable jaw does not lift off the bed, and the deflection of the stationary jaw is minimized

## GS Plain Base Modular Vises

Manufactured under rigid quality control. As a result of the high standard construction, GS Vises can be depended upon to maintain their accuracy under the most severe operating conditions. The modular design and the concept of interchangeability makes possible a wide variety of set up combinations.

- High accuracy
- Unlimited clamping range
- High quality alloy steel
- High clamping pressure
- No jaw lift
- All vises are matched

(Inch)

## GS Modular Vises — Single & Double Opening

- High accuracy
- No length limitations
- Unlimited clamping range
- No jaw lift
- High quality alloy steel
- Low profile
- High clamping pressure
- All vises are matched
- Mechanical and pneumohydraulic blocking devices
- Extra long base

Double Opening Vise

## Modular Vise w/ Quick Interchangeable Pulldown Jaws

No tools needed for quick hand change of downward jaw plates

## Double Clamp Vise

- Double clamp set - one handle can simultaneously operate two moveable jaws and clamps 2 workpieces of same or different size or one large workpiece
- This model can increase efficiency and productivity of CNC machines
- The movable jaw ANTI-LIFT mechanism provides alignment to workpiece without jaw lift
- There are 6 kinds of clamping ways to meet workpieces of different shapes and sizes
- The whole body is precisely ground and height tolerance is within  $\pm 0.025\text{mm}$  ( $\pm 0.001''$ ), therefore several vises can be lined up for production
- The vise is made of FDC-80,000 psi (55kg/cm<sup>2</sup>) Ductile iron, and slide ways are hardened to 45HRC
- The rigid construction prevents base distortion
- Precision made to high accuracy standard

| Model No.       | Code No. | Price \$ |
|-----------------|----------|----------|
| 4" - TLD-40G/HV | 382610   | 2,325.00 |
| 6" - TLD-60G/HV | 382600   | 3,060.00 |

## ANTI-LIFT MECHANISM

- Clamping force equalization and ANTI-LIFT mechanism features virtually eliminate the deflection of fixed centre jaw and movable jaw lift
- Clamping range for clamping 2 workpieces simultaneously is 125 mm (4.9") each or 275 mm (10.8") for one large workpiece
- Double clamp seat

### ANTI-LIFT Mechanism

- M: Jaws forward movement force
- N: Gravity
- P: Resultant 45° component force forces the workpiece down while clamping
- F: Direction of jaw movement

GS Double Clamp Vise  
(TLD-40G/HV, TLD-60G/HV)

## Clamping Examples For Different Applications:

Clamping 2 pieces of same size workpieces.  
Max. Capacity: 90mm (3.5")  
125mm (4.9")

Clamping 2 pieces of different size of workpieces.  
Max. Capacity: 90mm (3.5")  
125mm (4.9")

Large workpieces are able to be clamped after moving fixed jaw.  
Max. Capacity: 237mm (9.3")  
1315mm (12.4")

Stepped jaw plate for thin workpiece.  
Max. Capacity: 215mm (8.4")  
275mm (10.8")

Clamping 2 different workpieces.  
Max. Capacity: 215mm (8.4")  
275mm (10.8")

Large thin workpiece is able to be clamped after removing jaw plate on fixed jaw.  
Max. Capacity: 405mm (15.9")  
520mm (20.5")

## TLD-40G, TLD-60G; match vise, TLD-40HV, TLD-60H (horizontal and vertical 2 way) Inspection Specification:

- 1 Parallelism: running face to bottom of bed.  
Guaranteed: 0.01 mm (0.0004")

- 2 Squareness: between running face and jaw plate.  
Guaranteed: 0.03 mm (0.0012")

- 3 Squareness both sides to fixed jaw plate.  
Guaranteed: 0.02 mm (0.0008")

- 4 Parallelism: keyways on bottom of bed to jaw plate.  
Guaranteed: 0.02 mm (0.0008")

- 5 Squareness: keyways on bottom of bed to jaw plate.  
Guaranteed: 0.02 mm (0.0008")

- 6 Parallelism: running face of the test block to bottom.  
Guaranteed: 0.02 mm (0.0008")

## Machinable Fixture Jaws

- Can be machined to the precise shape of the part
- Aluminum is wear resistant, nonmagnetic and conductive with a high strength-to-weight ratio. It is easier to form and machine while being naturally noncorrosive

## GS Multi-Tasking Modular Vises for 5-Axis Machining Centers

The MULTI-TASKING range of vises has been specially designed for 5-axis machines. Working on 5 sides of the workpiece, it allows the best optimization of the machining cycle. Thanks to the compact design this kind of vise can be installed on all machining centres. The use of GRIP jaws is strongly recommended with multitasking vises.

- Self-centering or eccentric
- Eccentric jaw adjustment in steps of 2mm
- Highest accuracy in positioning and alignment ( $\pm 0.02\text{mm}$ ) due to ground rack teeth on both the base and the fixed jaws
- Minimum deflection
- Solid, rigid construction and maximum clamping ratio to the total length
- Positioning through ground holes or keyways
- All case hardened to 60HRC for durability

## Milling Vises

- During machining operations, horizontal vises provide secure and accurate positioning of the workpiece
- An operator controls the opening and closing of the jaws on the workpiece for manual vises

## 3-Way Angle Milling Vises

The universal 3-way angle vise is a new design which makes the angle setting in all directions possible to meet the needs of elaborate work.

- Operation is smooth and easy
- Swivel base is scaled in 360°
- Each base can be fixed by four special bolts
- Precision angle setting is scaled in all directions
- Moveable part touches the bore in V-shape and is adjustable
- Upper angle setting base can incline from the horizontal position to the vertical position

| Model No. | Width C | Jaw A | B  | H   | L   | Height at Vertical Position | Gross Weight (kg) | Measure CFT | Code No. | Price \$ |

## Tilting Hydraulic Machine Vises

- Angle setting ranges from 0° ~ 50°  
Tilting degrees graduated for easy reading
- Swivel base graduated to 360° and fixable in any position
- Accuracy within 0.02mm
- Tilting seat set by two locking screws

| Model | Jaw Width | Jaw Height | Jaw Opening | Weight (kg) | Code No. | Price \$ |

## ReLock Double Station Workholding System

### Unique Modular Design is Efficient and Accurate

Stay competitive in today's demanding manufacturing environment.

- Reduce set-up time with ReLock's modular design
- SnapLock feature allows to change or index jaws quickly
- Accurate and durable; precision manufactured from high grade materials
- Versatile array of jaws and accessories to vertical or horizontal machining applications

## ReLock Workholding Systems

| Size (in.) | Base Height (in.) | Base Width (in.) | Base Length (in.) | Code No. | Price \$  |

## SnapLock Machinable Fixture Jaws

- Versatile to allow job customization
- Remove or index in a matter of seconds

## AccuSnap Vise Jaw System

- Picture shows master jaw, parallels and modular workstop
- Highly accurate set-up and changeover

## ReLock-8 Station

- Unibody design
- Ideal for horizontal machining centres and rotary indexers on vertical machining centres

## Precision Hydra Power Machine Vises

### Hydraulic Booster System

Hydraulic Booster provides a steady clamping force against shocks and vibrations during the operations, since it fastens the work piece resiliently with the aid of the disc-springs mounted inside. (see fig. A)

## Suburban Precision Vises

Angled channel provides extra jaw capacity. Jaw can be opened or closed without unbolting from work surface. Squareness and parallelism within 0.0002". Models V-411 & V-612 squareness and parallelism within 0.0003". V-237 has recessed pockets at both ends for clamping, vees machined in face of movable jaw and 12 stepped channel which eliminates side holes.

| Model No. | Dimensions (in.)  | Jaw Capacity (in.) | Code No. | Price \$ |
|-----------|-------------------|--------------------|----------|----------|
| V-225     | 2 x 5-1/2 x 2     | 3-1/8              | 251200   | 919.30   |

## Heavy Duty Bench Vises With Swivel

Manufactured from high quality grey iron castings - a very strong material with excellent shock absorbing capacity and immense strength under compression. These rigid and robust vises, machined to close tolerances, are designed for smooth operation and reliability.

| Jaw Width (in.) | Max. Jaw Opening (mm) | Throat Depth (mm) | Code No. | Price \$ |
|-----------------|-----------------------|-------------------|----------|----------|
| 4               | 127                   | 55                | 231400   | 309.97   |
| 5               | 152                   | 70                | 231405   | 449.60   |
| 6               | 178                   | 80                | 231410   | 599.47   |

## Drill Press Vises

- High tensile iron casting
- Cold rolled screw thread
- Plain jaws of special steel

| Jaw Width (in.) | Opening (in.) | Jaw Depth (in.) | Weight (lb) | Code No. | Price \$ |
|-----------------|---------------|-----------------|-------------|----------|----------|
| 3               | 3             | 1-1/8           | 6           | 370206   | 105.09   |
| 4               | 4             | 1-3/8           | 10          | 370211   | 136.89   |
| 5               | 5             | 1-1/2           | 17-1/2      | 370216   | 241.33   |
| 6               | 6             | 1-1/2           | 23          | 370221   | 280.70   |

## Drill Press Vise P250

- High tensile iron casting
- Jaw plates - one grooved and one plain
- Accurate machining and assembling
- Four sides and one end machined

| Jaw Width (in.) | Jaw Depth (in.) | Opening (in.) | Length (in.) | Weight (lb) | Code No. | Price \$ |
|-----------------|-----------------|---------------|--------------|-------------|----------|----------|
| 2-1/2           | 1-1/2           | 2-9/16        | 7-1/4        | 5-1/2       | 370226   | 139.47   |

## Drill Press Vises P350 & P400

- Rugged 3 inch and 4 inch
- Precision cut ACME thread screw
- Hexagonal screw head for tight clamping

| Jaw Width | Jaw Depth | Opening (in.) | Length | Weight (lb) | Code No. | Price \$ |
|-----------|-----------|---------------|--------|-------------|----------|----------|
| 3         | 1-3/4     | 3             | 9-1/4  | 9-3/4       | 370236   | 161.98   |
| 4         | 1-3/4     | 4             | 10-3/4 | 17          | 370241   | 252.72   |

## Unigrip Drill Press Vises

- Manufactured from graded cast iron, these vises have a precision ground base and vise bed for smooth lateral movement of the movable jaw.
- Longitudinal and transversal prisms in the fixed jaw allow for firm gripping of round jobs of different sizes both horizontally and vertically. Special seat in jaws facilitates retaining of flat workpieces.
- Equipped with a convenient unigrip mechanism which increases the scope of application of this range of vises. Spindle moves inside the hollow hand grip allowing the vise to be used at a location away from the table edge.
- Available with 3 mounting options via 2 additional precisely ground surfaces: end face and side face. This allows for drilling along all axes with a single setting of the job and holding of long workpieces which are difficult to manage in regular vises.

| Model No.  | Jaw Width | Opening (in.) | Jaw Depth | Code No. | Price \$ |
|------------|-----------|---------------|-----------|----------|----------|
| DPV/UG-75  | 3         | 2-3/4         | 13/16     | 370925   | 179.97   |
| DPV/UG-100 | 4         | 3-1/2         | 13/16     | 370930   | 209.76   |
| DPV/UG-125 | 5         | 4-15/32       | 1-3/8     | 370935   | 319.77   |

**3 WAY Drill Press Vise**

| Model No.    | Jaw Width | Opening (in.) | Jaw Depth | Code No. | Price \$ |

## SG Iron Unigrip Drill Press Vise

- Manufactured from SG Iron, making them amongst the strongest vises in the market - virtually unbreakable
- Only drill vise that can also be used as a milling vise
- Equipped with long mounting slots for easy adjustment on the machine table
- Fixed jaw has horizontal and vertical V slots for holding round jobs
- Both jaws have a seat for retaining flat and low height workpieces
- Movable steel jaw is supported by a jaw seat imparting rigidity and further strength

| Model No. | Jaw Width | Opening (in.) | Code No. | Price \$ |
|-----------|-----------|---------------|----------|----------|
| DPV/SG-80 | 3-3/16    | 3-9/64        | 370945   | 210.15   |

## Piston Vises

- Easy and speedy
- Quick grip drill press vises

| Model No. | Jaw Width | Jaw Depth | Opening (in.) | Code No. | Price \$ |
|-----------|-----------|-----------|---------------|----------|----------|
| V-75      | 3         | 1-1/4     | 3             | 326485   | 574.78   |

## Pullers

- Spring-loaded jaws for quick and easy set-up for different applications
- Two or three jaw design for added flexibility
- Solid Chrome-Vanadium forged construction for increased durability
- Heavy duty forcing screw with live centre for strong even pulls

| Pulling Cap. | Max. Reach (in.) | Max. Spread (in.) | Dynamic EDP | Code No. | Price \$ |
|--------------|------------------|-------------------|-------------|----------|----------|
| 2 tons       | 3-1/2            | 4                 | D093001     | 865873   | 154.56   |
| 5 tons       | 5-1/4            | 7                 | D093002     | 866076   | 302.48   |

## 9" Locking Chain Clamp

- Flexible heavy duty chain adjusts quickly around any shape providing a secure hold even in hard to reach areas

| Weight (lbs) | Overall Length (in.) | Dynamic EDP | Code No. | Price \$ |
|--------------|----------------------|-------------|----------|----------|
| 1.57         | 9                    | D055311     | 865877   | 54.48    |

## Suburban Cube

- Solid, one-piece hardened steel construction providing durable strength
- Ground on six sides with the ground surfaces flat, the cube is square and parallel within 0.0002"

| Model No. | Dimensions    | Code No. | Price \$ |
|-----------|---------------|----------|----------|
| C-36      | 3-1/2 x 6 x 3 | 251302   | 887.40   |

## Vee Blocks — Cast Iron

- Made from close grained cast iron, these blocks are precisely ground and machined square and parallel
- The vee's are 90° centered and true
- The blocks are manufactured and supplied in numbered pairs and come in handy for holding large jobs where clamping is not necessary
- Squareness and Parallelism of Vee grooves: within 0.0012" (30 microns)

| Width (A) (in.) | Vee Width (B) (in.) | Height (C) (in.) | Thickness (D) (in.) | Model No. | Code No. | Price \$ |
|-----------------|---------------------|------------------|---------------------|-----------|----------|----------|
| 3               | 1-3/4               | 2-3/8            | 1-5/16              | VB/C-3    | 231102   | 95.69    |
| 4               | 2-3/16              | 2-9/16           | 1-9/16              | VB/C-4    | 231104   | 124.16   |
| 5               | 2-7/16              | 3-1/8            | 2                   | VB/C-5    | 231106   | 169.29   |
| 6               | 3-1/16              | 3-1/2            | 2-7/16              | VB/C-6    | 231108   | 270.68   |
| 8               | 4-1/2               | 5-1/2            | 4                   | VB/C-8    | 231110   | 656.37   |
| 10              | 5                   | 6-1/2            | 5                   | VB/C-10   | 231112   | 1,164.06 |
| 12              | 5-1/8               | 8                | 6                   | VB/C-12   | 231114   | 1,705.55 |

## 4 Way Vee Blocks — Cast Iron

- Made from close grained cast iron, these Vee Blocks are precisely ground and machined square and parallel
- Each Block incorporates four different sized vee's thereby supporting a wide range of sizes
- Manufactured and supplied in matched and numbered pairs, these are very useful for marking and checking of cylindrical parts
- The larger sizes incorporate a cavity on either side for convenience in handling during usage

| Thickness (A) (mm) | Block Width (D) (mm) | Height (C) (mm) | Vee Cap. (B) (mm) | Model No.        | Code No. | Price \$ |
|--------------------|----------------------|-----------------|-------------------|------------------|----------|----------|
| 35                 | 95                   | 70              | 20 x 30 x 40 x 50 | VB/QD/95-70-35   | 231116   | 166.56   |
| 30                 | 100                  | 100             | 20 x 30 x 40 x 50 | VB/QD/100-100-30 | 231118   | 179.94   |

## Magnetic V-Blocks

Used to hold cylindrical workpieces for grinding. Will hold both itself and the work on any flat ferrous surface, including a permanent magnet chuck (without energizing the chuck).

There are two vees:

- The smaller for workpieces up to 0.750" diameter and the larger for workpieces up to 2.500" diameter
- Sold Individually

| Description         | Code No. | Price \$ |
|---------------------|----------|----------|
| Magnetic Vee Blocks | 225710   | 173.89   |

## Magnetic V-Blocks

All Vee's and faces can be energized or de-energized simultaneously by turning the rotary action gun metal control knob. Gun metal construction of the knob ensures no interference with the magnetic field.

| Block Length (in.) | Block Width (in.) | Block Height (in.) | Type   | Model No. | Code No. | Price \$ |

## Suburban Magnetic Toolmaker's Chucks

- All models precision ground flat, square and parallel to an overall accuracy of 0.0005"
- Top, bottom and end magnetize simultaneously
- Model MTC-VB has "V" capacity of 2-3/4" diameter
- Model MTC-LFP has 3/16" x 1/16" fine pole construction for holding small or thin parts; and removable side and end rails

| Model No.  | Length (in.) | Width (in.) | Height (in.) | Weight (lb) | Code No. | Price \$        |
|------------|--------------|-------------|--------------|-------------|----------|-----------------|

\*\* Matched pair of MTC-VB

## Tool Maker's V-Block & Clamp Sets — Precision

This range of Vee blocks is made from finely selected tool steel fully hardened to 55-60 HRC. Manufactured and numbered in matched pairs, each pair has two 90° Vees of different capacities which are identical to the Vees of its matching block. The Vee's are ground central, parallel and square with the ends and sides.

| Block Length (in.) | Block Width (in.) | Block Height (in.) | Type    | Model No.  | Code No. | Price \$      |
|--------------------|-------------------|--------------------|---------|------------|----------|---------------|
| 1-19/32            | 1-1/4             | 1-1/4              | Regular | VB/SP/T-30 | 231072   | <b>119.10</b> |

| 2-3/4              | 1-3/4             | 1-5/8              | Regular | VB/SP/T-70 | 231076   | <b>202.03</b> |

## Precision V-Block Sets

Our ultra precision V-block set offers a quick, accurate and positive means of holding work pieces for layout, machining, grinding or inspection. One reversible swing-away clamp is provided with each V-block. The versatile clamp, plus the unique offset hole pattern in the top of the V-block, offers a large variety of clamping to almost any work surface.

- All V-blocks are parallel, square and centered within 0.0002"

| 90° V-Block Dimensions |       |        | Dia. To Be Inspected or Scribed |        | Code No. | Price \$      |
|------------------------|-------|--------|---------------------------------|--------|----------|---------------|
| Length                 | Width | Height | Min.                            | Max.   |          |               |
| 2-3/8                  | 2-3/8 | 2      | 13/64                           | 1-3/16 | 230135   | <b>171.58</b> |

## Ultimate V-Block & Clamp Set

Manufactured from selected steel, Vee Blocks are fully hardened and ground. Adjustable side screw with cap in the clamp supports the block and prevents tilting. Four 3/8"-16 tapped holes, two in the base and one on each side allow attachment to an angle iron which can then be attached to a lathe face plate or held by a magnetic chuck.

- Sold Individually

| Block Length (in.) | Block Height (in.) | Block Width (in.) | Model No. | Code No. | Price \$      |
|--------------------|--------------------|-------------------|-----------|----------|---------------|
| 3-19/32            | 1-7/8              | 1-7/8             | VB/S-48   | 231082   | <b>178.35</b> |

## V-Blocks & Clamps

All sides are ground square and parallel to each other. Models are designed so the clamps do not protrude over the sides; thus the tool can be used on its sides.

- Compares with other V-blocks costing twice as much
- Matched accuracy 0.0002". 90° vees are ground central, parallel and square with the ends precision ground
- Clamps included
- Matched and numbered in pairs
- Hardened and ground chrome steel
- Sold in precision matched pairs only

| Cap.  | Dimensions (W x H x L) | Type | Code No. | Price \$        |
|-------|------------------------|------|----------|-----------------|
| 2-1/8 | 2-3/4 x 3-1/2 x 4-7/8  | A    | 205120   | <b>1,661.69</b> |
| 1     | 1-3/8 x 1-5/8 x 1-3/4  | B    | 205105   | <b>255.96</b>   |

## Suburban V-Blocks

Each block comes with one clamp and blocks are available in matched pairs. All models are made of hardened steel. Sizes other than those priced are available by special order.

- M = Matched pairs

## Suburban Precision Ground Angle Plates

- Solid one piece angle plates are made from hardened steel
- Square and parallel within 0.0002"
- Tapped holes

| Model No. | Dimensions (in.)  | Weight (lb) | Code No. | Price \$ |
|-----------|-------------------|-------------|----------|----------|
| AP-334    | 3 x 3 x 4 x 1     | 6 lb        | 251260   | 514.75   |
| AP-444-S1 | 4 x 4 x 4 x 1     | 10 lb       | 251264   | 784.45   |
| AP-446-S2 | 4 x 4 x 6 x 1     | 14 lb       | 251276   | 962.80   |
| AP-664-S1 | 6 x 6 x 4 x 1-1/4 | 20 lb       | 251278   | 1,448.55 |

## Suburban Compound Angle Plate

Solid, single piece, hardened steel construction provides stable and reliable positioning for compound use. Comes with one clamp and all holes are tapped. Plate is square and parallel within 0.0002".

| Model No. | Dimensions    | Weight (lb) | Code No. | Price \$ |
|-----------|---------------|-------------|----------|----------|
| CAP-46    | 6 x 4 x 4 x 1 | 11          | 251280   | 1,741.45 |

## Cross Table VCT-512

Applied in general machines such as compounding machine, drilling machine, etc., or large objects of special shape which cannot be clamped by common vises.

- Lateral moving travel on surface: 11"
- Longitude moving travel on surface: 6"

| Model No. | Table (mm) | Height (mm) | Travel (mm) | Base (mm) | Dial Grad. (mm) | Net Weight (kg) | Code No. | Price \$ |
|-----------|------------|-------------|-------------|-----------|-----------------|-----------------|----------|----------|
| VCT-512   | 300 x 140  | 115         | 200 x 125   | 225 x 200 | 0.03            | 16.6            | 230965   | 1,606.69 |

## Sine Bar

- Effectively cancels the angle being measured to check its accuracy
- Ground flat, square and parallel within 0.0002"
- Steel hardened to 52HRC

| Model No. | Length (in.) | Width (in.) | Height (in.) | Centre Distance (in.) | Parallel | Hardness | Block Dia. | Material | Net Wt. | Code No. | Price \$ |
|-----------|--------------|-------------|--------------|-----------------------|----------|----------|------------|----------|---------|----------|----------|
| YCT-S25   | 6-3/8        | 1           | 1-1/4        | 5"                    | 0.00012  | 52HRC    | 3/4        | SK2      | 1.0kg   | 230760   | 183.77   |
| YCT-S50   | 6-3/8        | 2           | 1-1/4        | 5"                    | 0.00012  | 52HRC    | 3/4        | SK2      | 1.9kg   | 230765   | 236.24   |

## Sine Plates

### YCT-66/YCT-47 Sine Plates

Precision ground, hardened to 58HRC and normalized by a sub-zero treatment. Rolls are hardened and ground to an accuracy of 0.001mm. High precision of parallelism within 0.002mm and squareness within 0.005mm. Set-up and dressing time reduced to a bare minimum due to simplicity of set up. (Angle 0°, 60°)

| Model No.        | Width x Length (in./mm) | H (in./mm) | Code No. | Price \$ |
|------------------|-------------------------|------------|----------|----------|
| YCT-47           | 4 x 7                   | 2.37       | 230780   | 846.86   |
| YCT-66           | 6 x 6                   | 2.37       | 230785   | 903.08   |
| YCT-47M Magnetic | 100 x 175 mm            | 60 mm      | 230770   | 1,975.25 |
| YCT-66M Magnetic | 150 x 150 mm            | 60 mm      | 230775   | 2,172.61 |

# Suburban SineSet® System

The complete system of bolt-together tools

## Suburban Sine Plates

All plates are made of hardened steel. Squareness and parallelism 0.0002" and 0.0003". Locking strap always remains below top surface (pat. pending). Adjustable side rails drop below surface without unbolting. A 0.200 minute stepped gauge block roll eliminates steps in base plate. Strong, large hinge pins. Tapped holes in top plate. Side rails and locking straps included.

| Model No.             | Dimensions      | Centre Distance of Rolls | Code No. | Price \$  |

## Suburban Magnetic Sine Plates

Ceramic permanent magnetic chucks can't lose their magnetism. Removable handle for on/off operation, end rails and side rails all included. Sine plate angles lock rigidly with locking straps. Squareness, parallelism and roll centre distances within 0.0002" and 0.0003". Unit features 0.200 minute angle steps.

| Model No.                        | Dimensions      | Centre Distance of Rolls | Code No. | Price \$  |

## Sine Visers

- Body is one solid piece of steel, hardened like the rest of the sine vise to 58-62 HRC
- Dual 0.200" minute steps for setting small angles with standard gauge blocks are built into the gauge block roll
- All 7" x 3-1/2" sine visers have small horizontal and vertical vees in the moveable jaw
- Provides a quick and accurate means of holding a workpiece at an angle for machining, drilling or grinding

| Model No. | Size (in.)    | Code No. | Price \$ |
|-----------|---------------|----------|----------|
| YCT-SV25  | 3-1/2 x 2-1/2 | 230705   | 303.81   |
| YCT-SV30  | 3-1/2 x 2-7/8 | 230710   | 340.14   |
| YCT-SV200 | 2-3/8 x 2     | 230715   | 987.78   |
| YCT-SV250 | 2-7/8 x 2-1/2 | 230720   | 931.24   |
| YCT-SC300 | 3-3/8 x 3     | 230725   | 1,269.85 |

## Suburban Sine Visers

- Solid, one piece body
- Locking strap included
- Made from steel hardened to 58-62 HRC
- Square and parallel within 0.0002" and 0.0003"
- Angled centre channel provides extra jaw capacity
- Provides a quick and accurate means of holding a workpiece at an angle for grinding or inspection
- Dual 0.200 minutes steps built into the gauge roll allow setting small angles with standard gauge blocks
- Moveable jaw pulls into base at 45° to 60° to insure maximum holding power and hold-down force, eliminating tilting and lifting

| Model No.             | Size (in.)        | Code No. | Price \$ |
|-----------------------|-------------------|----------|----------|

## Suburban Compound Sine Plates

Compound sine plates include two end rails and two straps for locking angle settings. Made of hardened steel, each compound sine plate has 0.002" deep step for minute angles and tapped holes in top plate. Squareness and parallelism 0.0003".

| Model No.   | Dimensions      | Centre Distance of Rolls | Code No. | Price \$  |

| SPC-1212-S2 | 12 x 12 x 4-1/8 | 10" within 0.0002"       | 251144   | 12,503.35 |

## Suburban Compound Magnetic Sine Plates

Ceramic permanent magnetic chuck. Removable handle for position on/off control, side rails, end rails all included. Strap locks sine plate securely. 0.200 minute angle steps with 0.0002" and 0.0003" tolerance in squareness, parallelism and roll centre distances.

- Fine Pole: (marked FP) 1/8" poles and 1/8" separators produce shallow flux lines for holding small and thin parts

## Suburban SineSet® V-Blocks

- Provides a quick, accurate and positive means of holding workpieces for layout, machining, grinding or inspection
- Solid one-piece steel construction, hardened to 58-60 HRC
- One reversible, swing-away clamp is provided with each v-block
- Side slots allow easy clamping to almost any work surface
- SineSet® models bolt directly to a SineSet® sine plate or compound sine plate of the same series. S1 models also bolt to the AP-664-S1 90° conversion plate
- Available in both 60° and 90° models and as single vee blocks or matched pairs
- M = Matched pairs

## Giant T-Slotted Webbed Angle Plates

- Provides an accurate vertical base for mounting vises, sub-plates, parts or fixtures
- Standard 5/8" T-slots on a 6" grid pattern are provided on both faces
- Made from one piece, class 40 cast iron that has been stress relieved
- Extra heavy 2-1/2" wall thickness provides stability during milling operations
- Faces and edges machined flat, square and parallel within 0.001" per 12"

| Model No.  | A (in.) | B (in.) | C (in.) | D (in.) | E (in.) | Weight (lb) | Code No. | Price \$ |

## Slotted Angle Plates — Webbed & Open

Made of high-tensile cast iron seasoned against distortion, skillfully machined square and parallel, these plates are supplied in two types, Type A and Type B, the former having side webs.

Type A-Webbed: Machined on outside surfaces and edges only.

Type B-Opened: Machined all over, except slots.

## Magnetic Angle Iron

- A versatile tool for layout, inspection and squaring operations
- Combines the advantages of a universal right angle iron and a permanent magnetic chuck
- Magnetic face is energized by turning a recessed control knob
- Can be placed on any side for workholding
- Heavy support rib provides structural strength and acts as a carrying handle
- Body made from class 35-40 cast iron

| Model No. | Length | Width | Height | Flat, Square & Parallel | Weight (lbs) | Code No. | Price \$ |

# BISON LATHE CHUCKS

Bison chucks are made from forged steel or cast iron; all of the working surfaces are hardened and ground ensuring that the finished product is a rugged chuck that meets high sliding, stability, and durability parameters.

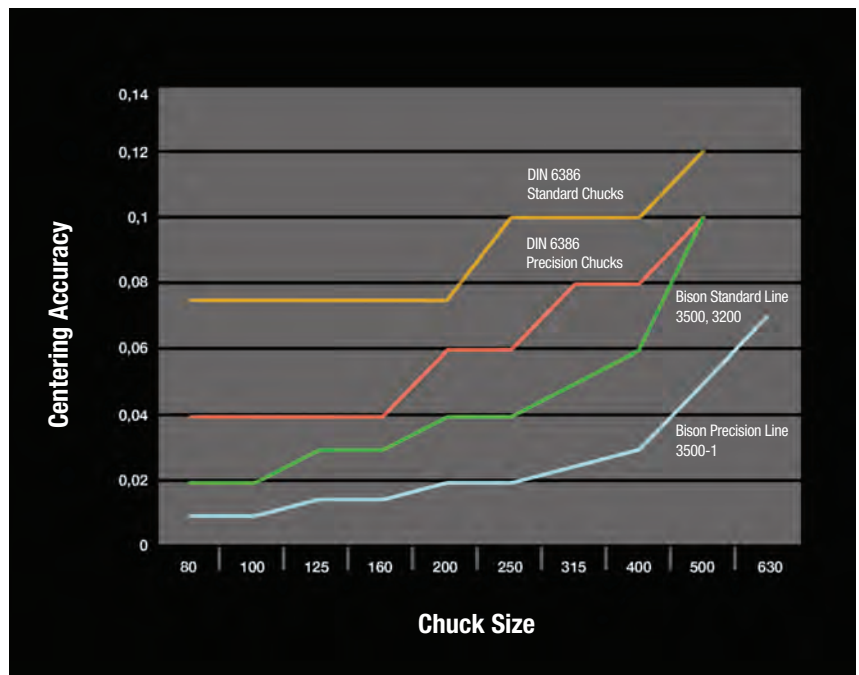

Each chuck is thoroughly inspected before the product leaves the factory. We check gripping force and run-out to ensure accuracy in order to meet Bison's quality standards that are even more stringent than DIN standards. Only then the chuck is given the Bison label of quality. This is our commitment to you that you have purchased the best workholding products on the market today.

We want to give you more. So when greater precision will be necessary you can choose Bison lathe chucks from our precision line.

Centering accuracy of Bison standard and precision lines are shown in the chart below in comparison to the requirements of DIN standards. Both our standard and precision line fall below the required DIN standards throughout the various sizes.

For high precision operations we recommend the precision line of Bison chucks. High quality products for demanding companies.

## Precision 3-Jaw Self-Centering Scroll Chucks Forged Steel Body

Precision lathe chucks have a top accuracy at work and the guarantee to maintain this accuracy for an extended period of time. These chucks have modern and compact design. They are able to fulfill the highest demands of our customers. They can be used wherever precision and high precision machining is demanded.

- BODY** - drop-forged of highest grade steel and put through precise machining operations. All bearings surfaces are carefully hardened and precision ground
- SCROLL PLATE** - drop-forged of fine alloy steel, carefully hardened. Thread flanks ground on both sides
- JAWS** - teeth and guides are hardened and fully ground on both sides
- PINIONS** - hardened and ground
- BUSHINGS** - hardened and ground, pressed into the pinion seats

Jaws, pinions and bushings are made of fine alloy steel. Precision grinding of scroll and jaws teeth will:

- eliminate possible deformation as a result of heat treatment
- reach uniform radial gripping force on all teeth of jaws
- increase guarantee period for high centering accuracy
- increase gripping force

Each chuck is provided with lubricator enabling current maintenance and extending chuck components life. Each scroll and assembled chuck are statically balanced within fine limits. Interstage and final inspection assure high quality of our chucks.

## Precision 3 and 6-Jaw Self-Centering F/A Scroll Chucks Forged Steel Body

A unique micro-adjustment feature enables concentricity to be adjusted to 0.0002 inch of full indicator movement. F/A chucks can be used at many machining operations for which ordinary scroll chucks are unsuitable and at all the operations for which ordinary chucks are normally used. Require original Bison F/A backplates.

## 4-Jaw Independent Lathe Chucks

These chucks feature jaws that are individually adjustable, allow firm gripping of odd shaped work, and the four jaws allow a square component to be perfectly centered to the chuck while achieving maximum gripping force. The chuck bodies are made of semi-steel. The jaws are made of high quality carbon steel and hardened. Thrust bearings and operating screws are made of case hardened steel.

## Universal 2, 3 and 4-Jaw Self-Centering Scroll Chucks

These chucks have modern, precision and standardized construction. They may be used on all types of lathes and on different kinds of milling and drilling attachments.

- BODY** - is made of high quality cast iron. All bearing surfaces are precision machined
- SCROLL PLATE** - drop-forged of fine alloy steel, carefully hardened. Thread flanks ground on both sides
- JAWS** - the teeth and guides are hardened and fully ground on both sides
- PINIONS** - hardened and ground

These chucks are equipped with lubricator, enabling their current maintenance. Versatile inspections assure high quality of our chucks.

## Through Hole Permissible Enlargements

### For Chucks 3200, 3500

d\* - through hole diameter made by manufacturer

d1 - permissible enlargement of through hole

| Mounting  | Hole Dia. | Chuck Size      | 3-1/2" | 4"     | 5"     | 6-1/4" | 8"     | 10"    | 12-1/2" | 15-3/4" | 20"    | 25"     | 32-1/2" |        |  |

## F/A FINE ADJUSTMENT

# Self-Centering Scroll Chucks

## Precision Three and Six-Jaw Self-Centering F/A Scroll Chucks Forged Steel Body

A unique micro-adjustment feature enables concentricity to be adjusted to 0.0002" of full indicator movement.

F/A chucks can be used at many machining operations for which ordinary scroll chucks are unsuitable and at all the operations for which ordinary chucks are normally used. Require original F/A backplates.

## 3-Jaw F/A Precision Steel Body Scroll Chucks — 2pc Hard Rev. Jaws

### Features:

- 3-Jaw, self-centering scroll chuck
- Steel body extends machine life while providing higher rigidity and greater wear resistance
- Hardened and ground working surfaces ensure longer life with maintained accuracy and repeatability
- Balanced scroll plate and chuck allows higher rotation speeds without excess vibration
- Repeatability: 0.0006"
- Superior accuracy: small screws on the outside enable the chuck to be adjusted to position with nearly zero runout (adjusting accuracy within 0.0002")
- The clamped workpiece is adjusted to the required concentricity by means of 4 (8 for sizes 16", 20" & 25") radially arranged adjusting screws

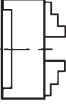

### Application:

- This precision chuck, with increased gripping accuracy, is made for universal use, but particularly advantageous for grinding machines, indexing heads, and lathes
- Especially suitable for machining parts with top concentricity

### 3-Jaw F/A Cast Iron Body Scroll Chucks — 2pc Hard Rev. Jaws

**Features:**

- 3-Jaw, self-centering scroll chuck
- Repeatability: 0.0006"
- Superior accuracy: small screws on the outside enable the chuck to be adjusted to position with nearly zero runout (adjusting accuracy within 0.0002")
- The clamped workpiece is adjusted to the required concentricity by means of 3 tangentially arranged adjusting spindles

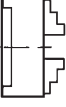

**Application:**

- This precision chuck, with increased gripping accuracy, is made for universal use, but particularly advantageous for grinding machines, indexing heads, and lathes
- Especially suitable for machining parts with top concentricity

## 6-Jaw F/A Precision Steel Body Scroll Chucks — 2pc Hard Rev. Jaws

### Features:

- 6-Jaw, self-centering scroll chuck
- Steel body extends machine life while providing higher rigidity and greater wear resistance
- Hardened and ground working surfaces ensure longer life with maintained accuracy and repeatability
- Balanced scroll plate and chuck allows higher rotation speeds without excess vibration
- Repeatability: 0.0006"
- Superior accuracy: small screws on the outside enable the chuck to be adjusted to position with nearly zero runout (adjusting accuracy within 0.0002")
- The clamped workpiece is adjusted to the required concentricity by means of 4 (8 for sizes 16", 20" & 25") radially arranged adjusting screws

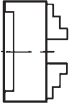

### Application:

- This precision chuck, with increased gripping accuracy, is made for universal use, but particularly advantageous for grinding machines, indexing heads, and lathes
- Especially suitable for machining parts with top concentricity
- Gripping force is equally distributed over 6 jaws, allowing the chuck to machine thin-walled workpieces and clamp without deformation

## STANDARD SELF CENTERING SCROLL CHUCKS

### Cast Iron Body Self-Centering Scroll Chucks

These chucks have modern, precision and standardized construction. They may be used on all types of lathes and on different kinds of milling and drilling attachments.

- BODY** - is made of high quality cast iron. All bearing surfaces are precision machined
- SCROLL PLATE** - drop-forged of fine alloy steel, carefully case hardened  
Thread flanks ground on both sides
- JAWS** - the teeth and guides are hardened and fully ground on both sides
- PINIONS** - hardened and ground

These chucks are equipped with lubricator, enabling their current maintenance. Versatile inspections assure high quality of our chucks.

### Precision Steel Body Self-Centering Scroll Chucks

Precision lathe chucks have a top accuracy at work and the guarantee to maintain this accuracy for an extended period of time. These chucks have modern and compact design. They are able to fulfill the highest demands of our customers. They can be used wherever precision and high precision machining is demanded.

- BODY** - drop-forged of highest grade steel and put through precise machining operations. All bearings surfaces are carefully hardened and precision ground
- SCROLL PLATE** - drop-forged of fine alloy steel, carefully case hardened.  
Thread flanks ground on both sides
- JAWS** - teeth and guides are hardened and fully ground on both sides
- PINIONS** - hardened and ground
- BUSHINGS** - hardened and ground, pressed into the pinion seats

Jaws, pinions and bushings are made of fine alloy steel.

Precision grinding of scroll and jaws teeth will:

- eliminate possible deformation as a result of heat treatment
- reach uniform radial gripping force on all teeth of jaws
- increase guarantee period for high centering accuracy
- increase gripping force

Each chuck is provided with lubricator enabling current maintenance and extending chuck components life. Each scroll and assembled chuck are statically balanced within fine limits. Interstage and final inspection assure high quality of our chucks.

## 3-Jaw Precision Steel Body Scroll Chucks — 2pc Hard Rev. Jaws

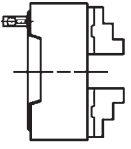

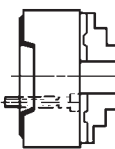

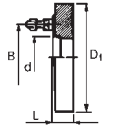

### Features:

- 3-Jaw, self-centering scroll chuck with manual gripping
- Steel body extends machine life while providing higher rigidity and greater wear resistance
- Hardened and ground working surfaces ensure longer life with maintained accuracy and repeatability
- Balanced scroll plate and chuck allows higher rotation speeds without excess vibration
- Mounted on the machine-tool spindle from the back of the chuck, using the adapter plate

### Application:

- This chuck is designed for all types of workshop machining operations on conventional lathes

## 3-Jaw Precision Steel Body Scroll Chucks — Hard Solid Jaws

### Features:

- 3-Jaw, self-centering scroll chuck with manual gripping
- Steel body extends machine life while providing higher rigidity and greater wear resistance
- Hardened and ground working surfaces ensure longer life with maintained accuracy and repeatability
- Balanced scroll plate and chuck allows higher rotation speeds without excess vibration
- Mounted on the machine-tool spindle from the back of the chuck, using the adapter plate

### Application:

- This chuck is designed for all types of workshop machining operations on conventional lathes

## 3-Jaw Cast Iron Body Scroll Chucks — 2pc Hard Rev. Jaws

### Features:

- 3-Jaw, self-centering scroll chuck with manual gripping and a high quality cast iron body
- Smart design, allowing inner parts to be replaced quickly
- Mounted on the machine-tool spindle from the back of the chuck, using the adapter plate

### Application:

- This chuck is designed for all types of workshop machining operations on conventional lathes and milling fixtures

# Workholding, Clamping & Fixturing

## 3-Jaw Cast Iron Body Scroll Chucks — 2pc Hard Rev. Jaws — Cont'd

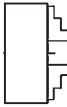

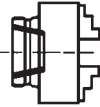

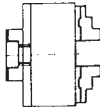

**Features:**

- 3-Jaw, self-centering scroll chuck with manual gripping and a high quality cast iron body
- Smart design, allowing inner parts to be replaced quickly
- Mounted on the machine-tool spindle from the back of the chuck, using the adapter plate

**Application:**

- This chuck is designed for all types of workshop machining operations on conventional lathes and milling fixtures

## 3-Jaw Cast Iron Scroll Chucks — Hard Solid Jaws

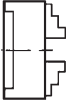

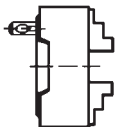

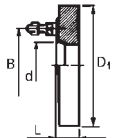

### Features:

- 3-Jaw, self-centering scroll chuck with manual gripping and a high quality cast iron body
- Smart design, allowing inner parts to be replaced quickly
- Mounted on the machine-tool spindle from the back of the chuck, using the adapter plate

### Application:

- This chuck is designed for all types of workshop machining operations on conventional lathes and milling fixtures

| Mounting  | Size of Chuck | 3"     | 4"       | 5"       | 6"       | 8"       | 10"      | 12"      | 16"       | 20"       | 25"       |

## 4-Jaw Precision Steel Body Scroll Chucks — 2pc Hard Rev. Jaws

### Features:

- 4-Jaw, self-centering scroll chuck with manual gripping
- Steel body extends machine life while providing higher rigidity and greater wear resistance
- Hardened and ground working surfaces ensure longer life with maintained accuracy and repeatability
- Balanced scroll plate and chuck allows higher rotation speeds without excess vibration
- Mounted on the machine-tool spindle from the back of the chuck, using the adapter plate

### Application:

- This chuck is designed for all types of workshop machining operations on conventional lathes and grinders
- Suitable for machining square and round workpieces, granting greater flexibility to machining operations

## 4-Jaw Cast Iron Body Scroll Chucks — 2pc Hard Rev. Jaws

### Features:

- 4-Jaw, self-centering scroll chuck with manual gripping and a high quality cast iron body
- Smart design, allowing inner parts to be replaced quickly
- Mounted on the machine-tool spindle from the back of the chuck, using the adapter plate

### Application:

- This chuck is designed for all types of workshop machining operations on conventional lathes and grinders
- Suitable for machining square and round workpieces, granting greater flexibility to machining operations

## 4-Jaw Cast Iron Body Scroll Chucks — Hard Solid Jaws

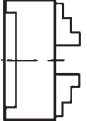

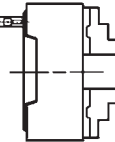

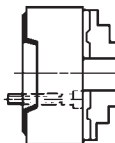

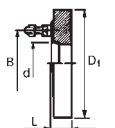

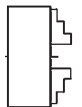

### Features:

- 4-Jaw, self-centering scroll chuck with manual gripping and a high quality cast iron body
- Smart design, allowing inner parts to be replaced quickly
- Mounted on the machine-tool spindle from the back of the chuck, using the adapter plate

### Application:

- This chuck is designed for all types of workshop machining operations on conventional lathes and grinders
- Suitable for machining square and round workpieces, granting greater flexibility to machining operations

## 3-Jaw Steel Body Scroll Chucks With Threaded Mounting

**Features:**

- Special compact design
- Very small turning diameter
- Hard reversible jaws
- Maximum 4000rpm

**Application:**

- Especially designed for household and non-professional use
- Suitable for lathes with a threaded spindle
- Can be used with both metal and wood

## 2-Jaw Cast Iron Body Scroll Chucks — 3105

**Features:**

- 2-Jaw, self-centering scroll chuck with manual gripping and a high quality cast iron body
- Chucks are equipped with soft, steel top jaws, which can be individually shaped by the user and clamp irregularly-shaped workpieces
- Smart design, allowing inner parts to be replaced quickly
- Mounted on the machine-tool spindle from the back of the chuck, using the adapter plate

**Application:**

- This chuck is designed for all types of workshop machining operations on conventional lathes

## 6-Jaw Precision Steel Body Scroll Chucks — 2pc Hard Rev. Jaws

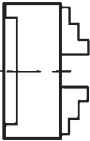

### Features:

- 6-Jaw, self-centering scroll chuck with manual gripping
- Steel body extends machine life while providing higher rigidity and greater wear resistance
- Hardened and ground working surfaces ensure longer life with maintained accuracy and repeatability
- Balanced scroll plate and chuck allows higher rotation speeds without excess vibration
- Mounted on the machine-tool spindle from the back of the chuck, using the adapter plate

### Application:

- This chuck is designed for all types of workshop machining operations on conventional lathes and grinders
- Gripping force is equally distributed over 6-Jaws, allowing the chuck to machine thin-walled workpieces and clamp without deformation

## 5C Collet Chucks

**Features:**

- The simple wrench operated scroll provides uniform, distortion free clamping of workpieces and low collet exchange times

**Application:**

- The type 3911 collet chuck is designed for use with 5C collets and can be used for turning, facing, boring, grinding and milling operations
- The type 3960 collet chuck allows for fine adjustment to the required concentricity by means of 4 radially arranged adjusting screws

**Options:**

- Camlock and threaded mounts available on request

## Adapters For 5C Collet Chucks

| Chuck Size (in.) | Spindle | Code No. | Price \$ |
|------------------|---------|----------|----------|
| 5                | A6      | 425410   | 915.18   |
| 5                | A8      | 425415   | 843.59   |

### 3-Jaw Live Morse Taper Scroll Chucks — 2pc Hard Rev. Jaws

**Features:**

- Able to work in horizontal and vertical positions
- Hardened and ground MT shank
- Sealed ball bearings, lubrication through oiler
- Rotating spindle can also be used with 4-Jaw Front Mount Chucks

**Application:**

- Designed for simultaneously supporting and gripping long objects (tubes, shafts etc.) during turning, milling and grinding operations
- Can replace typical center in machine tailstock

### 3-Jaw Live Morse Taper Scroll Chucks — Hard Solid Jaws

**Features:**

- Able to work in horizontal and vertical positions
- Hardened and ground MT shank
- Sealed ball bearings, lubrication through oiler
- Rotating spindle can also be used with 4-Jaw Front Mount Chucks (only 5" & 6")

**Application:**

- Designed for simultaneously supporting and gripping long objects (tubes, shafts etc.) during turning, milling and grinding operations
- Can replace typical centre in machine tailstock

Workholding, Clamping & Fixturing

## High Precision 3-Jaw Steel Body Scroll Chucks — 2pc Hard Rev. Jaws

Twice the Centering Accuracy Over Regular Steel Body Chucks — See Page: H64

**Features:**

- 3-Jaw, self-centering scroll chuck with manual gripping
- Steel body extends machine life while providing higher rigidity and greater wear resistance
- Hardened and ground working surfaces ensure longer life with maintained accuracy and repeatability
- Balanced scroll plate and chuck allows higher rotation speeds without excess vibration
- Mounted on the machine-tool spindle from the back of the chuck, using the adapter plate

**Application:**

- This chuck is designed for all types of workshop machining operations on conventional lathes

# High Precision 3-Jaw Steel Body Scroll Chucks — Hard Solid Jaws

Twice the Centering Accuracy Over Regular Steel Body Chucks — See Page: H64

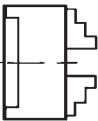

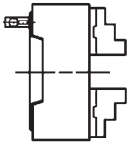

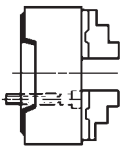

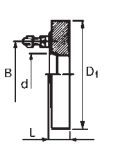

**Features:**

- 3-Jaw, self-centering scroll chuck with manual gripping
- Steel body extends machine life while providing higher rigidity and greater wear resistance
- Hardened and ground working surfaces ensure longer life with maintained accuracy and repeatability
- Balanced scroll plate and chuck allows higher rotation speeds without excess vibration
- Mounted on the machine-tool spindle from the back of the chuck, using the adapter plate

**Application:**

- This chuck is designed for all types of workshop machining operations on conventional lathes

| Mounting  | Chuck Size  | 3"                 | 4"                 | 5"                 | 6"                 | 8"                 | 10"                | 12"                | 16"                | 20"                 | 25"                 |           |

## Combination 3 & 4-Jaw Lathe Chucks — Hard Solid Jaws

### Features:

- Combines features of both self-centering scroll and independent chucks: user can adjust chuck once and the self-centering option assures repeatability throughout the rest of the batch
- 4-Jaw chuck (type 4605 and type 4805) is able to machine both square and round workpieces, granting greater flexibility
- Steel body (type 4705 and type 4805) extends machine life while providing higher rigidity and greater wear resistance, enabling the chuck to withstand higher machining forces

### Application:

- Particularly suitable for lining up and gripping workpieces of irregular shape

## 3-Jaw Steel Body Large Through Hole Scroll Chucks

### Features:

- Steel body extends machine life while providing higher rigidity and greater wear resistance, enabling the chuck to withstand higher machining forces
- Chucks may work individually or in pairs, mounted on opposite sides of the lathe spindle, ensuring the same vertical position of the jaws in both chucks
- Large through hole compared to the outside diameter of the chuck body
- High gripping force and high machining accuracy
- Able to machine very long workpieces
- Heavy duty components

### Application:

- This chuck is designed for gripping long pipes during medium duty machining for conventional and specialized machine-tools

### Gripping Power of the Self-Centering Chucks (lbs)

| Size of Chuck (in.)                | 3    | 4    | 5    | 6    | 8    | 10    | 12    | 16    | 20    | 25    | 32    |
|------------------------------------|------|------|------|------|------|-------|-------|-------|-------|-------|-------|
| Universal Chucks (Semi-steel body) | 2200 | 3750 | 5300 | 6800 | 8200 | 10000 | 12000 | 14300 | 16000 | 17600 | 19800 |
| Precision Chucks (Steel body)      | 2200 | 3750 | 5300 | 6800 | 8200 | 10000 | 12000 | 14300 |       |       |       |

### Recommended Max. Speeds for Self-Centering Chucks (rpm)

| Size of Chuck (in.)                | 3    | 4    | 5    | 6    | 8    | 10   | 12   | 16   | 20  | 25  | 32  |
|------------------------------------|------|------|------|------|------|------|------|------|-----|-----|-----|
| Universal Chucks (Semi-steel body) | 4000 | 3500 | 3200 | 3000 | 2500 | 2000 | 1500 | 1000 | 700 | 500 | 350 |
| Precision Chucks (Steel body)      | 6000 | 5200 | 4800 | 4500 | 4000 | 3500 | 2800 | 2000 |     |     |     |

### Value of Balancing – for Precision Self-Centering Chucks Only

| Size of Chuck (in.)    | 3    | 4    | 5    | 6    | 8    | 10   | 12   | 16   |
|------------------------|------|------|------|------|------|------|------|------|
| Balancing (ounce-inch) | 0.15 | 0.22 | 0.32 | 0.44 | 0.62 | 0.87 | 1.25 | 1.94 |

## SELF-CENTERING SCROLL CHUCKS

### Spindle Runout

To obtain the specified centering accuracy of a chuck mounted on a machine tool it is necessary:

- to reduce play in the spindle bearings to the allowable minimum;
- to ensure the machine spindle nose runout not to exceed the values specified
- to meet the basic requirements for correct mounting of chuck on the spindle nose, according to the chuck installation instruction

| Size of Chuck | Runouts on Universal and Precision Chucks |                 |                |
|---------------|---|-----------------|----------------|
|               | Radial Runout A                           | Radial Runout B | Axial Runout C |
| 3             | 0.0008                                    | 0.0010          | 0.0006         |

#### Fully-machined Adapters

For plain back, self-centering chucks – designed for direct mounting on L-type spindle noses.

# Independent Lathe Chucks

## Bison 4-Jaw Independent Lathe Chucks

Four-jaw standard duty independent lathe chucks with solid reversible jaws, spheroidal graphite iron body. These chucks feature jaws that are individually adjustable, allow firm gripping of odd shaped work, and the four jaws allow a square component to be perfectly centered to the chuck while achieving maximum gripping force. The jaws are made of high quality carbon steel and hardened. Thrust bearings and operating screws are made of case hardened steel.

Large chucks (diameter 10" to 32") are supplied with T-slots

## 4-Jaw Independent Steel Body Oil Country Chucks

### Features:

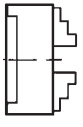

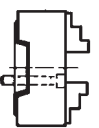

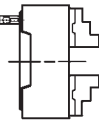

- Steel body extends machine life while providing higher rigidity and greater wear resistance, enabling the chuck to withstand higher machining forces
- Chucks may work individually or in pairs, mounted on opposite sides of the lathe spindle, ensuring the same vertical position of the jaws in both chucks
- Large through hole compared to the outside diameter of the chuck body
- High gripping force
- Able to machine very long workpieces
- High machining accuracy

### Application:

- This precision chuck, with increased gripping accuracy, is designed for gripping long pipes during heavy duty machining for conventional and specialized machine-tools

3-Jaw self-centering scroll large through hole chucks also available see page's: H55-57

Workholding, Clamping & Fixturing

## 4-Jaw Steel Body Independent Chucks — 2pc Hard Rev. Jaws

### Features:

- 4-Jaw, independent chuck with manual gripping, and a high quality steel body
- Steel body extends machine life while providing higher rigidity and greater wear resistance, enabling the chuck to withstand higher machining forces
- 4-Jaws ensure the precise centering of square-shaped workpieces with maximum permitted gripping force
- Chucks with diameters 10" and above are equipped with additional T-slots, permitting the addition of extra jaws
- Mounted on the machine tool spindle from the back of the chuck, using the adapter plate

### Application:

- This precision chuck, with increased gripping accuracy, is made for all types of very high precision workshop machining operations on conventional lathes
- Suitable for machining square and round workpieces

## 4-Jaw Steel Body Independent Chucks — Hard Solid Jaws

### Features:

- 4-Jaw, independent chuck with manual gripping, and a high quality steel body
- Steel body extends machine life while providing higher rigidity and greater wear resistance, enabling the chuck to withstand higher machining forces
- 4-Jaws ensure the precise centering of square-shaped workpieces with maximum permitted gripping force
- Chucks with diameters 10" and above are equipped with additional T-slots, permitting the addition of extra jaws
- Mounted on the machine tool spindle from the back of the chuck, using the adapter plate

### Application:

- This precision chuck, with increased gripping accuracy, is made for all types of very high precision workshop machining operations on conventional lathes
- Suitable for machining square and round workpieces

## 4-Jaw Cast Iron Body Independent Chucks — Hard Solid Jaws

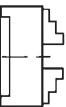

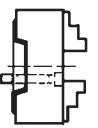

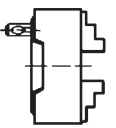

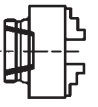

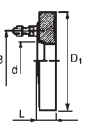

### Features:

- 4-Jaw, independent chuck with manual gripping, and a high quality cast iron body
- Chuck bodies in sizes up to 6" diameter, are made from steel
- 4-Jaws ensure the precise centering of square-shaped workpieces with maximum permitted gripping force
- Chucks with diameters 10" and above are equipped with additional T-slots, permitting the addition of extra jaws
- Mounted on the machine tool spindle from the back of the chuck, using the adapter plate

### Application:

- This precision chuck, with increased gripping accuracy, is made for all types of very high precision workshop machining operations on conventional lathes
- Suitable for machining square and round workpieces

## Independent Chuck Through Hole Diameters

### Independent Jaw Chucks Through Hole Diameters

\*d – through hole diameter made by manufacturer

d1 – permissible enlargement of through hole

\*\*Hole diameter d1 may be made only to depth X

## Quick Change Tool Posts & Holders

Fast tool changing and simplicity  
to increase machine production.

See Pages H132-135

Easy to operate with  
40 tool-bit positions.

See Pages H132-135

## Brazed Tool Bits

Used with quick change  
tool posts & holders.

See Pages D2-3

# PRECISION LATHE CHUCKS

## 3-Jaw Cast Iron Scroll Chucks — Hard Solid Jaws

### Features:

- 3-Jaw, self-centering scroll chuck with manual gripping and a high quality cast iron body
- Smart design, allowing inner parts to be replaced quickly
- Mounted on the machine-tool spindle from the back of the chuck, using the adapter plate

### Application:

- This chuck is designed for all types of workshop machining operations on conventional lathes and milling fixtures

Replacement parts not available

## 3-Jaw Plain Back Cast Iron Body Scroll Chucks — 2pc Hard Rev. Jaws

### Features:

- 3-Jaw, self-centering scroll chuck with manual gripping and a high quality cast iron body
- Smart design, allowing inner parts to be replaced quickly
- Mounted on the machine-tool spindle from the back of the chuck, using the adapter plate

### Application:

- This chuck is designed for all types of workshop machining operations on conventional lathes and milling fixtures

Replacement parts not available

## 4-Jaw Plain Back Cast Iron Body Independent Chucks — Hard Solid Jaws

### Features:

- 4-Jaw, independent chuck with manual gripping, and a high quality cast iron body
- Chuck bodies in sizes up to 6" diameter, are made from steel
- 4-Jaws ensure the precise centering of square-shaped workpieces with maximum permitted gripping force
- Chucks with diameters 10" and above are equipped with additional T-slots, permitting the addition of extra jaws
- Mounted on the machine tool spindle from the back of the chuck, using the adapter plate

### Application:

- This precision chuck, with increased gripping accuracy, is made for all types of very high precision workshop machining operations on conventional lathes
- Suitable for machining square and round workpieces

Replacement parts not available

# Power Chucks

## Features

- Manufactured from high grade alloy steel which extends machine life while providing higher rigidity and greater wear resistance
- The unique design of wedge nut results in its very rigid structure and enables direct power transmission to the master jaws in direct area of jaw guideways – effectively counteracting the loss of gripping force and resulting in high power transmission efficiency
- Hardened and ground working surfaces ensure longer life with maintained accuracy and repeatability
- Large through hole works well with high rotational speeds
- Master jaws secured against throw-off
- Master jaws lubricated directly
- Unbalance G 6,3
- Flat back mounting, dimensions according to DIN 6353
- Special insert set available that allows for easy transformation into a non-through hole model

## Application

- This first class chuck, with increased gripping accuracy, is made for very high precision machining on CNC lathes and turning centres
- Designed for high rotation speeds without compensating elements

## Options

- Special insert set allows for non through hole execution
- Chucks with diameters 500mm, 630mm and 800mm are available on request

## Standard Accessories

- Chuck and jaw mounting bolts
- Reversible top jaws hardened and ground
- T-nuts
- Key for chuck installation
- Eye bolt (for sizes greater than 8" - 200 mm)

## Bison 2405-K Power Chucks With 1.5mm x 60° Serrations

### Standard Accessories:

- Chuck and jaw mounting bolts
- Reversible top jaws hardened and ground
- T-nuts
- Blank draw bar nut
- Key for chuck installation
- Eye bolt

## Special Insert Sets For 2405-K

### Features:

- Special insert set for power chucks with through hole enable conversion to closed center option
- The set includes:
  - 1) Cover to be mounted on front surface of power chuck body instead of originally supplied hollowed cover
  - 2) Special screw for connecting threaded nut of power chuck body with the drawbar of actuating cylinder
- Sets are available in different sizes matching the chuck size

Workholding, Clamping & Fixturing

## KFG 2 & 3-Jaw Lever Type Power Chucks With 60° Serrations

Type 522-05 2-Jaw  
Type 532-05 3-Jaw

A highly versatile chuck with large through hole, suitable for both bar work and chucking the most varied parts. Toggle joint levers convert the axial operating force into radial jaw movements.

- Long jaw movement

## SP Stationary Power Chucks

### SPD - Through Hole

### SPO - Without Through Hole

Rohm Power Chucking Fixtures, used as stationary chucks on drilling, milling and special purpose machines, offer many advantages.

#### Features:

- Quick and efficient chucking
- Concentric gripping of round as well as angular parts
- Universal through use of different jaws
- Ideal for series production
- Suitable for use in automated work cycles
- Gripping force adjustable by changing the pressure
- Oil or air operated

Type 513-00 SPD/3

Type 513-50 SPO/3

## KZF Power Operated Collet Chucks

**Type 508-31-** Power operated collet chucks with bayonet catch are mainly used for chucking bar work on NC/CNC lathes. The bar stock can be fed in through the chuck. Profiles can also be chucked with the appropriate collets.

## BH-M High Precision Power Chucks

### BH-M: Master Jaws with Metric Serration (1.5mm x 60°)

- Suitable for Kitagawa top jaws
- Large through hole
- 3-Jaws

### Standard Equipment:

- 3-Jaw chuck
- 1 Set T-nuts w/ bolts
- 1 Set soft top jaws
- Mounting bolts
- Grease gun

### Technical Features:

- Gripping force transmission via wedge hook
- Case hardened body to assure greatest precision and long chuck life
- 2 and 3-Jaw version available in all diameters
- 4-Jaw available starting from 165mm diameters

## BB-D & BB-M High Precision Power Chucks

### BB-D: Inch Serration (1/16" x 90°)

### BB-M: Metric Serration (1.5mm x 60°)

- Suitable for Kitagawa top jaws, metric serration
- For open centre or partial open centre clamping
- For machines with very large spindle bore

### Standard Equipment:

- 3-Jaw chuck
- 1 Set T-nuts w/ bolts
- 1 Set soft top jaws
- Mounting bolts
- Grease gun

### Technical Features:

- Extra large through hole
- Gripping force transmission via wedge hook
- Case hardened body to assure greatest precision and long chuck life

The diagrams refer to 3-Jaw chucks. The maximum gripping force is the total, acting on the 3-Jaws, obtained by applying to the chuck the maximum allowed traction to the draw bar. The data refers to a chuck in good conditions, using SMW-AutoBlok K05 grease.

The dynamic gripping forces have been measured using the standard soft top jaws placed in the most external position, but not exceeding the outer diameter of the chuck. Using larger and heavier jaws and/or in a more external position, it is necessary to reduce the rotation speed.

## High Precision Pull-Down Chucks

**TSF-C:** Floating jaws to clamp rough components and easily deformed parts

**TSR-C:** Rigid jaws to clamp on pre-machined diameters with highest precision

From middle size to very big production batches of parts requiring close squareness and parallelism tolerances. Used in first and second operation to clamp easily deformed parts. Long life with minimal maintenance, reducing the machine down time.

### Features

- Case hardened body and internal parts constantly grease-lubricated to assure greatest precision and long chuck life
- Swarf and coolant-proof, prevents contamination of the internal mechanism
- Unique clamping mechanism design
- Tongue and groove master jaws equipped with specially designed top jaws
- Minimum maintenance, very low wear, constant accuracy over a long period of time, constant clamping force
- Constant grease-lubrication of the clamping mechanism
- Compensation of centrifugal force
- Suitable for High-Low clamping

### Standard Equipment:

- 3-Jaw chuck
- 1 set fine adjustment keys
- Mounting bolts

Floating jaws to clamp on rough dia. and easily deformed components on 6 points of contact. Used in both 1st and 2nd operation.

Rigid jaws to clamp pre-machined diameter of not easily deformed parts, with highest centering repeatability.

- Active pull down effect = the jaws slide on the part
- Clamping movement:  
1 centering - 2 pull-down - 3 gripping
- Internal and external clamping on the same chuck

TSF-C and TSR-C chucks actuated by SIN-S cylinder with central bore for coolant or air to flush away chips or to automatically control the correct position of the workpiece on the axial supports (PEL system).

Workholding, Clamping & Fixturing

## AP-D & AP-M High Precision Power Chucks

- AP-D - inch serration
- AP-M - metric serration
- Closed centre
- For mid to large batch production
- Fully sealed, ideal for dry machining of castings and forgings or if high pressure coolant is used
- Constant gripping force with permanent grease lubrication
- Central bore for coolant and/or air
- Chuck body and internal parts are case hardened
- Proofline® chucks = fully sealed - low maintenance

### Standard Equipment

- 3-Jaw chuck
- 1 set T-nuts and bolts
- 1 set soft top jaws
- Mounting bolts

Subject to technical changes

## CNC High Speed Live Centres — Standard Point

### Features

- Accuracy guaranteed to 0.003mm TIR (0.0001")
- Excellent for CNC and conventional machines
- Heat treated point to 60±2HRC
- High performance lip seal and deflected shaft design protects bearing space from ingress by dust and coolant
- 4-Bearing System: a double row angular contact bearing, a radial ball bearing, and a rear needle roller bearing combine to provide excellent rigidity and high precision point concentricity
- Heat treated drop-forged body (50±2HRC) for extra strength, rigidity, and long life
- Shaft borehole for easy dismounting

- MT2-3
- MT4
- MT5

### Dimensions

## CNC High Speed Live Centres — Extended A Type Point

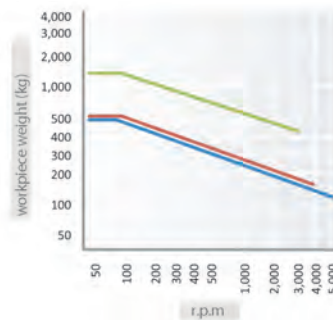

### Features

- Accuracy guaranteed to 0.003mm TIR (0.0001")
- Excellent for CNC and conventional machines
- Specially shaped elongated centre point improves tool clearance and machining flexibility for cramped area work
- Heat treated point to 60±2HRC
- High performance lip seal and deflected shaft design protects bearing space from ingress by dust and coolant
- 4-Bearing System: a double row angular contact bearing, a radial ball bearing, and a rear needle roller bearing combine to provide excellent rigidity and high precision point concentricity
- Heat treated body for extra strength, rigidity, and long life

- MT2-3
- MT4
- MT5

## High Performance Live Centres

### Features

- Accuracy guaranteed to 0.003mm TIR (0.0001")
- Excellent for light/medium duty work on conventional lathe machines
- Heat treated point to 60±2HRC
- Slim diameter improves tool clearance
- Triple Bearing System: 2 radial ball bearings and a thrust bearing provide good overall load ratings and improved performance
- Rear bearing is sealed, protecting the assembly from coolant and chips
- Live centre made of wear-resistant, drop-forged tool steel

### Dimensions

| MT | A (mm) | B (mm) | C (mm) | D (mm) | E (mm) | F (mm) | L (mm) | Workpiece Weight | Max Axial Load | Max RPM | Weight | Max Runout | Code No. | Price \$ |

## High Speed Live Centres

### Features

- Accuracy guaranteed to 0.002mm TIR (0.0001")
- Excellent for grinders, CNC machines, and high speed light duty machining
- Heat treated point to 60±2HRC
- High RPM (up to 6,000)
- Five Bearing System: A double row angular contact bearing, two single row angular contact bearings, and a rear needle roller bearing combine to provide improved runout, greater stability, longer tool life, and superior performance
- Anti-friction seal for coolant deflection and high speed
- Heat treated body for extra strength, rigidity, and long life
- Shaft borehole for easy, efficient dismounting
- Drop forged body (50±2HRC) for long life

### Dimensions

| MT | A (mm) | B (mm) | C (mm) | D (mm) | E (mm) | F (mm) | L (mm) | Workpiece Weight | Max RPM | Weight | Max Runout | Code No. | Price \$ |

## 60° Bull Head Live Centres — Extended A Type Point

### Features

- Accuracy guaranteed to 0.003mm TIR (0.0001")
- Heat treated point to 60±2HRC
- For pipe work, tube work, and parts with extra-large centre holes
- 4-Bearing System: double row angular contact bearing, thrust ball bearing, and a radial ball bearing combine to provide excellent rigidity and high precision point concentricity
- Used both as a centering taper for hollow bodies and as a centre for machining standard workpieces
- Elongated centre point is specially shaped for improved tool clearance

### Dimensions

| MT | A (mm) | B (mm) | C (mm) | D (mm) | E (mm) | F (mm) | G (mm) | K (mm) | L (mm) | Workpiece Weight | Max RPM | Weight | Max Runout | Code No. | Price \$ |
|----|--------|--------|--------|--------|--------|--------|--------|--------|--------|------------------|---------|--------|------------|----------|----------|

## 80° Bull Nose Live Centres — Standard Point

### Features

- Accuracy guaranteed to 0.003mm TIR (0.0001")
- Excellent for heavy duty lathe applications
- Heat treated point to 60±2HRC
- For pipe work, tube work, and part with extra-large centre holes
- Triple Bearing System: a taper roller bearing, thrust bearing, and a high-precision radial ball bearing combine to provide excellent rigidity and superior performance
- The design prevents ingress of coolant and chips
- Shaft borehole for easy, efficient dismounting
- Drop forged shaft (50±2HRC)

- MT4
- MT5

### Dimensions

| MT | A (mm) | B (mm) | C (mm) | D (mm) | E (mm) | F (mm) | L (mm) | Workpiece Weight | Max RPM | Weight | Max Runout | Code No. | Price \$ |

## Indexable External Turning Toolholders

Requires fewer tool changes than solid tools in high level metalworking.

See Pages E44-E59

## Interchangeable Points Live Centres

### Features

Each holder comes with the 60° H insert. Other inserts available individually (see below)

- Accuracy for centre inner diameter guaranteed to 0.003mm
- Accuracy after point locking guaranteed to 0.005mm
- Excellent for individual production of various workpieces through different insert shafts
- Heat treated point to 60±2HRC
- 4 types of standard point are available
- 4-Bearing System: a double row angular contact bearing, a radial ball bearing, and a rear needle roller bearing combine to provide excellent rigidity and superior performance
- Because of the insert shafts the allowed workpiece weight is limited
- Mounting taper of point is 1/10
- Drop forged (50±2HRC) body
- Shaft borehole for easy, efficient dismounting

- MT3
- MT4
- MT5

### Dimensions

## Interchangeable Points

### Features

Each holder comes with the 60° H insert and a point lever.

Other inserts available individually (see below)

- Accuracy for centre inner diameter guaranteed to 0.003mm
- Accuracy after point locking guaranteed to 0.005mm
- Mounting taper of point is 1/10

# Skoda Heavy Duty Silver Line Live Centres — CSN 243324M

### Features

- The rotating spindle is extended right through the tapered shank
- Two specially designed adjustable needle-roller bearings carry all radial loads
- A heavy duty ball thrust bearing takes all axial thrust
- Complete protection of bearings form the ingress of coolant, dirt or swarf is provided by the built-in oil-seal, which also prevents loss of lubricant

## Skoda Extra Heavy Duty Live Centres — CSN 243325

For clamping of heavy workpieces at lathes.

- The rigid structure and seating of the turning part is characterized by long service life
- The model EXTRA is commonly used for work at grinding machines
- Centres with the apex angle of 60° for reduction of deformations of the machine (tailstock, bed, headstock) from axial clamping forces
- The live centres are provided with shanks according to DIN 228 and ISO 296 (without clamping thread)

## Skoda Precision CNC Silver Line Live Centres — CSN 243327-II

- The centres are intended for NC lathes. Their face parts are formed to allow easy access of the tool to the workpiece, which is an advantage with workpieces of complex shapes
- A special ring is used to set the radial clearance of the centre. It also prevents cutting lubricant from leaking into the centre bearing space, and so extends the centre's operational life
- Spindle-like point extends into shank where it is supported by a needle bearing, increasing rigidity, reducing point deflection and dampening vibration

## Skoda Heavy Duty Bull Nose Silver Line Live Centres — CSN 243319

Designed to hold pipe and hollow work. Pipe head can be used as an all-round centre for light work. Two matched angular contact bearings preloaded at the factory. This achieves good thrust and radial capacities. Bearings are protected by a combination steel shield and neoprene seal.

- Accuracy:  $\pm 0.0001$ "

## Skoda Silver Line Live Centre Sets — CSN 243326

### Features

- The rotating spindle is extended right through the tapered shank
- Two specially designed adjustable needle-roller bearings carry all radial loads
- A heavy duty ball thrust bearing takes all axial thrust
- Complete protection of bearings from the ingress of coolant, dirt or swarf is provided by the built-in oil-seal, which also prevents loss of lubricant

# CONSTANT FACE DRIVERS

## CONSTANT FACE DRIVERS

For rational turning of workpieces on their entire length without reclamping with high precision.

Developed according to the modular-design principle, therefore a universal exchange of driving discs and centres.

Hydraulic respectively mechanic pressure compensation provides a uniform clamping force also on uneven faces of workpieces. The spring loaded centre provides a longitudinal workpiece stop on the front side.

## CONSTANT FACE DRIVERS CoA

One set consists of a basic body, one driving disc and suitable centre

### Basic Body CoA — Type 680-50

- Basic body with morse taper (all basic bodies without centre)

| Morse Taper | Rohm Id No. | Code No. | Price \$ |
|-------------|-------------|----------|----------|
| 3           | 088173      | 394390   | 923.46   |

## Face Driving Kits CoA Type 680

- In wooden box, clamping range: 10-80mm turning range: 11-160mm

### Contents

- 1 basic body
- 10 driving discs, clamping diameter: 10-12-16-20-25-32-40-50-63-80 mm
- 5 centres diameter: 4-6-10-12-16 mm
- 1 extractor
- Slide rule to calculate axial tailstock loading
- O-ring, 3 hard metal driving plates
- 3 locking bolts

## 40 Position Quick Change Tool Posts & Holders

### Outstanding Features:

Toolpost and toolholder profile-ground. Easy to operate. Any number of different toolholders can be used. 40 tool-bit positions. Adjustment for height of the tool bit is controlled by a knurled head screw without using packing plates or shims. Loosening and locking of any toolholder is performed by simple eccentric clamping. Save time by changing the toolholder from the top without moving longitudinal or traverse slides. Bore with longitudinal feed by using toolholder with inner taper. Eliminates complicated boring with the tailstock.

- Repeatability Accuracy:  $\leq 0.01\text{mm}$

### Mounting on Lathe:

Profile-ground serrated toolpost to be mounted with support clamping bolt. The centering disk should be bored to the dimension of the clamping bolt (snug fit not necessary).

It is recommended that the toolpost with clamped toolholder and boring bar be aligned at a right angle to the face plate. The toolpost is locked on the support by means of two set pins. The marking point should then be set on "0" and the nut of the clamping bolt tightened.

Toolpost

Toolholder 'S'

Toolholder 'B'

Toolholder 'D'

### Technical Data

Min. dimension "S" required for height of tool "h":

## Turret Type Quick Change Tool Post

Production of a lathe machine, even of high capacity, is conditioned to the speed and time required for changing tools. Fast tool changing and simplicity increase machine production. Our turrets are designed and constructed to achieve these essential requirements.

### Our Turrets offer these advantages:

- 1 - No chatter or vibrations
- 2 - Save long set-up work for centering tool to centre of rotation axle
- 3 - No tool breakages, caused by poor or irregular setting of the tool on the shims

### Price of Set Includes:

- 3 Tool-holders of flat section
- 1 Tool-holder with V-seat for round tools
- 2 Standard spanners

### Specifications:

Main block assembly is made of case-hardened steel rigidly secured by the lathe carriage machine steel bolt. Main block has four side openings, for inserting the proper tool holder. These can be securely fastened by a simple and safe eccentric device, which also adjusts individual tool holder height. Tool shank is held securely by four hardened screws.

## Te-Co & STM Super Clamp Kits

### Super Clamp Kits with Steel Blocks

Each set contains:

- 24 studs with flats, 4 each 3, 4, 5, 6, 7, 8" lengths ‡
- 4 coupling nuts
- 4 flange nuts
- 4 T-slot nuts
- 6 serrated end clamps
- 6 step blocks
- 1 T-slot cleaner
- 1 holder
- Sets shipped in all wood holders

## Te-Co Economy Machinist Clamping Kit

Means Great Savings!

TE-CO Tooling Components and Sowa Tool are offering an economy line of Machinist Clamp Kits at substantial savings. Of course, the same quality and high standards of the TE-CO Premium Kits are also found in these kits. The only difference between the two is that the economy line has no TE-CO logo, no flats on studs, no t-slot cleaner and stud threads are rolled, not cut. What you will find though, is a nice price tag.

- Each set includes:
- 6 T-slot nuts
  - 6 flange nuts
  - 4 coupling nuts
  - 1/2-13 thread on nuts and studs
  - Meant to fit 5/8" table slot
  - 6 step blocks
  - 6 serrated end clamps
  - 24 studs, 4 each of 3", 4", 5", 6", 7", 8"
  - 1 Plastic holder

| Description                 | Code No. | Price \$ |

| Economy Machinist Clamp Kit | 608000   | 194.95   |

## Te-Co Milling Machine Clamping Kits

- Bridgeport type milling machines use part no. 20506
- Versatility expanded when used with step block kits
- For material information see individual components
- 24 studs with flats of 4 each of: 3", 4", 5", 6", 7" and 8" long
- 1 holder (wooden base and metal tray)

Each Set Contains:

- 4 soft clamps – 6" long
- 1 T-nut and stud kit with includes: 4 coupling nuts, 4 flange nuts, 4 T-slot nuts, 1 T-slot cleaner

## T-Slot Clamp Sets

- 1 set consists of 4 vises
- For thin or small workpieces
- Good clamping force
- Quick setting
- Suitable for light duty cutting on milling, drilling, or EDM machines

## Parallel Clamps

- Designed for maximum strength and rigidity
- Ideal for various toolmaking and machine set-ups
- Made of alloy steel, black oxide finish
- Hardened and tempered jaws
- Screw heads drilled allowing use of pin for tightening
- All sizes equipped with spring clip and retaining groove

BLACK OXIDE

| Capacity | Jaw Length | Model | Code No. | Price \$ |

## Driver Studs — Metric

- Black oxide finish
- Medium carbon steel
- Special lengths and sizes will be quoted on request
- Metric studs do not have flats

## Steel Step Blocks

- Case hardened
- Black oxide finish
- Teeth match all serrated end clamps

**NOTE:**  
2 pieces = 1 block

## Te-Co Steel Step Block Clamp Kits

- Kit contains 10 blocks and one holder
- Versatility is expanded when a T-Nut and Stud Kit is used
- Two halves = one block
- Aluminum step blocks also available

## Dog Point Knurled Head Screws

- 12L14 steel
- Black oxide finish
- Case hardened
- Knurled head allows better grip
- Use for light clamping or holding
- Dog point prevents damage to end threads

BLACK OXIDE

## Nuzzler® Edge Clamps

- Black oxide finish
- Noses have serrations for better gripping of non-finished or semi-finished workpieces
- Edge clamps feature a double action, adjustable nose which exerts clamping pressures both downward and inward through a 45° angle

## Hand Retractable Spring Plungers Quick Release "L" Handle

- Plunger has a slight taper for easy alignment
- Built in drive wrench for rapid installation and alignment
- Plunger can be completely withdrawn into the body and locked into a retracted position
- Nylon locking element is standard on all sizes

## Te-Co Ball Plungers

- Material:
  - Steel Body: 12L14 Steel
  - Stainless Steel Body: 303 Stainless Steel
  - Ball: 440 Stainless Steel or Nylon
- Smallest and lightest spring loaded device
- Side-load tolerant
- Controlled end forces
- Many sizes conform to TCMAI standards
- Screwdriver installation
- Bodies are color coded to indicate end forces:
  - Plain or Zinc = Light Force
  - Black = Standard Force
  - Gold = Heavy Force

## Pitbull® Clamps

The Revolutionary Pitbull® Clamp remains the lowest, highest holding force clamp in the industry today. High vertical and horizontal clamping forces are generated, considering the size of the Pitbull® Clamps. It uses a standard cap screw and an oil resistant O-ring. The Pitbull® Clamp is available in 5 sizes and several styles, a tool steel knife edge for aggressive stock removal, a tool steel blunt edge for general purpose and a brass version to help prevent marring the workpiece.

## Original Fixture Clamps

The Cam Action MITEE-BITE Fixture Clamp is made up of two simple components: a hardened steel socket cap screw with an offset head and a hexagonal washer.

- Low profile makes computer programming easier
- Cam action provides fast, strong clamping
- Small size allows more parts per load
- Simple design keeps cost low

NOTE: Clockwise rotation is recommended.

Workpiece stop should be on the right of clamp.

# Workholding, Clamping & Fixturing

## Uniforce Clamps

The Mitee-Bite Uniforce Clamp, a compact, economical workholding device enables you to fixture more parts on the machine table. This simple efficient wedge design provides equilateral clamping force on both sides of the aluminum channel to hold two parts with one clamping action.

Visit [www.miteebite.com](http://www.miteebite.com) for the "Mitee-Bite Challenge" and more product detail.

\*D - A milled slot wider than D dimension will insure the clamp remains in line with workpiece. Clamp sides should not come in contact with slot walls during expansion.

\*F - The distance needed between workpieces for clamp clearance. Drill and tap mounting hole on the center of F dimension.

Metric also available, call for more information.

## Machinable Uniforce Clamps

Now you can hold those round and unusual shape parts with ease. This compact method of workholding will allow more parts per load at a lower price than vise soft jaws. The compact Mitee-Bite Uniforce Clamp is available with extra material on the clamping jaws so it can be machined to conform to the shape of your workpiece. The specially designed steel wedge spreads the clamping force uniformly on both sides of the 7075-T6 aluminum channel. A unique locking plate is provided to make the clamp rigid while machining the jaws to your specifications, without vibration.

Locking plate is used only to machine jaws, remove to clamp workpiece

When clamp is used to hold flat stock, use locking plate to machine faces parallel

\*A - The distance needed between workpieces for clamp clearance, drill and tap mounting holes on the center of "A" dimension.

\*F - The amount of machinable stock on the jaws.

\*H - Mounting screws included.

Metric also available, call for more information.

# ID Xpansion™ Clamp

The ID Xpansion™ Clamp is the ideal way to hold multiple parts on an inside diameter for machining on your VMC or HMC. These machinable clamps are produced in 12 sizes and can hold internal diameters from 0.160 to 9.85.

- Low profile
- Ideal for secondary operations on lathe parts
- Easily machined to size on lathe or mill
- Excellent for palletized setups
- Allows more parts per workcube or fixture plates
- Clamp body made of mild steel for machinability
- Tighten with hex key or hydraulic pull cylinders
- Longer screws are available for hydraulic applications (pull cylinders)

## Model #00 - #6 ID Xpansion® Clamps

- Expand clamp approximately 0.002" to 0.003" (0.1mm) over relaxed diameter and machine to fit workpiece bore, either on lathe or mill.
- If machining the clamp on lathe use the nut provided on the back of the clamp to tighten the tapered screw. This nut is used only while machining the clamp.
- Machine a pocket in the fixture, for the close tolerance "E" dimension and drill and tap mounting holes per "H" column. Drill and tap a hole from the "I" column in the center of the pocket for the tapered screw.
- A recessed dowel pin may be installed into the flange for additional rigidity if required.
- Range of expansion 0.005" to 0.025" (0.2 to 0.5mm) depending upon size.

## Model #7 - #10 ID Xpansion® Clamps

- Locking ring provided to ensure segments remain rigid while machining clamps to size.
- Insert ring and tighten drive screw, machine clamp to bore size. Remove ring to clamp workpiece.
- Aggressive material removal is not recommended when machining clamps to size.

Machining/Locking ring included on models #7-#10 to ensure the segments remain rigid while machining the clamp

## OK-VISE® Clamps

### The OK-Vise Clamp

With clamping capabilities up to 33,000 lbs, the OK-Vise is one of the strongest workholding products available in the Machine Tool Industry today.

### Three Dimensional Machining

Due to the low-profile design of the OK-Vise Clamps, it is possible to execute flexible three-directional machining of workpieces with one fastening. This feature creates improved accuracy. The single wedge clamp locks the workpiece to prevent any movement.

### Single-Wedge OK-Vise Clamps

Strong lateral clamping with a single wedge design

\*47100, 47110 and 47103 have smooth jaws

### Double-Wedge OK-Vise Clamps

The double-wedge clamps generate a pull-down action pressing the workpiece down towards the fixture base

## TalonGrip™ Vise Jaws

MITEE-BITE Products introduces a new and innovative product that will increase the functionality of your standard 4 and 6 inch (100mm and 150mm) vises. **TalonGrip™** is a simple bolt system that will allow you to perform aggressive machining operations while clamping on as little as 0.060 (1.5mm) of an inch. Ideal for small lot sizes, difficult applications or proto-type work when building a fixture would not be beneficial. TalonGrips are also available individually for fixturing with Pitbull and Dyna-Force clamps or for soft jaw applications.

Multiple Parts

Aggressive stock removal

Soft Jaws

Fixture Application with Pitbull Clamps

### Steel Vise Jaw Set (Set Includes 4 TalonGrips, 1 stop with M5 Screws)

## VersaGrip™ Vise Jaws

**VersaGrip™**, as the name implies, offers the versatility of clamping standard vise work as well as providing a solution for difficult applications that would normally require fixturing or machining soft-jaws. By simply replacing your current jaws with the VersaGrip™ system you can securely hold odd shaped parts while machining at speeds and feeds you never thought possible.

This system can accommodate a wide range of part sizes as well as holding multiple parts in a single cycle. The hardened (52-54 HRC) VersaGrip™ has penetrating teeth designed to bite into your workpiece preventing lateral and horizontal movement. These grips will hold flame cut parts, castings, even parts with a negative draft!

## Kopal® Clamps

Need a quick and easy way to clamp parts with top pressure? Check out this versatile line-up of clamps! From the strong but compact Piccolo to the heavy-duty Big Block.

The worm and gear design ensures the clamps will not loosen with use yet the clamps are easy to set up and break down. This is ideal for short cycle times and odd shaped parts.

The modular design also allows adjusting clamping height by stacking the riser blocks, and the use of an extension arm increases reach!

### PICCOLO

Up to 1460 lbs. (6500N) Holding Force

When the arm is released, the Piccolo remains in position in the slot.

### MONO BLOC

Up to 3600 lbs. (16000N) Holding Force

1. Slide the T-nut and the screw into the slot
2. Position and tighten the clamp onto the table using the clamping key provided
3. Clamp the workpiece using the same key
4. Proceed with machining

### BIG BLOCK

Up to 9000 lbs. (40000N) Holding Force

When the workpiece is released, the Big Block can either remain fixed in the slot, or slide in the slot.

Workholding, Clamping & Fixturing

## Mono-Bloc Chain Clamp

The Mono-Bloc Chain Clamp is a simple and rapid workholding solution for a wide array of applications.

The Chain Clamp offers fast and powerful clamping with forces up to 3600 lbs. (16000N).

Additional lengths of chain can be added for large applications.

### Mono-Bloc

| Part No. | Description     | A     | B      | C    | D      | E     | Code No. | Price \$ |
|----------|-----------------|-------|--------|------|--------|-------|----------|----------|
| 25040    | Mono-Bloc Chain | 0"-4" | 2.375" | 3.5" | 1.563" | 4.25" | 604478   | 1,179.40 |

### Parts for the Mono-Bloc

| Part No. | Description             | Code No. | Price \$ |
|----------|-------------------------|----------|----------|
| 25041    | Master Link             | 604479   | 11.55    |
| 25042    | Extra Chain (1 meter)   | 604480   | 116.81   |
| 25043    | Anchor                  | 604481   | 288.82   |
| 25045    | Protective Clips (5/pk) | 604482   | 48.14    |
| 25720    | Wrench                  | 604187   | 71.06    |

To prevent marring or scratching on delicate pieces use the protective chain clips. (25045) Minimum radius 6".

## Deluxe Mono-Bloc Start-up Kit

High-impact plastic storage/carrying case with room to store tools listed below and space to store additional T-nuts for other size mills.

### Kit includes:

- (2) Mono-Bloc Clamps with 2 5/8" arm
- (2) Standard-Duty Riser Blocks
- (1) Extension Arm
- (1) Standard-duty T-Wrench
- (2) M10x35mm screws
- (2) M10x40mm screws
- (2) T-nuts (choose from chart below)

### Mono-Bloc Start-up Kit

| Part No. | T-Slot Size | Code No. | Price \$ |
|----------|-------------|----------|----------|
| 25725    | 1/2"        | 604338   | 2,205.39 |

| 25760    | 7/8" x M10 T-Nut (22mm)                  | 604196   | 39.70    |

VM100 Base Unit (45375) in Vise

VM100 Base Unit (45375) with VM300 Vacuum Pallet (45150)

VM100 Base Unit (45375) on a Magnetic Chuck

VM100 Base Unit (45375) with a Production Pallet (VM100 Blank Pallet - 45325)

### The Simplest and Most Versatile Vacuum System on the Market

The VM100 was primarily designed for grinding non-ferrous material on a magnetic chuck. During the early stages of R & D it was discovered the VM100 could be much more. Clamp the VM100 in vise to reduce set-up time, use as a pallet changer or mount to a grid plate or T-slot table. The VM100 uses the same patented method as the VM300 to produce a vacuum strong enough for industrial applications but still operates on shop air! No need for vacuum pumps and coolant traps. We include everything necessary to get your VM100 running within minutes of opening the box.

- Operates on 70-100 psi shop air, eliminating vacuum pumps and coolant traps
- Will accept the standard VM300 vacuum pallet, increasing your vacuum platform to over 14" x 12" (360mm x 315mm)
- Make your own vacuum fixtures - we can help with the design and produce the fixture for your custom application
- Remove 12mm pins when grinding/machining thin material, use set screws to locate and aid in holding force

**Black Gasket** - Excellent for long cycles and aggressive coolants  
**White Gasket** - Excellent for small parts, water based coolant or running dry

## Vacmagic® VM300

Two VM300 Base Units (45175) and large Vacuum Pallet (45160)

VM300 Base Unit (45175)  
with a Production Pallet (VM300 Blank Pallet - 45130)

Workpiece placed over gasket  
and pushed down to create vacuum.  
Now ready for machining.  
(VM300 Vacuum Pallet - 45150)

### The All-in-One Pallet Changer and Vacuum System

In a relatively short amount of time the VM300 has established itself as the vacuum system to which all others are measured. Capabilities include traditional vacuum applications using our standard vacuum pallet and custom vacuum applications (ie. machining blank pallet to suit specific part geometry) and the ability to perform as a rock solid pallet changer.

- Simple design keeps cost low
- Quick-change - swap pallets in 30 seconds or less
- Productivity maximized - load pallets while machining
- Easy to install and set-up
- Precise repeatability
- Reliable and easy to use - virtually maintenance free
- Flexible pallet design - limited only by your imagination!
- No pumps - uses standard shop air

### Tech Data

|                            |                  |
|----------------------------|------------------|
| Air Supply Requirements    | - 70 psi (5 bar) |
|                            | - 2 CFM (55 LPM) |
| Low Pressure Safety Switch | - included       |
| Vacuum Indicator           | - included       |
| Hardened Locator Pins      | - included       |

## Magnetic Plate

- 7mm poles, 2mm separators
- Magnetic field intensity: > 650 gauss
- Suitable for light cutting and grinding on lathe, grinder, EDM, and rotary tables

| Model  | Diameter (B0) | Height (H) | Plate Diameter (L0) | L1    | Code No. | Price \$ |
|--------|---------------|------------|---------------------|-------|----------|----------|
| VGD-08 | 200mm         | 78mm       | 200mm               | 137mm | 230626   | 3,030.39 |

## Magnetic Adjustable Link

- Overall length 4-1/8"
- Overall width 2-1/8"
- For holding and welding
- Magnetic blocks can be set at any angle by adjustment and locking of the wing nut. When used in multiples, a number of sheets can be held in complicated arrangement
- Compact size for holding work in confined spaces

| Model | Block Dimensions (mm) | Code No. | Price \$ |
|-------|-----------------------|----------|----------|
| VCP-5 | 2" x 1" x 1"          | 230638   | 117.88   |

## Horizontal & Vertical Rotary And Dividing Tables (HV)

- This HV Type Rotary Table is so designed as to permit machining operations at a higher dimension than that of RT Type Rotary tables
- The base can be used in a vertical position to enable to carry out centre work

| Model      | A1          | Table OD     | Height H    | H1           | Base Dim. A  | B            | T-Slot Width | Bolt Slots | Centre Sleeve | Weight (kg/lb) | Worm Gear | Table Code No. | Price \$ | Tailstock Code No. | Price \$ | Indexing Plates Code No. | Price \$ |

## Tailstocks for Rotary Tables

Cast iron offers good vibration, resistance, good wear resistance and machinability. It is heavier and more economical than steel.

## Universal Tilting Rotary Table

### Model VU-100, VU-150, VU-300

- Tilting range 90° from horizontal to vertical position
- 1 rotation of handle equals 3 degrees, 5 minutes tilting reading
- 10 Second vernier scale
- Table Dial 1 minute graduations
- Fast degrees: Dividing notch pin and 24 holes in 15° around, insures rapid accurate spacing
- Minimum set-up time
- Rugged construction

## Universal Dividing Head

This Universal Index Centre has been designed to carry out all types of gear-cutting, precision dividing and spiral work (except Type BS-0, and BS-1) with greater precision and efficiency than has been possible before. The centre face can be tilted from a horizontal position of 90° down to -10° from vertical, and inclinations can be read off a scale graduated in degrees. The centre is built to highest engineering standards and is factory-inspected and tested to assure complete satisfaction. The ratio of worm to gear is 1:40.

Applicable Chuck: 6", 7" or 8"

## How To Install A 3-Jaw Chuck

## Simple Index

The Simple Index is a heavy-duty base on which is mounted a hardened and ground precision turntable. It can be used in either a horizontal and vertical position. Using one of the masking plates provided, the index can carry out many dividing functions. Indexing of 2, 3, 4, 6, 8, 12 and 24 divisions can be rapidly and simply carried out. The specially-made 3-jaw scroll chuck also simplifies the indexing of long workpieces.

**Optional Equipment:** Master indexing plate with 20 or 30 notches can be supplied to special order. When used with the suitable masking plates dividing into 2, 4, 5, 10, and 2, 3, 5, 6, 10, 15 are possible.

### Special Accessories

- 3-jaw scroll chuck dia. 8" 1 piece
- Adjustable tailstock
- Face plate 10" (maximum)
- Masking plates 2, 3, 4, 6, 8, 12 one piece of each

### Standards of Accuracy (Tolerances):

#### Testing Objective

1. Parallelism of table surface to base 0.00 (0.0004)
2. True running of axial movement of table surface 0.0008
3. True running of centre boss 0.0006
4. Squareness of base to angle face 0.0008
5. True running of chuck centre 0.0016
6. Dividing accuracy individual spacing error  $\pm 35''$

#### Tolerances Unit (max. in. permit)

- per 12"  
0.0008  
0.0006  
per 12"  
0.0016  
 $\pm 35''$

## Super Dex

This index combines the advantages of the Simple Index with those of a worm-gear index. When mounted on a milling, boring or other machine tool it can carry out single-purpose indexing and indirect indexing using the worm-drive mechanism. Disengaging the worm drive the 24-notch master plate permits 2, 3, 4, 6, 8, 12 and 24 dividing. When the chuck is removed the unit can be used as a horizontal and vertical type rotary table. The operating handle to rotary table worm gear reduction ratio is 1:90. The operating handle collar is graduated in minutes, and readings down to ten seconds can be set on the vernier.

## Tailstocks for Indexes

Cast iron offers good vibration, resistance, good wear resistance and machinability. It is heavier and more economical than steel.

## Rapidex

### Complete with chuck

- Simple and rapid operation
- Dividual number 24 notch (15° each)
- Table scale 1°, for angular indexing
- Table bore 30mm
- Horizontal / Vertical and 2 direction
- Suitable for milling and drilling machine using

| Model No. | Chuck Outer Diameter | Code No. | Price \$ |
|-----------|----------------------|----------|----------|
| VSI-4     | 4"                   | 326564   | 1,669.02 |
| VSI-5     | 5"                   | 326566   | 1,832.53 |

## Vacuum Chucks

- Vacuum gauge and relief valve included
- All chucks have back and end rail for positive location of workpieces
- Provide an excellent means to hold non-magnetic workpieces for machining or grinding
- Designed to be bolted directly with little or no indicating to a SineSet® sine plate or compound sine plate of the same size and series

| Chuck Model No. | Size           | Recommended Pump Size | Weight (lb) | Code No. | Price \$ |
|-----------------|----------------|-----------------------|-------------|----------|----------|

## Vacuum Pumps

- Oilless, motor-mount, rotary vane design for maximum performance with minimum upkeep
- Has internal mufflers and filters. The filters were specifically designed to be easily removed and replaced
- Built-in thermal overload protection
- Includes a support base, the proper fittings and six feet of reinforced hose

| Pump Model No. | Description               | Weight (lb) | Code No. | Price \$ |
|----------------|---------------------------|-------------|----------|----------|
| VCP-14-MM*     | 1/4 HP, hose and fittings | 31          | 251426   | 2,765.15 |

## Electromagnetic Chucks & Controls

- Top plate has 1/8" steel poles and 1/16" Stainless Steel separators
- Chucks are completely sealed against dirt and liquids
- Can be used on EDM machines
- Longitudinal (lengthwise) or transverse (crosswise) pole models available
- 2 clamps, back rail and side rail included
- Chuck controls must be used.

- Specifically matched to the input requirements of Suburban's electromagnetic chucks
- 115 volts AC input
- 0-110 volts DC output
- Controls with automatic release cycle free the operator from manual demagnetizing
- Automatic release models also have touchpad controls for easy operation

## Magnetic Surface Grinder Chucks

For use on surface grinders, chucks have laminated one piece top plates. Two tie down clamps, two rails and removable on/off handle included. Ceramic magnet cannot lose magnetism.

## Magnum Force™ Surface Grinding Chucks

- Made with ceramic magnets for superior holding power
- Stationary magnets in the top plate and a movable magnet core provide an average holding power of 90-100 pounds per square inch. This is twice the power of a standard chuck
- Chucks are lubricated and sealed against dirt and liquids
- A rigid work surface is provided by laminated and brazed top plate
- These chucks provide maximum holding power of both small and large parts, due to combination fine / standard pole spacing
- Low height for more work clearance
- Two hold-down clamps, one side rail and one end rail are included

## Round Permanent Magnetic Chucks

- Permanent ceramic magnets for superior holding power, never lose their strength
- Back surface of the aluminum chuck body has tapped holes and turned counterbore for convenient mounting on machines
- All models are watertight except 5-1/4" dia. which uses the swing-type on-off method
- Standard pole models have 1/4" poles and 1/8" separators, fine pole models have 1/8" poles and 1/8" separators

## Magnetic Toolmakers' Chucks

- All models precision ground flat, square and parallel to an overall accuracy of 0.0005"
- Top, bottom and end magnetize simultaneously
- Model MTC-VB has "V" capacity of 2-3/4" diameter
- Model MTC-LFP has 3/16" x 1/16" fine pole construction for holding small or thin parts; and removable side and end rails

| Model No.  | Length | Width  | Height | Weight (lb) | Code No. | Price \$ |

## Collet Master™ Index Fixture

- 48 index positions, +/- 45 arc seconds every 7-1/2 degrees
- Uses all standard 5C collets
- Two sealed, pre-loaded ball bearings in spindle
- Hardened and Ground base held square and parallel to spindle within 0.0002"
- Maximum spindle runout is 0.0001"
- Drawbar and fitted wooden case included
- Optional faceplate and V-block available for eccentric forms

| Model No. | Centre Height | Overall Length | Indexing Accuracy | Weight (lb) | Code No. | Price \$ |
|-----------|---------------|----------------|-------------------|-------------|----------|----------|
| CM-5C     | 3-5/8"        | 6-1/2"         | +/-45 Sec.        | 9 lb        | 251550   | 2,739.05 |

## Optional Faceplate & V-Block For Collet Master Index Fixture

- Optional faceplate and V-block available for eccentric forms

| Model No. | Faceplate Diameter | V-Block Capacity | Weight | Code No. | Price \$ |
|-----------|--------------------|------------------|--------|----------|----------|
| CM-5C-FVB | 6-1/2"             | 1-3/8"           | 15 lbs | 251552   | 1,294.85 |

## Mini-Master™ Index Fixture

- 72 position index plate allows an index every 5 degrees +/-15 arc seconds.
- Spindle rides in sealed, preloaded ball bearings
- Light weight for easy handling
- Uses standard ER-25 spring collets
- Spindle runout 0.0002" T.I.R.
- 3" height is ideal for small machine set-ups
- Hardened steel base is ground square and parallel with spindle axis within 0.0002"
- Fitted wooden case included

| Model No. | Centre Height | Collet Capacity | Through Hole | Weight (lb) | Code No. | Price \$ |
|-----------|---------------|-----------------|--------------|-------------|----------|----------|
| MM-25R    | 1-7/8"        | All ER-25       | 5/8"         | 4 lbs       | 251566   | 2,050.30 |

## Spin-Master™ Index Fixture

- Uses standard 5C collets
- 2-5/16" spindle travel for flute grinding
- Runout on hardened and ground spindle is 0.0005" T.I.R.
- 3-7/8" x 4-5/32" base ground parallel to spindle
- Sides of base ground parallel to spindle axis
- Index plate with 36 holes for direct indexing in 10° steps and is graduated in 5° increments. 10 vernier holes provide 1° indexing

| Model No. | Centre Height | Collet Capacity | Through Hole | Weight (lb) | Code No. | Price \$ |
|-----------|---------------|-----------------|--------------|-------------|----------|----------|
| SM-5C     | 2-3/4"        | All 5C          | 1-1/4"       | 15 lbs      | 251564   | 1,840.05 |

## 5C Spin Index

### Accepts 5C Collets to 1-1/8" Capacity

- A multi-purpose accessory
- Vernier setting to 1 degree
- 2-1/16" spindle travel for flute grinding
- Index plate has precise (10°) 36 hole circle

| Model No. | Code No. | Price \$ |
|-----------|----------|----------|
| C1-310    | 326110   | 160.48   |

| Specifications                                  | Max. Variation Inches |
|---|-----------------------|
| True running of dividing spindle flange surface | 0.0004"               |
| True running of cylindrical centre bore per 1"  | 0.0012"               |
| Parallelism of spindle centre line to base      | 0.0008"               |

## Horizontal/Vertical 5C Collet Index

The Spindle has a taper seat in the body frame. Rapid opening and closing of the collet on a production basis is done with the lever collet closer having a leverage ratio of 100 to 1. A ratchet device on the front of the spindle permits rapid rotation of the spindle nose. The index plate has a screw in each of the 24 index holes so that holes not required for a particular job can be masked. Threaded spindle 2-1/4" - 8TPI.

## Low Profile Radius & Angle Dresser

**QUALITY  
IMPORT**

An extremely accurate and versatile unit which may be used on all OD, ID and surface grinding operations. Knob "A" controls radius dressing and Knob "B" controls angle dressing. At no time are the hands near the point of contact. All moving parts are lapped and the unit has adjustable gibs for take of future wear.

## V-TDB Radius & Angle Dresser

**STM**

- Positive setting of the diamond to absolute centre with the special gauge included with the dresser
- One push-pull type knob for radius and angle control and for safer and faster operations
- 4 x 90° graduation in full 360° circle. 6 minute vernier reading
- Net weight: 10.5 kg
- Chrome plated

|                               | Model No. | Code No. | Price \$ |

## Yuasa Radius & Angle Dressers

**YUASA**

- Extremely accurate and versatile
- Useable on all OD / ID surface grinding operations
- Independent or simultaneous radii and angular operation
- Adjustable gibs
- All moving parts are lapped
- Gauge block setting for precise radii
- Knob A controls radii and Knob B controls angular movements

## Lift Master™ — Permanent Magnetic Lifts

- Allows one person to do the material loading and handling that once required two or more
- Uses max-C-mag ceramic magnets to ensure powerful holding force, with no chance for demagnetization
- Quick-release handle disengages the lift with a simple cam action
- Grips and holds any ferrous material instantly
- Designed for efficient, trouble free, low maintenance service

| Model No. | Length | Width | Height | Max Lift Cap. (lb) | Weight (lb) | Code No. | Price \$ |
|-----------|--------|-------|--------|--------------------|-------------|----------|----------|
| LM-800    | 6-5/8  | 3-3/8 | 2-1/2  | 800*               | 20          | 251873   | 1,924.69 |

\* Capacity based on clean, flat rigid CRS. Derate for other conditions.

## Magnetic Lifter

- Work is held and released very smoothly
- Most suitable to move materials or semi-finished products such as black steel plate, flat iron and other materials

VML-140

## Permanent Magnetic Lifters

### Features:

- Faster and safer than using straps and slings
- Beveled surface for lift round objects
- Magnets are maintenance free and never wear out
- Magnets have built-in safety factor of 3.5 times the rated load. Do not lift more than the maximum rated load

## Punch Former — YCT-PS

### Features:

- YCT-PS can pass through from itself to the centre of grip, in case of facing a longer punch ejector pin, it can go deep into the grip position
- To assemble an arm with the main body, any combination of radii of the grinding wheel may be dressed accurately by easy operation
- The longer punch can also be ground

| Style        | Code No. | Price \$ |
|--------------|----------|----------|
| Through hole | 230735   | 3,619.89 |

## Punch Former — YCT-PB

### Punch former is the great dressing instrument.

Precision forming of grinding wheels can be done by assembling an arm with the main body. Any combination of tangents or radii form of the grinding wheel may be dressed accurately by easy operation. Maximum grinding wheel diameter of 200mm can be dressed accurately and safely. The height from the base to roller's centre is 80mm. Movement of each side can reach 12.5mm while aiming at the centre of V-block. The main body is one-piece steel construction.

### Features:

- Punch former is the fixture to grind the point of standard punches and E.D.M. electrodes for precise and fast operation
- Besides the round, radius and multi-angle punches, any special forms can be ground precisely
- By using this attachment, it can be ground either concave or convex radius shape
- Capacity from 4mm to 30mm

| Style   | Code No. | Price \$ |
|---------|----------|----------|
| Off set | 230730   | 4,543.82 |

## Suburban Master-Grind™

### 5C Collet and V-Block Combination

- Built-in sine bar for setting angles between hard index locations
- 2 heavy duty 4" diameter tapered roller bearings in spindle
- Spindle runout 0.00005"
- Square and parallel within 0.0002"
- Extra large 1-5/8" V-block capacity
- Horizontal or vertical V-block mounting
- 72 position index plate for hard index every 5° +/- 15 arc seconds
- Fitted wooden case included

| Model No. | V-Block Capacity | Collet Capacity | Through Hole | Centre Height | Base Height | Base Length | Base Width | Weight | Code No. | Price \$ |

## Suburban Master-Grind™ Accessories

### Motor Drive Kit:

- 1/15 HP, reversible, variable speed, 60 to 300 rpm
- Can be mounted on either side of the index fixture
- Includes mounting bracket, motor pulley, drive belt and screws

### Baseplate and Tailstock

- Tailstock has 1/2" diameter spring loaded centre with lock screw
- 1/2" 5C collet and steel 60° headstock centre included
- Base plate and edge guide are hardened and ground

## DM213 Fast Drill Sharpener 13mm Capacity

### Patented Features

- Double-bearing grinding unit (reduces wear)
- Drill tightening design with bearing device
- Adjustable trimming angle

### Standard Accessories

- ER20 Collets, ranged from 2.0mm-13mm (12pcs)
- CBN wheel #200x1pc (for High Speed drill)
- 4mm and 5mm Hexagon (Hex.) wrench x 1pc each

## Chip Collector with Flexible Arm

### Flexible Magnetic Pick-Up Tool

- 21" in length
- 12 lb capacity

| Model No. | Code No. | Price \$ |
|-----------|----------|----------|
| VCC-20    | 230640   | 70.54    |

## Chip Hooks — SP2500 & SP2550

For removing chips and clean the chip trays on your machines. Black finished steel hooks.

The Chip Hooks include a plastic protective guard.

NogaGrip Handle designed for maximum comfort in your hand.

| Model  | Length | Code No. | Price \$ |
|--------|--------|----------|----------|
| SP2500 | 400mm  | 165488   | 42.70    |
| SP2550 | 600mm  | 165490   | 48.32    |

## Magnetic Chip Collector

- Wide variety of applications
- Most suitable for collecting iron pieces scattered on the floor or mixed in a medium
- Magnetic force is turned ON/OFF by operating the hand lever
- Powerful magnet with a wide attractive surface
- Material of outer cover: Aluminum

| Model  | Dimensions   | Magnetic Force | Weight (kg) | Code No. | Price \$ |
|--------|--------------|----------------|-------------|----------|----------|
| VCP-15 | Ø112mmx178mm | 0.9kg          | 1.9         | 230650   | 641.87   |

## Mini Handy Magnetic Chip Collector

- Permanent magnet
- Pull handle for easy release
- Made of impact-proof plastic
- Easy to pick up hand tools, small iron or steel parts in the office, house or factory
- Material of outer cover: Plastic

| Model  | Dimensions   | Magnetic Force | Weight (kg) | Code No. | Price \$ |
|--------|--------------|----------------|-------------|----------|----------|
| VCC-16 | Ø110mmx190mm | 4.9kg          | 0.7         | 230655   | 118.87   |

## Chip Collector with LED Light & Flexible Arm

### Flexible Magnetic Pick-Up Tool

- LED light
- 21" in length
- 0.7 lb capacity
- 2pcs 1.5V batteries

| Model No. | Code No. | Price \$ |
|-----------|----------|----------|
| VCC-21    | 230645   | 72.88    |

All products below are F.O.B. Sowa Tool Kitchener.

## Oak Green-LPH

Oak Green LPH Floor Cleaner is a water based floor cleaner developed for use in automatic floor scrubbers, mop buckets and spray bottles. It offers enhanced detergency to remove oils, greases, soot and shop dirt from floors, steps and walkways.

| Description            | Code No. | Price \$ |
|------------------------|----------|----------|
| Oak Green-LPH 19L Pail | 659715   | 105.07   |

## Cimclean 30

Recommended for cleaning individual machine tanks and central system reservoirs, metalworking fluid lines, machines and parts.

| Description          | Code No. | Price \$ |
|----------------------|----------|----------|
| Cimclean 30 20L Pink | 659720   | 205.62   |

## Cimtap II Tapping Fluid

General purpose tapping fluid for both ferrous and non-ferrous metals.

| Description                | Code No. | Price \$ |
|----------------------------|----------|----------|
| 16oz Bottle Cimtap II Pink | 659730   | 15.54    |
| 4L Jug Cimtap II Pink      | 659735   | 54.31    |
| 20L Cimtap II Pink         | 659620   | 225.26   |

## Cimtap H.D. Tapping Fluid

Cimtap H.D. is the most heavy duty tapping oil recommended for both ferrous and non-ferrous metals.

| Description      | Code No. | Price \$ |
|------------------|----------|----------|
| Cimtap H.D. 16oz | 659750   | 29.44    |

## Cimtap Paste Tapping Compound

Cimtap Paste is a general purpose tapping paste recommended for both ferrous and non-ferrous metals.

| Description               | Code No. | Price \$ |
|---------------------------|----------|----------|
| Cimtap Paste - 1 Pint     | 659740   | 12.28    |
| Cimtap Paste (Case of 24) | 659745   | 286.03   |

# Adjustable Coolant Hose System

Length and angle can be freely adjusted, suitable for most fluids (liquids and gases), hose orifice can be changed as needed. Can be used for air or for water/oil supply to metal processing machinery.

- Made of Dupont 100P material; this highly rigid yet resilient acetal (POM) is strongly resistant to oils and chemicals
- Adjustable Coolant Hose is highly pliable; it holds its shape well and will not spring back
- Bending hose will not reduce inner diameter; hose will not pinch or fatigue
- Adjustable Coolant Hose will not damage cutting blades if there is accidental contact
- Adjustable Coolant Hose does not conduct electricity and is suitable for use on electrical discharge (EDM) machines
- Four kinds of inner diameter are available: 1/4", 3/8", 1/2", 3/4"
- Adjustable Coolant Hose is designed for the transport of low-pressure fluids

### Installation of Adjustable Coolant Hoses

It's simple and easy to install Adjustable Coolant Hoses using the special pliers. The pliers can also be used to take apart the hose.

## Total Control Units

The **Total Flow Control Unit** can be installed on all types of mechanical equipment to control water flow. It is easy to install and makes the machine more aesthetically attractive. Ensure convenient flow control.

### Standard Control Unit

# COOLING SYSTEM

**NOGA MINICOOL** is using the VENTURI principle to spray an air + liquid mixture. It consists of the following basic elements: A control valve, spray unit, air line, syphon line and a powerful on/off Popeye magnet, which has a "V" form base, making it possible to mount on non-flat surfaces. The MINICOOL enables the user to easily control both the air flow rate and liquid rate. Stainless steel armoured syphon hose and air hose are made in standard lengths: 1m, 2m, 3m (special lengths available upon request). The spray unit comes in three standard lengths: 264, 334, 479 mm (special lengths available upon request).

### NogaCool — MC1601

NOGACOO consists of a manifold & Loc-Line® flexible hose with a nozzle on top and a valve at the bottom. Assembled on the powerful ON/OFF POPEYE magnet. The plug attached can be replaced by a second Loc-Line® hose. NOGACOO is supplied with a set of three nozzles: 1/16", 1/8", 1/4".

Working conditions are as follows: Pressure: 2-3.4 Bar (30-50 psi), Flow rate: 940 l/hour (250 gal/hour) Max. Working Temp. 170°C.

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| MC1601 | 165462   | 47.99    |

### Noga Minicool — MC1700

NOGA Minicool is using the VENTURI principle to spray an air + liquid mixture. The Minicool enables the user to easily control both the air flow rate and liquid rate.

- Strong magnetic base
- Separate on/off air and fluid control
- Stainless steel armoured syphon hose and air hose
- Simple, inexpensive, rugged
- Nozzle connected via Loc-Line® flexible hose
- Single spray unit

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| MC1700 | 165461   | 125.99   |

### Noga Minicool — MC3000

NOGA Minicool is using the VENTURI principle to spray an air + liquid mixture. The Minicool enables the user to easily control both the air flow rate and liquid rate.

- Strong magnetic base
- Separate on/off air and fluid control
- Stainless steel armoured syphon hose and air hose
- Simple, inexpensive, rugged
- Nozzle connected via Loc-Line® flexible hose
- Two spray units

## How to Order

When ordering Kinik standard grinding wheels, specify your selection in this order:

### Wheel Shape and Face

- Dimensions**
- (1) Diameter (D)
  - (2) Thickness (T)
  - (3) Hole size (H)

- Wheel Specifications**
- (1) Abrasive
  - (2) Grit Size
  - (3) Grade
  - (4) Bond
  - (5) Quantity

### Abrasives

| Symbols        | Characteristics   |
|----------------|---|
| <b>A</b>       | Regular aluminum oxide, hard and tough. Suitable for mild steel, case-iron etc in rough grinding  |
| <b>10A</b>     | The prime regular aluminum oxide, hard and tough. It is suited for cylindrical grinding of unhardened steels.                               |
| <b>WA, 38A</b> | White aluminum oxide, hard and brittle. Suitable for all kinds of steel grinding.   |
| <b>32A</b>     | Strong sharp monocrystalline aluminum oxide. Suitable for all kinds of tool precision grinding.   |
| <b>FA, 57A</b> | Semi-friable, with a grinding action intermediate A and WA. Suitable for cylindrical grinding of steel parts.                               |
| <b>PA</b>      | Pink aluminum oxide is suitable for tool grinding and surface grinding.   |
| <b>RA</b>      | Ruby aluminum oxide, hard and less brittle than PA. Suitable for high alloy steel etc. in precision grinding.                               |
| <b>PSA</b>     | Special pink abrasive similar to 32A. Suitable for all kinds of hard steels in precision grinding.  |
| <b>AZ</b>      | A modified high zirconia aluminum oxide. Used in foundries snagging cast iron and steels for heavy duty work.                               |
| <b>C</b>       | Black silicone carbide. Used for grinding gray iron, non-ferrous metals, and non-metallic materials such as glass, rubber, stones etc.      |
| <b>CSKG</b>    | Blue Ceramic. Fast stock removal excellent cutting. 5X more life than aluminum oxide wheels.  |
| <b>GC</b>      | Green silicone carbide is well suited for special alloy grinding such as tungsten carbide, cold rolled steels, sapphire, glass and granite. |

# GENERAL INFORMATION ON GRINDING WHEELS

### Note:

Wheels are available in both metric and imperial dimensions.

### Standard Wheel Markings

For clarity as well as to avoid mistakes in wheel selection, a standard designation of wheel specifications was developed and was inscribed by ISO in 1995. Standards such as CNS of the R.O.C., JIS of Japan, ANSI of U.S.A. and DIN of Germany all employ this uniform standard.

Wheel marking includes the following information:

| WA       | 46   | K     | 8         | V         | 7N           |
|----------|------|-------|-----------|-----------|--------------|
| Abrasive | Grit | Grade | Structure | Bond Type | KINIK Symbol |

### Bond Type

| Symbols                              | Characteristics  |
|--------------------------------------|--|
| <b>V</b><br>(Vitrified)              | Most common bond for precision grinding porosity and strength. Wheels made with this bond give high stock removal and their rigidity helps attain high precision. Not affected by water, acid oils or ordinary temperature.  |
| <b>B</b><br>(Resinoid)               | Used for wheels in fabrication shops, foundries, billet shops, sharpening and gumming saws, and in many precision applications. These wheels excel in rapid stock removal as well as in applications requiring better finishes. This bond is also restricted to reinforced resinoid products, cut-off wheels or specialty formulated products. |
| <b>R</b><br>(Rubber)                 | Used for most centreless feed wheels, precision ball race grinding wheels and for snagging with portable grinders. Used where finish is important and for cut-off wheels where burr and burn must be kept to a minimum.  |
| <b>Mg</b><br>(Magnesium Oxychloride) | A notable bond used for cutlery or particularly thin workpieces, marble surface grinding and superfinishing.   |

**Grades:** Grades indicate the relative strength of the bond which holds the abrasive grains in place

| Very Soft  | Soft       | Medium     | Hard       | Very Hard           |
|------------|------------|------------|------------|---------------------|
| D, E, F, G | H, I, J, K | L, M, N, O | P, Q, R, S | T, U, V, W, X, Y, Z |

### Grit (CNS and JIS STANDARD)

| Coarse |    |    | Medium |    |    | Fine |     |     |     | Very Fine |     |     |     | Ultra Fine |      |      |      |
|--------|----|----|--------|----|----|------|-----|-----|-----|-----------|-----|-----|-----|------------|------|------|------|
| 10     | 12 | 14 | 30     | 36 | 46 | 70   | 80  | 90  | 100 | 240       | 280 | 320 | 400 | 1000       | 1200 | 1500 | 2000 |

# CERAMIC GRINDING WHEELS

- HIGH PERFORMANCE CERAMIC ALUMINUM OXIDE
- UP TO 5X LONGER LIFE THAN WHITE ALUMINUM OXIDE WHEELS
- SUPERIOR STOCK REMOVAL RATES, LONG WHEEL LIFE REDUCING GRINDING COSTS
- MAXIMUM RESULTS FOR:
  - TOOL SHARPENING  
HSS & TOOL STEEL <68HRC
  - SURFACE GRINDING  
HSS & TOOL STEEL <68HRC, 300 & 400 SERIES  
STAINLESS STEEL, CAST IRON: DUCTILE & GRAY,  
NON-FERROUS ALLOYS

## Kinik Ceramic Surface Grinding Wheels

### Peripheral Surface Grinding

Surface grinding with straight or recessed wheels on machines with a rotating or reciprocating table results in a larger contact area than in cylindrical grinding. Therefore it is necessary to use softer grade wheels, particularly when large diameter and/or wide wheels are used. When grinding a large number of components, the grinding is not continuous. In this case the components tend to dress the wheel, so a harder grade wheel should be used.

| 3"       | 50   | 920868   | 2.06     |

## Quick Change Disc, Multibond QRC 409

- Bonding Agent: Resin
- Alumina Zirconia
- Coating: Close
- Applications: Metal, Stainless Steel

| Diameter | Grit | Code No. | Price \$ |
|----------|------|----------|----------|
| 2"       | 80   | 920879   | 1.66     |

## Back-Up Pads QRC 555

- Shorter set-up times
- More effective abrasive performance
- Wide range of applications
- Uniform sanding results

| Shank Size | Density | Maximum RPM | Code No. | Price \$ |
|------------|---------|-------------|----------|----------|
| 2" x 1/4"  | Medium  | 30,000      | 920886   | 24.40    |
| 3" x 1/4"  | Medium  | 30,000      | 920887   | 30.83    |

## Quick Change Discs QMC 411

- Bonding Agent: Resin
- Alumina Zirconia
- Coating: Close
- Applications: Metal, Stainless Steel

| Diameter | Grit | Code No. | Price \$ |
|----------|------|----------|----------|
| 2"       | 36   | 920903   | 1.63     |

## 105° Die Grinder — TP-9059

- Air Inlet (N.P.T.): 1/4"
- Air Consumption (Loading): 13 cfm
- Exhaust System: Rear
- Aluminum Alloy Housing

| Horse Power | RPM   | Collet Size | Air Pressure (psi) | Overall Length (in.) | Net Weight (lb) | Code No. | Price \$ |
|-------------|-------|-------------|--------------------|----------------------|-----------------|----------|----------|
| 0.9         | 9,000 | 1/4"(6mm)   | 90                 | 9-1/4                | 2.28            | 174056   | 387.56   |

## 1/4" Die Grinder Kit (with Throttle Lever)

### Contains:

- 1pc TP-1008 Grinder
- 1pc 1/8" (3 mm) collet
- 1pc 1/4" (6 mm) collet
- 2pcs spanners
- 5pcs 1/4" (6 mm) shank grinding
- 5pcs 1/8" (3 mm) shank grinding

| Description                   | Code No. | Price \$ |
|-------------------------------|----------|----------|
| 1/4" straight die grinder kit | 174004   | 117.44   |

## 1/4" 90° Die Grinder Kit (with Throttle Lever)

### Contains:

- 1pc TP-1014 Grinder
- 1pc 1/8" (3 mm) collet
- 1pc 1/4" (6 mm) collet
- 2pcs spanners
- 5pcs 1/4" (6 mm) shank grinding
- 5pcs 1/8" (3 mm) shank grinding

| Description              | Code No. | Price \$ |
|--------------------------|----------|----------|
| 1/4" 90° die grinder kit | 174006   | 197.59   |

## Air Micro Die Grinder

### Contains:

- 1pc TP-501-1 Grinder
- 1pc 3 mm collet
- 10pcs 1/8" (3 mm) grinding stones
- 2pcs spanners
- 1pc blow case

| Description          | Code No. | Price \$ |
|----------------------|----------|----------|
| 1/8" die grinder kit | 174002   | 280.23   |

## Air Belt Sanders

- For sanding both curved and flat surfaces
- For removing spot welding, semi-automatic welds, adhesive, paint, and other coatings

| Model   | Belt Size (mm) | Speed (RPM) | Length (mm) | Weight (kg) | Code No. | Price \$ |
|---------|----------------|-------------|-------------|-------------|----------|----------|

## 10 Piece Needle File Set

- Used for deburring, shaping and finishing
- Used for fine detailing or finishing

| Description              | Code No. | Price \$ |
|--------------------------|----------|----------|
| 10 Piece Needle File Set | 200761   | 11.07    |

## 10 Piece Diamond File Set

- Used for precision filing and shaping
- Electroplated with a diamond abrasive
- Highly durable when used on harder materials
- Excellent for material removal

| Description               | Code No. | Price \$ |
|---------------------------|----------|----------|
| 10 Piece Diamond File Set | 200763   | 17.58    |

## Safety Air Blow Gun

- 4-1/2" stainless steel nozzle
- Conforms to OSHA STD 1-13.1 for safety
- Operating pressure: 50-235 psi
- Vent in tip prevents pressure from exceeding 30 psi if tip becomes blocked
- Impact and weather resistant nylon body
- Operating temperature: -10° to 70° C

| Model        | Noise Level (100psi) | Blowing Force (100psi) | Air Consumption (100psi) | Code No. | Price \$ |
|--------------|----------------------|------------------------|--------------------------|----------|----------|

# DEBURRING SYSTEMS

## Promo N Noga Set — NG8000

- For Steel, Aluminum and Plastic
- Noga Grip 2 handle & 10pcs N1 (B10) blades

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| NG8000 | 165474   | 25.67    |

## N Cobalt Set — NG8100

- For Plastic and Hard Materials
- 1 Noga Grip 2 handle & 20pcs N10 (B10) Cobalt blades

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| NG8100 | 165466   | 54.59    |

## Promo S Noga Set — NG8150

- For Steel, Aluminum and Plastic
- Noga Grip 1 handle & 10pcs S10 (E100) blades

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| NG8150 | 165464   | 27.91    |

## S Golden Noga Set — NG8152 TiN Coated

- For Abrasive Materials
- Noga Grip 1 handle & 10pcs S10 TiN Coated blades

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| NG8152 | 165460   | 44.06    |

## N Economy Set — NG8050

- For Steel, Aluminum and Plastic
- Noga Grip handle & 20pcs N1 (B10) blades

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| NG8050 | 165478   | 38.90    |

## N Golden Noga Set — NG8002 TiN Coated

- For Steel, Aluminum and Plastic
- Noga Grip Handle 10 N1 TiN Coated blades

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| NG8002 | 165465   | 36.21    |

## B10 Noga Set — SG6000

- For Steel, Aluminum, and Plastic
- Noga Grip 2 Handle & 20pcs B10 blades

| Model No. | Code No. | Price \$ |
|-----------|----------|----------|
| SG6000    | 165300   | 38.90    |

## Deburring Tool — SG1000

### Contains:

- Ergonomic soft grip SG handle
- S100 and N10 blades

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| SG1000 | 165380   | 24.32    |

## Noga Burr 3 — NB3000

- Multi-functional tool deburrs round parts, small holes and straight edges
- Blades are easily changed and stored in handle

### Contains:

- Handle and 3 "S" blades (165024, 165026, 165030)

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| NB3000 | 165370   | 22.08    |

## Liza Burr — LB1000

- Double sided blade holder
- Accepts all "N" and "S" blades
- Standard tool includes uni-handle
- To lock holder in position turn black ring clockwise

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| LB1000 | 165010   | 24.89    |

## Rapid Burr — RB1000

- Economical version of the Noga Burr
- Utilizes replaceable blades only without spare blade storage

| Model                     | Code No. | Price \$ |
|---------------------------|----------|----------|
| RB1000                    | 165006   | 16.14    |
| RB1005 (RB1000+S20 Blade) | 165130   | 19.62    |

## Edge Off — E02000

### Contains:

- Plastic handle and S10 blade, holds all types of "S" blades. (blades can be replaced)

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| E02000 | 165375   | 5.94     |

## Noga Burr 1 — NB1100

- Blue plastic handle and S10 blade

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| NB1100 | 165390   | 14.12    |

## Noga Burr 5 — NB5000

- Multi-functional tool deburrs round parts, small holes and straight edges
- Blades are easily changed and stored in handle
- Set includes blades 1pc ea.: 165024, 165026, 165030, 165032, 165034

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| NB5000 | 165004   | 26.46    |

## Super Burr — SB1000

- Similar to the Liza-Burr but with heavy duty blades for heavy duty jobs

### Contains:

- Uni-handle, SN-holder, S100, S20, S30 blades

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| SB1000 | 165001   | 32.17    |

## Teddy Burr — TB1000

- Slim-grip design allows deburring in hard to reach locations
- Holds all "N" (2.6mm) blades
- Easy to replace blades with handy pocket clip

### Contains:

- N1 blade and 8mm hexagonal painted handle

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| TB1000 | 165031   | 13.79    |

## Edge-Off Disposable Deburring Tool — E01000

- Handy tool fits in shirt pocket
- Equipped with a non-removable 165024 blade
- Pocket clip included

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| E01000 | 165008   | 9.30     |

### H.D. Keyway Burr — KW1300

- Most useful for wide, deep or shallow keyways
- Range: 3-15mm

**Contains:**

- Uni-handle, K-holder, N90K blade

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| KW1300 | 165003   | 27.91    |

### H.D. Keyway Burr — KW1000

- Effectively solves the problem of deburring keyways, internal and external
- Blade can be reversed to extend life

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| KW1000 | 165018   | 26.80    |

### Double Burr (Sheet Metal) — DB1000

- Dual purpose tool for machinists and sheet metal workers
- Deburr both sides of sheet metal simultaneously
- Blades adjustable up to 3/8" thickness
- Can be used with one blade in centre for deburring edges of blocks
- Blades can be rotated to extend life
- Standard tool includes: handle, two 165042 blades

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| DB1000 | 165016   | 39.91    |

### Noga "V" Cut — NC1000

- Simple and safe for use with hand guard, which is available on request
- Most economical tool for sheet metal range 1-8mm

**Contains:**

- Uni-handle, LD-holder, and L3 blade

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| NC1000 | 165011   | 31.05    |

### Countersink — CS1000

- 20mm diameter countersink
- Uses 140mm hex. blade holder which can be locked into any position
- Useful for chamfering deep holes
- Standard tool includes Unihandle and hex. blade holder

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| CS1000 | 165012   | 56.15    |

### Reversible Countersinks — RC2000 & RC2200

- RC2000 Range: 5-9mm
- RC2200 Range: 10-22mm
- Similar to RC1000 only larger
- Patented

**Contains:**

- Handle and R2 (RC2000) or R3 blade (RC2200)

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| RC2000 | 165029   | 51.00    |
| RC2200 | 165182   | 60.64    |

### Reversible Mini Countersink — RC1000

- Unique 2 pair of cutting edges
- For chamfering, hold tool between fingers and thumb and rotate back and forth
- Fine tool for deburring both back side and front side of holes
- Blade has two working positions
- Range: 3-5.5mm
- To insert/withdraw blade into/from hole, push knob and release slowly

**Contains:**

- Handle and small R1 blade

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| RC1000 | 165027   | 51.00    |

### H.D. Rotodrive — RD7000

- Has cranked blade holder with M7 thread
- Accepts C12, C20 and C30
- 56mm displacement allows for heavy duty burrs to be removed
- Continuous rotation of countersink enables very fast chamfering

**Contains:**

- Uni-handle, H.D. rotodrive holder, and C20 countersink

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| RD7000 | 165002   | 60.20    |

### Fixed Rotodrive — RD1040

- The quickest way to chamfer by hand
- Single flute countersink provides a smoother cut
- Patented

**Contains:**

- NB-handle and 10.4 rotodrive countersink

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| RD1040 | 165022   | 47.52    |

## Scraper — SC1000

- Heavy duty scraper
- Triangular double ended blade
- Blade can be locked into the handle at desired length

**Contains:**

- Unihandle, 3/4" scraper blade

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| SC1000 | 165014   | 38.34    |

## Mini-Scraper — MS1000

- Ideal for tool and die makers
- Hollow ground

**Contains:**

- Uni-handle, D-holder, triangular mini-scraper D50
- D50 scraper is held in the D-holder by means of wedge action

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| MS1000 | 165005   | 33.07    |

## Internal Scraper — IS1000

- For the deburring of cross-holes
- D66 scraper is held in the D-holder by means of wedge action

**Contains:**

- Uni-handle, D-holder, internal scraper D66

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| IS1000 | 165007   | 30.72    |

## Adjustable Scraper — SC8000

- Protected by plastic cap
- 5mm medium size scraper
- Knurled locking collar to control blade extension

**Contains:**

- 12mm anodized handle, T80 double ended triangular scraper

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| SC8000 | 165033   | 34.52    |

## Adjustable Mini Scraper — SC7500

- Protected by plastic cap
- 3.2 x 75mm triangular scraper
- Ideal for tool and mold making

**Contains:**

- 12mm anodized handle, D75 triangular scraper

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| SC7500 | 165035   | 32.17    |

## Noga Mini Cut — NG3220

- Used for deburring small ridges in difficult to reach places
- Range of 0-2.5mm makes this tool very unique

**Contains:**

- Uni-handle, LD-holder, L4 blade

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| NG3220 | 165479   | 29.92    |

## Leader — LD1000

- Safe and easy to use
- Ensures 45° chamfers
- Chamfers straight or curved edges

**Contains:**

- Uni-handle, L-holder, L1 blade

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| LD1000 | 165013   | 31.62    |

## Noga "O" Ring Burr — KW2000

- Range: 0-3mm (groove width)
- Removes burrs from internal "O" ring grooves
- Patented

**Contains:**

- NB-handle, OR blade

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| KW2000 | 165019   | 29.71    |

## Thread Cleaner — TC1000

- For repair and cleaning damaged internal threads
- 9mm minimum diameter
- Works well on all threads and pitches
- Patented

**Contains:**

- NB-handle, TC blade

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| TC1000 | 165017   | 24.77    |

## Deburring Accessories

| Item | Description   | Range                  | Code No. | Price \$ |
|------|---|------------------------|----------|----------|
| D50  | Mini-scraper; most suitable for miniature components                                  | HSS 3mm                | 165100   | 13.56    |
| D66  | Internal scraper; most useful on cross holes  | HSS 3.2mm              | 165105   | 10.99    |
| N70K | Special square blade for small keyways (For shallow Keyways, one corner is truncated) | 1.2-8mm<br>3/64"-5/16" | 165120   | 11.66    |
| N90K | Heavy duty blade for wide keyways (similar to N70K)                                   | 3-15mm<br>1/8"-19/32"  | 165125   | 19.28    |

### MultiBurr — RG1000

Four of Noga's most popular multi-purpose blades in one innovative tool set.

- S10 blade (steel, aluminum, plastic)
- D50 scraper (ideal for tool and die makers)
- N2 blade (brass, cast iron)
- Rotodrive 90° countersink (1-10.4mm)

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| RG1000 | 165371   | 131.94   |

### Universal Handy Chuck Holder — PV1000

A 3-jaw chuck helps with the quick and secure clamping of a wide variety of tools, blades and blade holders such as scrapers, countersinks, files etc.

Hardness 58HRC  
Range: 0.5-8.0mm

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| PV1000 | 165484   | 98.98    |

### YT Handle — YT1000

The perfect grip on Noga Adjustable Scrapers, Needle Files, Pins & Drills

- Quick Change
- Fits every hand
- Flexible collet

Range: 2.2-4.5mm

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| YT1000 | 165486   | 11.44    |

### Chip Hooks — SP2500 & SP2550

For removing chips and clean the chip trays on your machines. Black finished steel hooks.

The Chip Hooks include a plastic protective guard.

NogaGrip Handle designed for maximum comfort in your hand.

| Model  | Length | Code No. | Price \$ |
|--------|--------|----------|----------|
| SP2500 | 400mm  | 165488   | 42.70    |
| SP2550 | 600mm  | 165490   | 48.32    |

### Soft Cut Ceramic Tool — NC5100

- Ideal for deburring soft abrasive plastics, (blade can be replaced)

**Includes:**

- Noga NC5100 holder & CR6100 blade

| Model            | Code No. | Price \$ |
|------------------|----------|----------|
| NC5100 holder    | 165492   | 51.79    |
| CR6000 65° blade | 165494   | 28.58    |
| CR6100 75° blade | 165496   | 28.58    |

### Cera-Cut — CR1100

- Ideal for deburring plastics and other soft materials
- Extremely long life

**Includes:**

- Ceramic blade mounted in a modified Soft Grip handle, (this blade cannot be replaced)

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| CR1100 | 165385   | 60.64    |

### Ceramic Tool — CR2000

- Ideal for all plastic materials and soft metals
- Ideal for cleaning surface and parting line flash

**Includes:**

- Cera-Cut handle and straight Cera-Cut blade, (blades can be replaced)

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| CR2000 | 165415   | 59.41    |

### Ceramic Double Burr — DB5000

- Removes burr from both sides of workpiece simultaneously
- Ergonomically designed handle with guard to protect you while you work

**Includes:**

- V-shaped blade mounted in a DB handle, (blades can be replaced)

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| DB5000 | 165410   | 82.51    |

## The Set — SP7700

The most popular deburring tools you need to carry for any deburring application. Packed in one handy box.

### Contains:

- Countersink NG3100, Mini Scraper NG3700, Noga V Cut NG3200, Adjustable Scraper SC8000, Keyway-Burr NG3300, Internal Scraper NG3710, Super Burr NG3003

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| SP7700 | 165482   | 241.79   |

## Noga Box — NX1000

Collected to meet the total requirements of the Tool and Die makers.

### Contains:

- Keyway burr; half round riffler file; round riffler file; flat riffler file; double-burr; D-key; uni-handle plus SN holder; C holder plus C20; C12; D holder plus D50; D holder plus D66; T120 scraper; L holder plus L1; N1 blade; S10 blade; S101 B blade; S20 blade

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| NX1000 | 165160   | 320.60   |

## NB Set — NB1900

For Steel, Aluminum and Plastic

### Contains:

- NB Handle
- 10pcs S10 blades

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| NB1900 | 165060   | 27.91    |

## Deburring Kit — SP1007

### Contains:

- RB Handle (12mm Hex. Aluminum Handle)
- OR ("O" Ring Grooves Blade)
- RD 16.5 (RotoDrive Countersink)
- RDE18 (External Rotodrive Countersink)
- TC (Thread Cleaner Blade)
- S100 Blade (for Steel)
- S150 Blade (for Plastic)

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| SP1007 | 165190   | 103.03   |

## Micro Deburring Set — FT3000

- Ideal for Tool and Die makers
- For extra fine jobs

### Contains:

- Micro Deburring Tool (FT1000)
- Micro Scraper (FT1100)
- Micro RotoDrive Countersink (FT1200)

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| FT3000 | 165135   | 61.88    |

## Magic Set — RB4000

The handle can hold both types of blades (rotating & fixed).

### Contains:

- Rapid Burr (RB1000) and modified D50 Mini Scraper
- Blade

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| RB4000 | 165480   | 29.38    |

## Unikit Special — UK2000

The Standard UNIKIT with the addition of the internal scraper and the 12mm countersink C12

### Contains:

- D holder plus D66; T120 scraper; uni-handle; SN holder; C holder plus C20; C12; N2 blade; N1 blade; S101 blade; S30 blade; S20 blade; S10 blade

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| UK2000 | 165150   | 177.22   |

## Unikit Extra — UK3000

### Contains:

- D holder plus D50, D66; T120 scraper; uni-handle; SN holder;
- C holder plus C20; C12; N1 blade; N2 blade; S101 blade; S30 blade; S20 blade; S10 blade
- L holder; L1; L2

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| UK3000 | 165168   | 233.16   |

## Rotodrive Combi Set — RD2001

Combination of RotoDrive and Universal deburring set.

### Contains:

- NB handle, 3.2 mm RotoDrive Countersink, 10.4 mm RotoDrive countersink, S10, S20, S30 blade, demo plate

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| RD2001 | 165165   | 95.06    |

## Plastic Edge-Off Set — E02100

### Contains:

- E0 handle + S10 blade, green sleeve (for aluminum)
- E0 handle + S20 blade, red sleeve (for brass & cast iron)
- E0 handle + S100 blade, blue sleeve (for steel)
- E0 handle + S150 blade, yellow sleeve (for plastic)

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| E02100 | 165440   | 24.32    |

## Noga Unikit — UK1000

Recommended for machinists and tool makers.

### Contains:

- 1 Liza-burr; 1 C20 countersink, 1 countersink holder; 1 scraper blade; 1 S10 blade; 1 S20 blade; 1 S30 blade; 1 S101 blade

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| UK1000 | 165020   | 128.46   |

## Blade Selection — General

- Ready-to-use blades included

- All blades are made of HSS

| Type     | Length (in.) | Fits Tool No. | Standard Pack | Code No. | Per Blade Price \$ |

## Blade Selection — Swivel Blades

- Ready-to-use blades included

**N1LH**

**165037**  
For left handed user

**N1 TiN**

**165039**  
TiN coated N1 for long life

**N1 C**

**165041**  
Solid carbide N1 for hardened steel and special plastics

**N2 C**

**165043**  
Solid carbide N2 for ceramic and glass

**N6**

**165045**  
For cross holes in difficult to reach places

**S10 LH**

**165047**  
For left handed users

**S10 TiN**

**165049**  
TiN coated S10 for long life

**S10 C**

**165051**  
Solid carbide tipped S10 for hardened steel and special plastics

**S100**

**165053**  
Cobalt combination blade best for plastics and hard materials

**S101 LH**

**165055**  
S101 for left handed users

**S101 TiN**

**165057**  
TiN coated S101 for long life

**S150**

**165059**  
Heavy duty shank, for holes as small as 1.5mm dia.

**S20 C**

**165061**  
Solid carbide tipped S20 for hardened materials

**S60**

**165062**  
Heavy duty for cross holes in difficult to reach places

**TC**

**165063**  
Patented for internal thread cleaning and deburring from 9mm

## Blade Selection — Diamond Coated Blades, Countersinks, And Reversible Blades

- Ready-to-use blades included

N1D

**165074**  
Diamond coated N1 for ceramic and glass

S10D

**165075**  
Diamond coated S10 for ceramic and glass

RDE 25D

**165080**  
External diamond coated RotoDrive for reinforced plastic, fiberglass and epoxy

D55

**165082**  
Solid carbide D50, fits adjustable scraper handle

D75

**165083**  
Similar to D50 but 75mm long, fits adjustable scraper handle

D77

**165084**  
Similar to D66 but 75mm long, fits adjustable scraper handle

T80

**165085**  
Double medium scraper blade for adjustable scraper

**165086**

Same as N80 but heat-treated to 68HRC, use for stainless steel

N80M42

**165087**

Same as N80K but heat-treated to 68HRC

N80KM42

### Reversible Blades

**165088**

For cross holes 3-5.5mm

R1

**165089**

For cross holes 5-9mm

R2

## Blade Selection — L-Blades & Handles & Holders

**L3**

**165090**  
Used with Leader  
for steel and aluminum

**L4**

**165091**  
Used for sheet metal  
1-8mm wide

**L5**

**165092**  
Used for ridges  
0-2.5mm wide

**L6**

**165093**  
Used for cleaning corners

**L7**

**165094**  
Double ended slot cleaner

**Uni Handle**

**165095**  
Holds round, hexagonal and triangular holders

**D Holder**

**165096**  
Holds D50 and D66 blades

**K Holder**

**165097**  
Holds N80K and N90 K on one side and N70K on the other

**LD Holder**

**165099**  
Holds L3, L4, L5, L6, L7 blades

**H.D. Cranked Holder**

**165101**  
Heavy duty  
cranked holder for C12, C20, C30

**L Holder**

**165098**  
Holds L1 blade

| Type                | Code No. | Per Blade Price \$ |

## Centre Punches

- Made of tool steel
- Black oxide finish for rust prevention
- Knurled body for better grip
- Hardened both ends, 45 to 52 HRC
- Points precision ground
- 4" length, 1/16" diameter, punch 3" long
- Set supplied in fitted case with clear size markings

## Mini Pistol Grease Gun

One hand pistol grip grease gun with convenient pull type operating mechanism

- Capacity: 3oz cartridge
- 3,500 psi
- Zinc plated finish
- Complete with 4" steel extension

| Model     | Code No. | Price \$ |
|-----------|----------|----------|
| G-16/ZN/N | 231382   | 50.50    |

## Pistol Grease Gun

One hand operated grease gun designed for use in confined spaces.

- Capacity: 14oz cartridge
- 5,000 psi
- Heavy duty aluminum die cast head
- 12" flexible hose

| Model | Code No. | Price \$ |
|-------|----------|----------|
| G5F/N | 231384   | 78.12    |

## Heavy Duty Lever Grease Gun

Top of the line grease gun designed for heavy industrial applications.

- Capacity: 14oz cartridge
- 10,000 psi
- Variable stroke feature
- High tolerance aluminum die cast head
- Complete with 6" steel extension

| Model    | Code No. | Price \$ |
|----------|----------|----------|
| G1R/HD/N | 231380   | 78.12    |

## 80pc SAE Grease Fitting Assortment

Contents:

- 1/8"-27 PTF - 25pcs straight, 10pcs 45°, 10pcs 90°
- 1/4"-28 SAE-LT - 15pcs straight, 10pcs 45°, 10pcs 90°

| Model          | Code No. | Price \$ |
|----------------|----------|----------|
| GFT/KIT/SAE-80 | 231386   | 112.23   |

## Lever Action Barrel Pump

Premium powder coated steel pump body with ribbed section aluminum die cast pump head for maximum strength.

- Built-in 1-1/2" and 2" bung for use on drums
- Plated steel lever handle with rubber grip
- Complete with curved metal spout and telescopic suction tube for use on 15-55 gallon barrels

| Model  | Code No. | Price \$ |
|--------|----------|----------|
| LBP/04 | 231388   | 110.15   |

## Hand Rotary Barrel Pump

- Dual Directional Operation allows the pump to both empty, as well as refill containers
- Extremely heavy duty and rugged
- Pump body is sturdy cast iron with precisely machined cast iron vanes for better draw and smoother delivery
- Fits 15-55 gallon barrels
- Complete with suction tube, 2" cast iron bung nut, and discharge spout

| Model         | Code No. | Price \$ |
|---------------|----------|----------|
| GNB-25/3R/SPL | 231390   | 220.05   |

## Aluminum Drum Wrench

An easy and convenient tool to open all types of drums. Ends of the wrench are designed to fit perfectly onto most 2" and 3/4" drum plugs.

- Hardened and tempered cast aluminum for increased strength
- Compact design for easy storage

| Model     | Code No. | Price \$ |
|-----------|----------|----------|
| DRW/AL-01 | 231398   | 46.01    |

## Lever Type Oil Cans

This series of oil cans have a modern and contemporary design with a dome shaped body. Most popularly used oil can style all over the world. Manufactured with a steel pump, powder coated red body, and a flexible wire braided extension.

| Model | Capacity | Spout Length | Code No. | Price \$ |

Corrosion resistant finish. Environmentally safe, provides better tool grip, resists solvents and is 5 times more corrosion resistant than competitor finishes.

Up to 20% stronger, with more torque and twice the wear resistance of standard grades of steel.

## Hex End L-Wrench Sets — Long — Inch

- Chamfered tool tips eliminate burrs and help tools seat in screw head
- Sharp corners transfer more torque to the screw and reduce stripping
- Precision machined for ease of use and superior fit
- ProGuard™ finish delivers superior corrosion protection

## Hex End L-Wrench Sets — Long — Metric

- Chamfered tool tips eliminate burrs and help tools seat in screw head
- Sharp corners transfer more torque to the screw and reduce stripping
- Precision machined for ease of use and superior fit
- ProGuard™ finish delivers superior corrosion protection

Corrosion resistant finish. Environmentally safe, provides better tool grip, resists solvents and is 5 times more corrosion resistant than competitor finishes.

Up to 20% stronger, with more torque and twice the wear resistance of standard grades of steel.

## Hex End L-Wrench Sets — Short — Inch

- Chamfered tool tips eliminate burrs and help tools seat in screw head
- Sharp corners transfer more torque to the screw and reduce stripping
- Precision machined for ease of use and superior fit
- ProGuard™ finish delivers superior corrosion protection

Corrosion resistant finish. Environmentally safe, provides better tool grip, resists solvents and is 5 times more corrosion resistant than competitor finishes.

Up to 20% stronger, with more torque and twice the wear resistance of standard grades of steel.

# BONDHUS® ClickSet™ TLD (Torque Limiting Device)

- Wide range of factory preset torque limiting handles – no adjustment needed
- When the preset torque level is reached, the mechanism slips and makes an audible “click”
- Protects from overtorquing
- Reduces fastener wear and stripping
- Reduces potential damage to carbide inserts
- Universal TORX® for TORX PLUS® and older style TORX® fasteners
- +/- 10% repeatability

## Handles

| Torque            | Bondhus EDP | Code No. | Price \$ |
|-------------------|-------------|----------|----------|
| 4.4 in-lb/0.5 Nm  | 50404       | 619554   | 60.86    |

Impermeable PTFE finish for extra corrosion protection

TuffKote™ finish

Replaceable blades snap into handle, simplifying blade replacement

ClickSet™ Torque Limiting Devices distribute the torque load along the handle, redistributing force over a larger surface for greater accuracy and longer tool life.

The Bondhus ComfortGrip handle features a durable thermoplastic core wrapped in cushioned rubber for increased comfort and torque

ClickSet™ Blades made with:

Up to 20% stronger, with more torque and twice the wear resistance of standard grades of steel.

## Ball End Screwdriver Sets

- Ball End inserts into screw at a 25° angle
- Ergonomic handle design
- Non-slip grip
- Two component handle with tough inner core and cushioned rubber exterior
- Anti-roll design
- ProGuard™ finish delivers superior corrosion protection

## 36pc Screwdriver & Bit Set

### Set contents:

- 4 Phillips®: #0, 1, 2, 3
- 1 Phillips® Stubby: #2
- 1 Offset Phillips®: #1, #2
- 5 Slotted: 5/32, 3/16, 1/4, 5/16, 3/8
- 1 Slotted Stubby: 1/4
- 1 Offset Slotted: 3/16, 1/4
- 4 Square Recess: #0, 1, 2, 3
- 2 Square Recess Stubby: #1, 2
- 1 Offset Square Recess: #1, 2
- Circuit Tester (110V only)
- Magnetic Bit Holder
- Torx Bits: T10, T15, T20, T25, T27, T30, T40
- Hex Bits: 2, 2.5, 3, 4, 5, 6, 8mm
- Blow mold case

## Slotted Stubby Screwdrivers — Comfort Handle

- Meets ANSI standards
- High visibility, cushion-grip handle for maximum user comfort
- Precision-machined tip for an exact fit

| Tip Size | Blade Length (in.) | Overall Length (in.) | Shank Size (in.) | Dynamic EDP | Code No. | Price \$ |
|----------|--------------------|----------------------|------------------|-------------|----------|----------|
| 1/4"     | 1.50               | 3.80                 | 0.24             | D062007     | 866641   | 9.04     |

## SAE Nut Drivers — Acetate Handle

- Meets ANSI standards
- High visibility, oil and solvent resistant acetate handle
- Precision-machined tip for an exact fit
- Handles are colour-coded by size making finding the correct size quicker and easier

| Tip Size      | Blade Length (in.) | Overall Length (in.) | Shank Size (in.) | Dynamic EDP | Code No. | Price \$ |

| Plastic Tray                    |             |          |          |

## Sockets & Attachments 1/4" Drive

### Quick Release Ratchet — Chrome Handle

- Meets ANSI standards
- Chrome finish for maximum resistance against corrosion
- Teardrop head design allows for great access in confined spaces

| Length | No. of Teeth | Dynamic EDP | Code No. | Price \$ |
|--------|--------------|-------------|----------|----------|
| 5"     | 45           | D001301     | 866642   | 50.83    |

### Stubby Ratchet

- Meets ANSI standards
- Chrome finish for maximum resistance against corrosion
- Stubby design allows greater access in confined spaces

| Length | No. of Teeth | Dynamic EDP | Code No. | Price \$ |
|--------|--------------|-------------|----------|----------|
| 3.5"   | 48           | D001307     | 866644   | 50.18    |

### Quick Release Ratchet — Chrome Handle

- Meets ANSI standards
- Chrome finish for maximum resistance against corrosion
- Teardrop head design allows for great access in confined spaces

| Length | No. of Teeth | Dynamic EDP | Code No. | Price \$ |
|--------|--------------|-------------|----------|----------|
| 7.6"   | 45           | D005301     | 866130   | 66.02    |

### Quick Release Ratchet — Comfort Handle — Long

- Meets ANSI standards
- Chrome finish for maximum resistance against corrosion
- 270° swivel head design allows greater access in confined spaces

| Length | No. of Teeth | Dynamic EDP | Code No. | Price \$ |
|--------|--------------|-------------|----------|----------|
| 9"     | 72           | D005306     | 866087   | 83.63    |

### Chrome Extensions

- Chrome finish for maximum resistance against corrosion
- Provides the added reach needed to access fasteners in tight spaces
- Knurled surface for easy mounting and removal from sockets and ratchets

| Length | Dynamic EDP | Code No. | Price \$ |
|--------|-------------|----------|----------|
| 3.00"  | D005003     | 866124   | 11.75    |
| 6.00"  | D005006     | 866125   | 17.01    |
| 10.00" | D005010     | 866126   | 24.53    |

### Universal Joint

- Chrome finish for maximum resistance against corrosion
- Ball and spring socket retention mechanism
- 360° articulation for access to fasteners in confined spaces

| Length | Dynamic EDP | Code No. | Price \$ |
|--------|-------------|----------|----------|
| 1.81"  | D005601     | 866133   | 28.02    |

### Stubby Ratchet

- Meets ANSI standards
- Chrome finish for maximum resistance against corrosion
- Stubby design allows greater access in confined spaces

| Length | No. of Teeth | Dynamic EDP | Code No. | Price \$ |
|--------|--------------|-------------|----------|----------|
| 4.75"  | 48           | D005307     | 866131   | 56.90    |

### Flex Head Ratchet

- Meets ANSI standards
- Chrome finish for maximum resistance against corrosion
- Release button ensures sockets and attachments securely lock on and quickly-release off

| Length | No. of Teeth | Dynamic EDP | Code No. | Price \$ |
|--------|--------------|-------------|----------|----------|
| 11.75" | 48           | D005308     | 866003   | 80.31    |

## Sliding T-Handle

- Ball and spring socket retention mechanism
- Chrome finish for maximum resistance against corrosion
- Ideal for loosening stuck and stubborn nuts and bolts
- Sliding handle allows for the application of extra torque in confined space applications

| Length | Dynamic EDP | Code No. | Price \$ |
|--------|-------------|----------|----------|
| 6.46"  | D005500     | 866132   | 26.36    |

## Adapters

- Versatile tool that expands the capabilities of any existing socket and attachment collection
- Chrome finish for maximum resistance against corrosion
- Ball and spring retention system provides a safe and secure hold

| Length | Female | Male | Dynamic EDP | Code No. | Price \$ |
|--------|--------|------|-------------|----------|----------|
| 1.38"  | 3/8"   | 1/4" | D005701     | 866134   | 7.68     |
| 1.81"  | 3/8"   | 1/2" | D005702     | 866135   | 9.09     |

## SAE Standard Chrome Sockets

- Meets ANSI standards
- Chrome finish for maximum resistance against corrosion
- Large laser etched markings improve size identification
- Knurled ring provides superior grip for quicker and easier removal of socket from ratchets and attachments

| Size   | Overall Length (a) | Drive End (b) | Hex End (c) | Taper Length (d) | Dynamic EDP | 6-point Code No. | Price \$ | Dynamic EDP | 12-point Code No. | Price \$ |

## SAE Deep Chrome Sockets

- Meets ANSI standards
- Chrome finish for maximum resistance against corrosion
- Large laser etched markings improve size identification
- Knurled ring provides superior grip for quicker and easier removal of socket from ratchets and attachments

See Chapter L

## Quick Release Ratchet — Chrome Handle

- Teardrop head design allows for great access in confined spaces
- Chrome finish for maximum resistance against corrosion
- Meets ANSI standards

| Length | No. of Teeth | Dynamic EDP | Code No. | Price \$ |
|--------|--------------|-------------|----------|----------|
| 9.33"  | 45           | D012301     | 866205   | 81.76    |

## Flex Head Ratchet

- Release button ensures sockets and attachments securely lock on and quickly-release off
- 180° folding head allows greater access in confined spaces
- Chrome finish for maximum resistance against corrosion

| Length | No. of Teeth | Dynamic EDP | Code No. | Price \$ |
|--------|--------------|-------------|----------|----------|
| 17.75" | 48           | D012308     | 866207   | 104.31   |

## Flex Handle

- Chrome finish for maximum resistance against corrosion
- Long length handle provides the extra leverage and torque needed to turn stubborn fasteners
- Flex handle bends 100° in either direction

| Length | Dynamic EDP | Code No. | Price \$ |
|--------|-------------|----------|----------|
| 14.96" | D012800     | 865846   | 61.90    |

## Sliding T-Handle

- Sliding handle allows for the application of extra torque in confined space applications
- Ball and spring socket retention mechanism
- Chrome finish for maximum resistance against corrosion

| Length | Dynamic EDP | Code No. | Price \$ |
|--------|-------------|----------|----------|
| 9.75"  | D012500     | 866208   | 27.18    |

## Chrome Extensions

- Chrome finish for maximum resistance against corrosion
- Notches ensure a safe and secure lock to any ratchet
- Knurled surface for easy mounting and removal from sockets and ratchets

| Length | Dynamic EDP | Code No. | Price \$ |
|--------|-------------|----------|----------|
| 5.00"  | D012005     | 866200   | 17.88    |
| 10.00" | D012010     | 866201   | 25.75    |

## Universal Joint

- 360° articulation for access to fasteners in confined spaces
- Chrome finish for maximum resistance against corrosion
- Ball and spring socket retention mechanism

| Length | Dynamic EDP | Code No. | Price \$ |
|--------|-------------|----------|----------|
| 2.76"  | D012600     | 866209   | 29.98    |

## Chrome Extension With Quick Release

- Provides the added reach needed to access fasteners in tight spaces
- Chrome finish for maximum resistance against corrosion
- Notches ensure a safe and secure lock to any ratchet, while a spring-loaded ball locks onto any 1/2 drive socket
- Knurled surface for easy mounting and removal from sockets and ratchets

| Length | Dynamic EDP | Code No. | Price \$ |
|--------|-------------|----------|----------|
| 3.00"  | D012023     | 866202   | 25.27    |
| 5.00"  | D012025     | 866203   | 27.76    |
| 10.00" | D012030     | 866204   | 34.21    |

## Adapters

- Versatile tool that expands the capabilities of any existing socket and attachment collection
- Chrome finish for maximum resistance against corrosion
- Ball and spring retention system provides a safe and secure hold

| Length | Female | Male | Dynamic EDP | Code No. | Price \$ |
|--------|--------|------|-------------|----------|----------|
| 1.42"  | 1/2"   | 3/8" | D012701     | 866210   | 9.68     |

## SAE Standard Chrome Sockets

- Meets ANSI standards
- Chrome finish for maximum resistance against corrosion
- Large laser etched markings improve size identification
- Knurled ring provides superior grip for quicker and easier removal of socket from ratchets and attachments

| Size    | Overall Length (a) | Drive End (b) | Hex End (c) | Taper Length (d) | Dynamic EDP | 6-point Code No. | Price \$ | Dynamic EDP | 12-point Code No. | Price \$ |

## Metric Standard Chrome Sockets

- Meets ANSI standards
- Chrome finish for maximum resistance against corrosion
- Large laser etched markings improve size identification
- Knurled ring provides superior grip for quicker and easier removal of socket from ratchets and attachments

## Metric Deep Impact Sockets

- Meets ANSI standards
- Corrosion resistant black phosphate finish
- Large laser etched markings improve size identification

## Combination Wrenches — Contractor Series

- Satin finish
- Meets ANSI standards

Contractor Series -  
A superior alternative  
to raised panel wrenches

## Adjustable Wrenches

**Dynamic**

- Drop forged
- Meets ANSI standards
- Chrome finish for maximum resistance against corrosion
- Size graduation markings allow for faster adjustment to the correct fastener size

| Size | Maximum Jaw Opening | Dynamic EDP | Code No. | Price \$ |
|------|---------------------|-------------|----------|----------|
| 4"   | 0.6"                | D072004     | 866457   | 19.17    |
| 6"   | 0.8"                | D072006     | 866458   | 20.43    |
| 8"   | 1.0"                | D072008     | 866031   | 27.03    |

## Aluminum Pipe Wrenches

**Dynamic**

- Meets ANSI standards
- Forged and hardened steel hook and heel jaws
- Aluminum construction is up to 30% lighter than traditional cast steel models

| Size | Maximum Jaw Opening | Dynamic EDP | Code No. | Price \$ |
|------|---------------------|-------------|----------|----------|
| 14"  | 2"                  | D080014     | 866034   | 103.55   |
| 18"  | 2.5"                | D080018     | 866911   | 108.83   |
| 24"  | 3"                  | D080024     | 866912   | 172.40   |
| 36"  | 5"                  | D080036     | 866027   | 340.53   |
| 48"  | 6"                  | D080048     | 866913   | 544.32   |

## Torque Wrenches

**Dynamic**

- Each torque wrench is factory calibrated within tolerance limits of  $\pm 4\%$  clockwise
- Factory certificate of calibration included
- Quick release mechanism makes socket removal easy
- Lock ring prevents accidental change of torque setting
- Blow molded plastic case for convenient storage
- Durable aluminum handle features an easy to grip diamond knurl surface
- Dual scale SAE/Metric
- Increments: 1lb / 1.4Nm
- Fixed head style
- 32 teeth

| Square Drive | Capacity |            | Length | Dynamic EDP | Code No. | Price \$ |
|--------------|----------|------------|--------|-------------|----------|----------|
|              | ft.lb    | Nm         |        |             |          |          |
| 3/8"         | 20-100   | 33.9-128.8 | 17"    | D086001     | 866914   | 274.91   |
| 1/2"         | 30-250   | 48-332     | 24"    | D086002     | 866915   | 380.41   |

## Torque Multiplier — 1/2"F - 3/4"M

**Dynamic**

- Maximum Input Torque: 220ft.lb. / 300Nm
- Maximum Output Torque: 1100ft.lb. / 1500Nm
- Accuracy:  $\pm 5\%$
- Includes blow mold case
- No Anti-Backlash

| Input Drive | Output Drive | Torque Ratio | Length | Dynamic EDP | Code No. | Price \$ |
|-------------|--------------|--------------|--------|-------------|----------|----------|
| 1/2"F       | 3/4"M        | 5:1          | 6.37"  | D086101     | 866916   | 1,359.80 |

## Torque Multiplier — 1/2"F - 1"M

**Dynamic**

- Maximum Input Torque: 126ft.lb. / 173Nm
- Maximum Output Torque: 3300ft.lb. / 4500Nm
- Accuracy:  $\pm 5\%$
- Includes blow mold case
- With Anti-Backlash

| Input Drive | Output Drive | Torque Ratio | Length | Dynamic EDP | Code No. | Price \$ |
|-------------|--------------|--------------|--------|-------------|----------|----------|
| 1/2"F       | 1"M          | 26:1         | 9.25"  | D086102     | 866917   | 3,964.24 |

## 5pc Plier Set — Comfort Handle

**Dynamic**

- Set contents:
- 8" Linesman Pliers
  - 7" Diagonal Cutting Pliers
  - 8" Long Nose Pliers
  - 8" Bent Nose Pliers
  - 8" Slip Joint Pliers
  - Plastic Tray

| Description   | Dynamic EDP | Code No. | Price \$ |
|---------------|-------------|----------|----------|
| 5pc Plier Set | D055201     | 865961   | 64.22    |

## Diagonal Cutting Pliers — Comfort Handle

**Dynamic**

- Meets ANSI standards
- Satin chrome finish with cushion-grip handle
- Drop forged and specially heat treated for maximum durability

| Overall Length | Jaw Length | Jaw Thickness | Dynamic EDP | Code No. | Price \$ |
|----------------|------------|---------------|-------------|----------|----------|
| 6"             | 1.00"      | 0.43"         | D055038     | 866918   | 18.88    |

## Long Nose Pliers — Comfort Handle

**Dynamic**

- Meets ANSI standards
- Satin chrome finish with cushion-grip handle
- Drop forged and specially heat treated for maximum durability

| Overall Length | Jaw Length | Jaw Thickness | Dynamic EDP | Code No. | Price \$ |
|----------------|------------|---------------|-------------|----------|----------|
| 6"             | 1.93"      | 0.35"         | D055001     | 865979   | 18.88    |
| 8"             | 2.99"      | 0.37"         | D055002     | 866381   | 22.98    |
| 11"            | 3.23"      | 0.39"         | D055003     | 866921   | 30.45    |

## Bent Nose Pliers — Comfort Handle

**Dynamic**

- Meets ANSI standards
- Satin chrome finish with cushion-grip handle
- Drop forged and specially heat treated for maximum durability

| Overall Length | Jaw Length | Jaw Thickness | Dynamic EDP | Code No. | Price \$ |
|----------------|------------|---------------|-------------|----------|----------|
| 6"             | 1.73"      | 0.35"         | D055004     | 866547   | 20.76    |
| 8"             | 2.85"      | 0.37"         | D055005     | 866382   | 25.36    |
| 11"            | 2.80"      | 0.39"         | D055006     | 866922   | 29.47    |

## Linesman Pliers — Comfort Handle

- Meets ANSI standards
- Satin chrome finish with cushion-grip handle
- Drop forged and specially heat treated for maximum durability

| Overall Length | Jaw Length | Jaw Thickness | Dynamic EDP | Code No. | Price \$ |
|----------------|------------|---------------|-------------|----------|----------|
| 7"             | 1.50"      | 0.39"         | D055013     | 866923   | 22.92    |
| 8"             | 1.61"      | 0.43"         | D055014     | 866386   | 29.66    |

## Slip Joint Pliers — Comfort Handle

- Meets ANSI standards
- Satin chrome finish with cushion-grip handle
- Drop forged and specially heat treated for maximum durability

| Overall Length | Jaw Length | Jaw Thickness | Dynamic EDP | Code No. | Price \$ |
|----------------|------------|---------------|-------------|----------|----------|
| 6"             | 1.59"      | 0.39"         | D055007     | 866925   | 18.91    |
| 8"             | 2.05"      | 0.41"         | D055008     | 866383   | 24.13    |
| 10"            | 2.24"      | 0.46"         | D055009     | 866926   | 29.66    |

## Groove Joint Pliers — Comfort Handle

- Meets ANSI standards
- Satin chrome finish with cushion-grip handle
- Drop forged and specially heat treated for maximum durability

| Overall Length | Jaw Length | Jaw Thickness | Dynamic EDP | Code No. | Price \$ |
|----------------|------------|---------------|-------------|----------|----------|
| 7-1/2"         | 1.69"      | 0.39"         | D055010     | 865890   | 23.21    |
| 9-1/2"         | 2.03"      | 0.44"         | D055011     | 865891   | 29.66    |
| 12"            | 2.50"      | 0.47"         | D055012     | 865885   | 36.13    |

## Wire Stripper/Cutter — Comfort Handle

- Meets ANSI standards
- Strips 8-20 AWG solid wire and 10-22 AWG stranded wire
- Serrated jaws to pull, bend, and loop wire

**Warning: Handles are not insulated and not designed to protect the user against electrical shock**

| Overall Length | Jaw Length | Jaw Thickness | Dynamic EDP | Code No. | Price \$ |
|----------------|------------|---------------|-------------|----------|----------|
| 6"             | 0.79"      | 0.43"         | D095001     | 866516   | 34.27    |

## Locking Pliers — Curved Jaws

- The narrow, large opening curved jaws provide firm grip on all round shapes
- Nickel plated finish for corrosion resistance

| Overall Length | Jaw Opening | Dynamic EDP | Code No. | Price \$ |
|----------------|-------------|-------------|----------|----------|
| 7"             | 1.50"       | D055304     | 866579   | 23.63    |
| 10"            | 1.88"       | D055305     | 866388   | 25.17    |

## Locking Pliers — Curved Jaws With Wire Cutter

- The functionality of regular curved jaws with the added convenience of a wire cutter
- Nickel plated finish for corrosion resistance

| Overall Length | Jaw Opening | Dynamic EDP | Code No. | Price \$ |
|----------------|-------------|-------------|----------|----------|
| 7"             | 1.50"       | D055302     | 866105   | 25.25    |
| 10"            | 1.88"       | D055303     | 866387   | 27.02    |

## 3pc Aviation Tin Snips Set

- Chrome Vanadium Blade with polish
- Self opening action
- Left Cut, Straight Cut, Right Cut

| Size  | Code No. | Price \$ |
|-------|----------|----------|
| 245mm | 505003   | 12.99    |

## CAT40 ER Collet Chucks

- DIN coolant option - standard
- Factory balanced to save spindle life, tool life and increased productivity
- Threaded through holes for a back-up screw (tool stop) or coolant through when removed
- TIR, 0.0003" at 4xDia.
- Wrench not included
- All ground body
- RFID Chip Hole
- AT2 Taper Accuracy

## CAT50 ER Collet Chucks

- DIN coolant option - standard
- Factory balanced to save spindle life, tool life and increased productivity
- Threaded through holes for a back-up screw (tool stop) or coolant through when removed
- TIR, 0.0003" at 4xDia.
- Wrench not included
- All ground body
- Increased productivity
- RFID Chip Hole
- AT2 Taper Accuracy
