

The SOWA logo is rendered in a bold, italicized, yellow sans-serif font. The letters are thick and closely spaced, with a registered trademark symbol (®) at the end of the word. The background of the entire advertisement is a close-up photograph of a metalworking process, showing a multi-fluted metal drill bit or end mill cutting into a metal workpiece. Bright sparks are being ejected from the cutting point, creating a dynamic and industrial atmosphere. The lighting is dramatic, highlighting the metallic textures and the sharp edges of the tool.

**SOWA**®

TOOLING  
YOUR  
WORLD.

Serving the Metalworking Industry since 1960.

# Table Of Contents

## MILLING

Sowa High Performance End Mill Selection, Typhoon End Mills, Carbide End Mills, HSCO & HSS General Purpose End Mills

A

## DRILLING & HOLEMAKING

Premium Class Carbide Drills, Sowa High Performance Drills & Spade Drill System, Countersinks, General Purpose Drills including Jobber, Stub, Extra Length, Prentice, Taper Shank, Reamers Include: Chucking, Jobber, Bridge, Taper, Shell, and Expanding

B

## THREADING & TAPPING

Sowa High Performance Taps, General Purpose Hand Taps, NPT Taps, Tap & Die Sets, Tap Wrenches, Screw Extractors, Round and Hex Dies

C

## CUTTING TOOLS

Cut-Off Blades, Toolbits, Boring Bars, Counterbores, Annular Cutters, Milling Cutters, Knurling Tools, Broaching Systems

D

## INDEXABLE CUTTING TOOLS

Sowa Indexable Cutting Tools featuring Turning, Boring, Parting, Grooving, Threading, Milling & Drilling Inserts and Holders complete with all technical information

E

## MEASURING & INSPECTING

Asimeto, STM, Mitutoyo, and Starrett Precision Tools including Micrometers, Calipers, Indicators, Magnetic Bases, Depth & Height Gauges, Surface Plates, Angle Blocks & Plates, Gauge Blocks & Pin Gauges, Hardness Tester, Profile Projectors, Parallels, Set-Up Blocks, Handbooks, and Tool Kits

F

## TOOL HOLDING

GS Premium Balance Rotary Tooling, including End Mill Holders, ER, TG, Collet Chucks, Retention Knobs, Milling Chucks, Shrink Fit Tooling, Tapping Chucks & Collets, Taper Adapters, Drill Chucks, Right Angle Heads, Boring and Facing Heads

G

## WORKHOLDING, CLAMPING & FIXTURING

GS Milling Vises, Double Clamp, Hydraulic, Bench & Drill Press Vises, Vee-Blocks, Angle Plates, Arbor Presses, Clamping Components, Mitee-Bite, 2, 3, 4, 6-Jaw Lathe Chucks, Big Bore Oil Country Chucks, F/A Fine Adjustment Precision Chucks, Power Chucks, Power Chuck Jaws & T-Nuts, Live Centres, Dead Centres, Face Drivers, Quick Change Tool Posts

H

## ACCESSORIES

Super & Simple Indexes, 5C Collet Chucks, Radius Dressers, Screw Jack Sets, Magnetic Lifters, Drill Sharpeners, Deluxe Shock Absorbers, Chip Collectors & Hooks, Coolants & Pastes, Coolant Hose System, Noga Minicool

I

## ABRASIVES & FINISHING

Ceramic, Surface, General Purpose Grinding Wheels, Depressed Centre Discs and Cut-off Wheels, Flap Discs, Shop Rolls, Cloth Sheets, Belts, Die Grinders and Diamond Files, Carbide Burrs & Sets, Deburring Systems, Blade Selection

J

## HAND TOOLS

Punches, Stamps, Chisels, Hammers, Hacksaws, Utility Knives, Grease Guns, Barrel Pumps, L-Wrenches, Torque Limiting Device, Screwdrivers & Bits, Sockets & Attachments, Combination Wrenches, Adjustable & Pipe Wrenches, Torque Wrenches, Pliers, and Wire Strippers

K

## CABINETS & CHESTS

Machinists' & Mechanics' Chests, Chest Bases, Top Chests, Heavy Duty Workstation, Roller Cabinets, Utility Carts, Tool Boxes, Parts Cabinets, End Mill Dispenser Cabinets, Drill Dispenser Cabinets

L

## To Our Valued Customers

Managing your daily business is full of challenges, worrying about having the right tools for the job should not be one of them. For over 60 years, Sowa Tool & Machine has been there to support North American manufacturers and distributors with world-class metalworking solutions. We offer a wide array of metalworking and MRO products, in stock and ready to ship same day. Our customer service team is just a call or click away, ready to support you with technical help or to source those hard to find products. We are here to keep your business moving forward.

We are proud to introduce our latest product catalogue, V62. Inside you will find the most comprehensive offering to date. This catalogue represents over 24,000 products, with upgrades and additions across most categories. We are equally excited to announce the launch of our brand-new website at [SowaTool.com](http://SowaTool.com). There you will have access to over 90,000 products from some of the best brands in the industry! On top of that, you no longer need to call in to receive a quote. You can now submit quote requests online directly from our website. Visit our website to see all that is new for yourself.

We appreciate the opportunity to serve you and thank all of you who have trusted us to keep your business moving forward. We take our customer's care very seriously. So, feel free to tell us how we are doing as we are continually striving to serve you better. Our purpose is to serve you, and tooling your world is our passion.

**Ryan Esposito**  
Chief Operating Officer | EVP

# Welcome to the family.

# What you can expect with Sowa.

Sowa Tool is a family of brands each with their own specialties. This includes our premium GS Tooling, our more economic STM Tooling solutions, our complete offering of high-performance Asimeto precision measuring tools, and our Sowa line of cutting, drilling, tapping and indexable tooling solutions. We also offer premium live centres from Skoda, and production grade boring heads and kits from Narex. We are uniquely qualified to serve your many needs under one roof.

## Same Day Shipping

We never want you to wait for your order, so we ship it same day when you order before 3:00pm EST on all in stock products.

## Order 24/7

Visit the new and improved SowaTool.com to check real-time inventory levels and get a 1% rebate for all orders placed online.

## Get A Quote Anywhere

Our new online quoting capabilities allow you to request a quote at anytime, you no longer need to call in. Just go to SowaTool.com and try it out!

## Expert Customer Service

Don't have a part number? Not sure what you need? That's ok! Our Customer Service Reps are second to none and are here to get you what you need, when you need it. You can contact them at 1-800-265-8221 or at sales@sowatool.com

## Uniquely Diverse Offering

Nowhere else can you get such a wide offering of products for a range of needs, specs, tolerance thresholds and budgets, all under one roof.

## Buy More, Save More!

Ask about our volume pricing available on top of our already competitively market priced stock.

## Always In-Stock

Sowa carries everything under your spindle, and more! Our 90% first pass fill rate ensures we will have what you need.

## Consolidated Experience

No longer do you need to shop around, as the Sowa family of brands will help consolidate freight charges, reduce your total number of purchase orders, and reduce the number of relationships you will need to maintain your business.

# Our Brands

We offer many familiar and popular industry brands along with our trusted Sowa family of brands. These brands allow us to provide you an even wider range of products to meet your tooling needs.

**WWW.SOWATOOL.COM**

**View Our Promos & Catalogues**

You can find all of our catalogues, brochures and promotional flyers on our website to view or download.

**Enhanced Search Capability**

Whether you know the exact part number of a product, or just have an idea of what you need, our search function will help you find exactly what you're looking for.

**Quick Order**

Already know what you need? Add products directly to your cart using just the part number and order what you need in record time.

**Add To Your Cart As You Go**

Speed up your process by adding product directly to your cart from the product list.

**Check Prices & Stock**

See if something is in stock from the product page, and view your own personal pricing without having to contact a product specialist.

**Order Templates**

If you're often ordering the same items, create an order template. You can quickly add these items to your cart whenever you need to re-order.

**Order History**

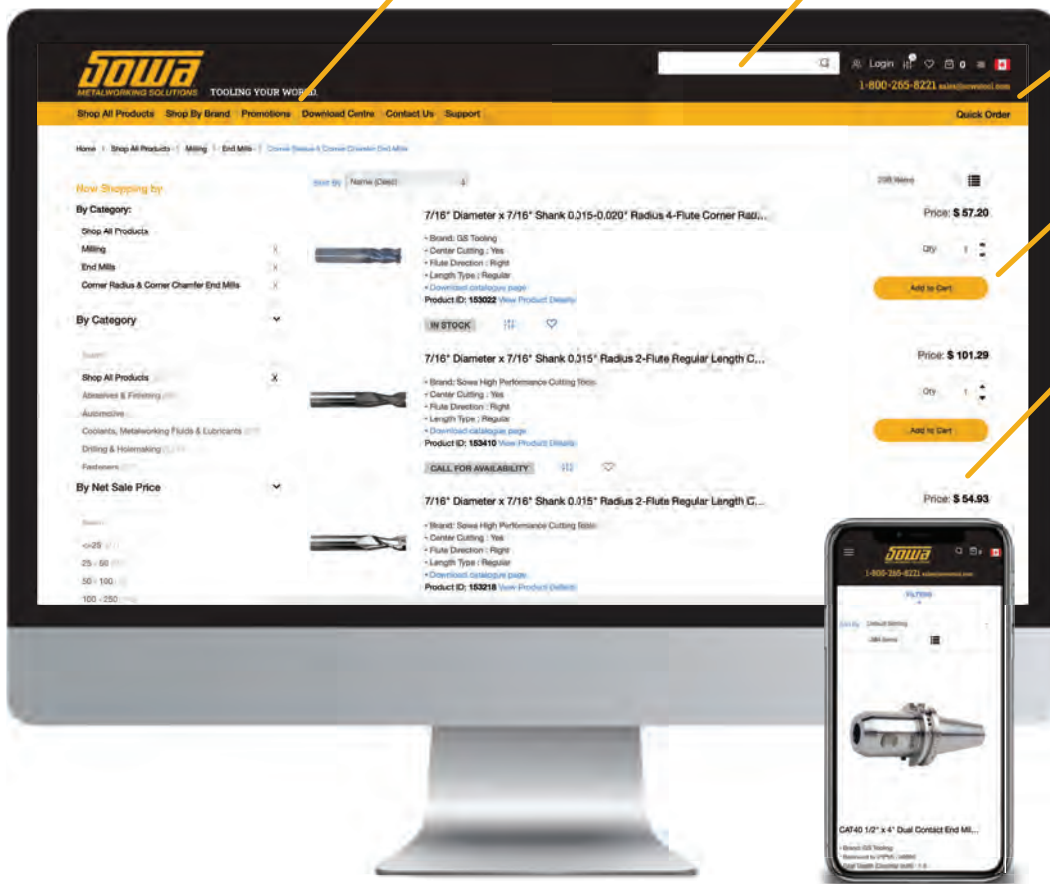

View your order history and search for past purchases quickly and easily.

**View Your Special Offers**

See your monthly special offers and flyer promotions as well as our current clearance items.

**Mobile Friendly**

Shop from anywhere with confidence on the new mobile friendly version of SowaTool.com.

**New Features**

**Updated User Experience**

SowaTool.com has been updated with a fresh coat of paint and new user experience. Finding what you need is faster and easier than ever before. Check it out for yourself!

**Request a Quote Online**

You no longer need to call in to receive a quote. You can now submit quote requests online directly from our website. Once we approve your quote, you are able to add to your cart and checkout with the new quoted price.

**Upload Order as CSV**

Do you have a larger order that would take a long time to input? You now have the ability to upload a CSV or Excel file containing your order and have items and quantities added directly to your cart with ease.

**Account Personalization**

Our account management now allows you to add, delete, and modify users associated with your business directly from our website.

## NEW STM Holders

Our STM Premium line is now offering competitive End Mill Holders and ER Collet Chucks at industry best prices. These holders provide DIN coolant option as standard and are factory balanced for increased tool life and productivity.

**STM CAT40/50 End Mill Holders**  
pg. G4 & G6

**STM CAT40/50 ER Collet Chucks**  
pg. G18 & G19

## Shrink Fit Holders

Our new and improved Shrink Fit Holders have been redesigned from the ground up. They've been re-engineered with new stand-out features including 4 coolant ports in the nose with the ability to be closed off to direct coolant through the centre of the holder. We include threaded holes in order to fine balance the holders.

**CAT40 Shrink Fit Holders  
With Coolant Ports**

## Collets

GS Tooling is introducing Extreme Precision 5 Micron Collets. Nothing else compares! Our new GS Extreme Precision AA Collets offer 5 micron runout. We are also now offering Tap Collets for synchronous, rigid tapping operations using our ER collet chuck.

**ER20 Tap Collets**  
pg. G25

**5 Micron AA ER Collet Sets**  
pg. G22

## Live Centres

The GS Tooling brand has added Live Centres to their lineup. When precision is paramount and high accuracy is a necessity, our new line of Live Centres are the perfect choice. With 8 different varieties available for a range of rpm thresholds and bearing systems, you're sure to find the perfect one for you.

**CNC High Speed Live Centres — Standard Point**

## Vises

GS Tooling's new Multi-Tasking range of modular vises have been specially designed for 5-axis machines. Working on five sides of the workpiece, it allows the best optimization of the machining cycle. New GS Precision Milling and Versatile Vises are also available under the GS line. All of our vises offer the same or better specs as compared to our competitors, the biggest difference you'll find is the price!

## Surface Treatments

-  **Black/Gold Finish**  
Black Oxide on the grooves for greater lubricity and chip removal, special coating on the lands for greater tool life.
-  **Typhoon Coating**  
The hard PVD coating allows effective machining of hard mold, die, and tool steels up to 60HRC in dry or wet conditions.
-  **Titanium Carbon Nitride**  
TiCN coated tools have a very high surface hardness of approx. 90HRC. This coating is recommended for use in all steels, cast iron and aluminum.
-  **Black Oxide Surface**  
Reduces adhesion of chips to the surface of tool.
-  **Titanium Aluminum Nitride**  
This coating is applied by the PVD process and has a higher hardness than TiN and TiCN. This greatly increases the service life of the tool and can stand higher temperatures when machining cast iron and tough steels.
-  **Titanium Nitride**  
A gold coloured film with a hardness of approx. 85HRC is deposited on the tool which extends tool life by reducing friction and enables the tool to be operated at higher speeds and feeds.
-  **Bright Finish**

## 2-Flute Stub Length Carbide End Mills

2-Flute Stub has added strength and stability with the same geometry of our standard length series. Stub end mills are specifically designed for shallow milling and slotting in a variety of materials.

**Bright:** Speeds & Feeds > P. A31  
**TiAlN:** Speeds & Feeds > P. A34

## 2-Flute Long Length Carbide End Mills

Long length end mills combine added flute and overall length for greater reach when deep slotting or milling. These end mills have the capability to mill much thicker material in a single pass, thereby eliminating the interrupted cut that may be present with regular length end mills.

## 2-Flute Double End Stub Length

Double end end mills offer the same tool geometry as the single end stub end mill, but with two cutters in one tool. Economy is an added feature of this tool.

## 2-Flute Double End Regular Length

With maximum chip clearance, 2-flute end mills are ideal for milling, sinking, profiling or slotting in a variety of materials.

## 2-Flute Corner Radius Regular Length

2-flute carbide end mill with corner radius allows more strength and minimizes chipping on corners. Two-flute construction provides more chip space and clearance than three or four flute designs.

## Carbide Drill Mills

- Drill/Mills can be used for drilling, slotting, profile milling
- 2-Flute - 60° & 90° included point angle
- Made from submicron grain carbide
- Cutting diameter tolerance: +0.000 / -0.002

## 2-Flute Ball Nose Regular Length

A general purpose carbide end mill with maximum chip clearance added.

For: End Milling, Slotting, Sinking, Contouring

On: Variety of Steels, Cast Iron, Non-Ferrous Metals, Plastics, Abrasive Type Materials

## 2-Flute Ball Nose Extra Long Length

Extra long length end mills combine added flute and overall lengths for greater reach when deep slotting or milling. These end mills have the capability to mill much thicker material in a single pass, thereby eliminating the interrupted cut that may be present with regular length end mills.

## 2-Flute Ball Nose Stub Length

This series has added strength and stability with the same geometry of our standard length series. Stub end mills are specifically designed for shallow milling, contour milling and slotting.

## 2-Flute Ball Nose Long Length

Long length end mills combine added flute and overall lengths for greater reach when deep slotting or milling. These end mills have the capability to mill much thicker material in a single pass, thereby eliminating the interrupted cut that may be present with regular length end mills.

## 2-Flute Ball Nose Double End Stub Length

These end mills offer the same tool geometry as the single end stub end mill, but with two cutters in one tool.

## 2-Flute Ball Nose Double End Regular Length

With maximum chip clearance, 2-flute ball nose end mills are ideal for milling, sinking, profiling or slotting various steels, non-ferrous materials, cast iron or highly abrasive materials.

## 3-Flute Regular Length Carbide End Mills

3-flute carbide end mills offer maximum chip clearance therefore reducing chip packing.

**For:** End milling, Slotting, Sinking  
**On:** Steels, Cast Iron, Aluminum, Copper, Brass, Plastics, and Abrasive Type Materials

## 3-Flute Ball Nose Regular Length

3-flute carbide end mills offer maximum chip clearance therefore reducing chip packing.

**For:** End Milling, Slotting, Sinking  
**On:** Steels, Cast Iron, Aluminum, Copper, Brass, Plastics, and Abrasive Type Materials

## 3-Flute 60° High-Helix

These end mills are designed for milling stainless steel, titanium, inconel and other similar metals where high cutting forces are generated. The high helix angle increases length of cutting edge engaged in the cut, reducing cutting load variations and prolonging tool life. Excellent surface finish with high speed and feed capabilities are features of these tools.

Contain and organize all your end mills.

See Page A4

## 4-Flute Stub Length Carbide End Mills

Strength, rigidity and improved tool life can be obtained with this stub length end mill. The premium micrograin carbide makes these mills tough enough to machine the very hard metals.

## 4-Flute Long Length Carbide End Mills

Long length end mills combine added flute and overall length for greater reach when deep slotting or milling. These end mills have the capability to mill thicker material in one pass, eliminating the interrupted cut that may be present with regular length end mills.

## 4-Flute Double End Regular Length

Four-flute configuration with centre cutting permits plunging and milling on many ferrous and non-ferrous materials. It also offers lower chip-load for size control and finish.

## 4-Flute Corner Radius Regular Length

Four-flute carbide end mills with corner radius allows more strength and minimizes chipping on corners. Four-flute construction provides more strength than two or three-flute and will also result in excellent surface finishes.

## 4-Flute Double End Stub Length

These end mills have a shorter flute length which provides greater rigidity with less deflection for shallow milling or slotting. This series is ideal for use on high tensile alloys and heat treated steels.

## GS Tooling End Mill Holders

Unmatched precision and quality, at a price point you'll love!

See Pages G4-10

## 4-Flute Ball Nose Stub Length

Strength, rigidity and improved tool life can be obtained with this stub length end mill.

## 4-Flute Ball Nose Regular Length

The industry standard. Wear resistance and minimal deflection for excellent size control.

**For:** General Purpose Milling, Production Milling, Contouring  
**On:** Steels, Stainless Steels

## Multi-Flute Rougher Regular Length — TiAlN Coated

These fine pitch roughing end mills have an excellent flute design for roughing applications in a variety of materials. TiAlN coating enhances speeds-feeds and tool life.

## 4-Flute Ball Nose Long Length

Added flute and overall length combine for greater reach when deep slotting or milling. These end mills have the capability to mill thicker material in one pass, eliminating the interrupted cut that may be present with regular length end mills.

## 4-Flute Ball Nose Extra Long Length

Extra Long Length End mills combine added flute and overall length for greater reach when deep slotting or milling. These end mills have the capability to mill much thicker material in a single pass, thereby eliminating the interrupted cut that may be present with regular length end mills.

## 4-Flute Ball Nose Double End Stub Length

These end mills have a shorter flute length which provides greater rigidity with less deflection for shallow milling or slotting. This series is ideal for use on high tensile alloys and heat treated steels.

# 2-Flute Typhoon End Mills

## 2-Flute Regular Length — Typhoon

These end mills are manufactured with Premium Sub-Micron carbide and are designed to cut hardened materials. The unique geometry of the Typhoon end mill combined with its modified AlTiN coating make it an excellent choice for demanding applications.

## 2-Flute Long Length — Typhoon

These Typhoon end mills have the added reach and depth of cut required for longer reach applications in hardened materials.

## 2-Flute Corner Radius — Typhoon

Typhoon end mills with corner radius allow more strength and minimize chipping on the corners in demanding applications.

## 2-Flute Ball Nose Long Length — Typhoon

Typhoon ball nose end mills are designed for contour milling in hardened materials. The long length allows for milling tougher materials in longer reach applications.

## 2-Flute Spherical Ball End — Typhoon

- High performance ball nose plus end mills are used in the mold industry and have a full 220 degree arc cutting capability
- Modified AlTiN coated for improved tool life and increased production output
- Made from premium sub-micron grain carbide

## 4-Flute Regular Length — Typhoon

These end mills are manufactured with premium sub-micron carbide and are designed to cut hardened materials. The unique geometry of the Typhoon end mill combined with its modified AlTiN coating make it an excellent choice for demanding applications.

## 4-Flute Long Length — Typhoon

These end mills are manufactured with premium sub-micron carbide and are designed to cut hardened materials. The unique geometry of the Typhoon end mill combined with its modified AlTiN coating make it an excellent choice for demanding and longer reach applications.

# 4-Flute Typhoon End Mills

## 4-Flute Corner Radius — Typhoon

Typhoon end mills with corner radius provides greater strength and minimizes chipping on the corners in demanding applications.

## Multi-Flute Regular Length — Typhoon

Multi-Flute Typhoon end mill design allow them to be run at higher rpm than conventional end mills as well as increase tool life without chipping.

## Roughers Regular Length — Typhoon

This fine pitch rougher is designed for milling harder metals and has updated geometry in the design of this tool for higher feed rates with no vibration or chatter and chipbreakers to eliminate birdnesting.

## 5pc 4-Flute Variable Helix Carbide End Mill Set

- Helix changes along flutes
- Increased stability during cutting action
- Substantial increase in speed
- Small corner radius for added strength and smoother cutting action
- AlTiN coated for improved tool life and increased production output
- Made from premium sub-micron grain carbide

| Description  | Code No. | Price \$ |
|--|----------|----------|
| Set Includes: 153002, 153006, 153012, 153018, 153027 | 153005   | 233.82   |

\* All speeds and feeds are suggested starting points. They may be increased or decreased depending on machine condition, depth of cut, finish required, coolant, etc.

## 5-Flute Variable Helix Carbide End Mill – Typhoon

- 25% increase in feed rates over 4-flute version
- Helix changes along flutes
- Increased stability during cutting action
- Substantial increase in speed
- Small corner radius for added strength and smoother cutting action
- Modified AITIN coated for improved tool life and increase production output

## 2-Flute For Aluminum

This carbide aluminum end mill has been designed specially for milling aluminum and all non-ferrous materials. The unique geometry permits much higher speed and feed rates without loading. Spindle and feed rates can be increased by fifty percent for greater productivity with excellent piece/part finishes.

## 2-Flute Corner Radius For Aluminum

- Special geometry allows for high chip loads and feed rates
- Excellent for slotting and profiling at high speeds
- Made from premium sub-micron grain carbide
- Cutting diameter tolerance +0.000 / -0.002

## 2-Flute Corner Radius Aluminum Speeds & Feeds

| Material        | Chip load per tooth |        |        |        |        |
|-----------------|---------------------|--------|--------|--------|--------|
|                 | SFM                 | 1/8"   | 1/4"   | 1/2"   | 1"     |
| Aluminum Alloys | 600/1200            | 0.0010 | 0.0020 | 0.0040 | 0.0080 |

RPM = 3.82 x sfm ÷ dia SFM = rpm x 0.262 ÷ dia IPM = chip load x No. of teeth x rpm

## 3-Flute Corner Radius For Aluminum

- Special geometry allows for high chip loads and feed rates
- 3-flute design excellent for slotting and profiling at high speeds
- Made from premium sub-micron grain carbide
- Cutting diameter tolerance +0.000 / -0.002

## 2-Flute Regular Length HSCO & HSS

These end mills come standard with right-hand cutting and right-hand helical flutes. All shanks are flatted for holder set screw. Designed for slotting, drilling, pocketing and general-purpose operation.

- 2 helical flutes
- Single end with weldon shank
- Centre cutting
- Keyway tolerance

## 2-Flute Regular Length HSCO – Metric

These end mills come standard with right-hand cutting and right-hand helical flutes. All shanks are flatted for holder set screw. Designed for slotting, drilling, pocketing and general-purpose operation.

- 2 helical flutes
- Single end with weldon shank
- Centre cutting
- Keyway tolerance

## 2-Flute Regular Length HSS For Aluminum

The 2-flute end mills for aluminum have high helix flute design making them well suited for milling aluminum and other non-ferrous materials.

## 2-Flute Double End Regular Length HSCO

Excellent tool geometry for slotting, keying and general purpose milling, plus the added economy offered by the double-end design.

- 2 helical flutes
- Centre cutting
- Double end with weldon shank

## 2-Flute Double End Stub Length Miniature HSCO

Tools under Miniature End Mills have 3/16" shank diameter without flats. Designed with positive rake angle geometry and a high helix angle to ensure free cutting action. Flute design provides good strength behind the cutting edge. Suitable for finishing of precision components such as watch, camera and electronic apparatus molds.

## 2-Flute Double End Long Length Miniature HSCO

Longer flute length. Suitable for finishing of precision components such as watch, camera and electronic apparatus molds.

- Long length
- 2 helical flutes
- Double end with straight shank

### 2-Flute Ball Nose Double End Stub Length Mini HSCO

Helical flute on the nose radius. Suitable for high efficiency copying process and cutting of die mold corner radius.

- Stub length
- 2 helical flutes, ball end
- Double end with straight shank

Speeds & Feeds > P. A43

| Cutting Dia. (in.) | Shank Dia. (in.) | Flute Length (in.) | Overall Length (in.) | Code No. | Price \$ |
|--------------------|------------------|--------------------|----------------------|----------|----------|
| <b>Inch</b>        |                  |                    |                      |          |          |

## 4-Flute Regular Length HSCO - Metric

Centre cutting allows these end mills to drill into the part for the beginning of a slot. These centre cutting end mills are recommended for pocketing, tracer milling, cam milling, die sinking and slotting. • Single end with weldon shank

## 4-Flute Ball Nose Regular Length HSCO

The 4-Flute Ball End Mills are designed for milling of radius bottom slots, fillets and special contours. The end teeth are cut to centre allowing these end mills to drill into material at the beginning of a slotting cut.

## Regular Length Roughing End Mills HSCO

Multiple-Flute: This general purpose rougher is designed for high production metal removal in a wide range of workpiece material. It is recommended for cutting steel grades and many non-ferrous materials. The end tooth of this tool has a centre hole design for many accurate resharpenings.

## Regular Length Centre Cut Roughing End Mills HSCO

This general purpose rougher is designed for high production metal removal in a wide range of workpiece material. It is recommended for cutting steel grades and many non-ferrous materials.

- Multiple helical flutes
- Single end with weldon shank
- Centre cutting
- Round profile
- Coarse pitch

## Stub Length Centre Cutting Rougher HSCO

This general purpose rougher is designed for high production metal removal in a wide range of workpiece material. Suitable for a very broad spectrum of materials having high tensile strengths. Milled surfaces are of exceptional quality.

- 3 helical flutes
- Centre cutting
- Coarse pitch
- Round profile

## Regular Length Ball Nose Rougher HSCO

This general purpose rougher is designed for high production metal removal in a wide range of workpiece material.

- Multiple helical flutes
- Single end with weldon shank
- Ball end
- Round profile
- Coarse pitch

## Stub Length Fine Pitch Rougher HSCO

### Fine Pitch Roughers

This general purpose rougher is designed for high production metal removal in a wide range of workpiece material. Suitable for a very broad spectrum of materials having high tensile strengths. Milled surfaces are of exceptional quality.

- Centre cutting
- Round profile
- Single end with weldon shank

## High Speed Steel Tapered End Mills

- Made from Premium-Grade High Speed Steel
- End cutting
- Weldon flat

| Angle Per Side | Tool No. | Tip Dia. (in.) | Length Of Cut (in.) | Shank Dia. (in.) | Overall Length (in.) | Code No. | Price \$ |

## 2 & 3-Flute Square End, 2-Flute Corner Radius, & 2-Flute Miniature Bright Carbide End Mills

### Slot Milling — 2-Flute Regular Length, 2-Flute Stub Length, 2-Flute Double End Reg & Stub Length, 2-Flute Corner Radius

• For side milling, increase Feeds 25% or more

#### 2-Flute Long & Extra Long Length

- Reduce Speeds and Feeds 25% for 2-fl. Long Length
- Reduce Speeds and Feeds 50% for 2-fl. Extra Long Length

#### 3-Flute Regular Length

- Increase Speeds and Feeds 20% for 3-fl. Reg. Length

# Milling Speeds & Feeds

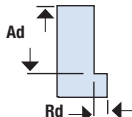

## 4-Flute Square End, 4-Flute Corner Radius & 3-Flute 60° Bright Carbide End Mills

Side Milling — 4-Flute Regular Length, 4-Flute Stub Length, 4-Flute Double End Regular & Stub Length, 4-Flute Corner Radius

### 4-Flute Long & Extra Long Length

- Reduce Speeds and Feeds 25% for 4-fl. Long Length
- Reduce Speeds and Feeds 50% for 4-fl. Extra Long Length
- For slot milling, reduce Feeds 20% to 50%

## 2, 3 & 4-Flute Ball Nose Bright Carbide End Mills

Profiling — 2-Flute Regular Length, 2-Flute Stub Length, 2-Flute Double End Regular & Stub Length Ball Nose End Mills

### 2-Flute Ball Nose Long & Extra Long Length

- Reduce Speeds and Feeds 25% for 2-fl. Ball Nose Long Length
- Reduce Speeds and Feeds 50% for 2-fl. Ball nose Extra Long Length

### 3-Flute Regular Length

- Increase Speeds and Feeds 20% for 3-fl. Reg. Length

### 4-Flute Ball Nose

- Increase Speeds and Feeds 40% for 4-fl. Ball Nose Reg. & Stub Length, also 4-fl Double End Reg. & Stub Length
- Reduce Speeds 25% and Increase Feeds 10% for 4-fl. Ball Nose Long Length
- Reduce Speeds 50% and Increase Feeds 10% for 4-fl. Ball Nose Extra Long Length

## 2-Flute Square End, TiAlN Coated Carbide End Mills

Slot Milling — 2-Flute Regular Length, 2-Flute Stub Length, 2-Flute Double End Regular & Stub Length

### 2-Flute Long & Extra Long Length

- Reduce Speeds and Feeds 25% for 2-fl. Long Length
- Reduce Speeds and Feeds 50% for 2-fl. Extra Long Length
- For side milling, increase Feeds 25% or more.

## 4-Flute Square End, TiAlN Coated Carbide End Mills

### Side Milling — 4-Flute Regular Length, 4-Flute Double End Stub Length

#### 4-Flute Long & Extra Long Length

- Reduce Speeds and Feeds 25% for 4-fl. Long Length
- Reduce Speeds and Feeds 50% for 4-fl. Extra Long Length
- For slot milling, reduce Feeds 20% to 50%.

## 2 & 4-Flute Ball Nose TiAlN Coated Carbide End Mills

### Profiling — 2-Flute Regular Length Ball Nose End Mills

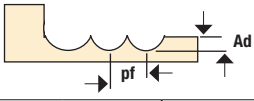

#### 2-Flute Long & Extra Long Length

- Reduce Speeds and Feeds 25% for 2-fl. Ball Nose Long Length
- Reduce Speeds and Feeds 50% for 2-fl. Ball Nose Extra Long Length

#### 4-Flute Ball Nose

- Increase Speeds and Feeds 40% for 4-fl. Ball Nose Reg. Length
- Reduce Speeds 25% and Increase Feeds 10% for 4-fl. Ball Nose Long Length
- Reduce Speeds 50% and Increase Feeds 10% for 4-fl. Ball Nose Extra Long Length

**NOTES:**  
 1) The cutting conditions in this table are given for reference, which should be varied depending on the machine, tooling, depth of cut, cutting fluid and other conditions  
 2) Use a holder of strong gripping force and machine of high stiffness  
 3) In case of deeper operation, slow down feed by 20-50%  
 4) The feed, in long types, should be reduced by around 50%

**NOTES:**

- The cutting conditions in this table are given for reference, which should be varied depending on the machine, tooling, depth of cut, cutting fluid and other conditions
- Use a holder of strong gripping force and machine of high stiffness
- For 2-fl end mill slow down to 1/2 of feed speed
- For finish cut put rpm, up to 1.5 to 1.3 times faster
- The feed, in long types should be reduced by around 50%

**NOTES:**  
 1) The cutting conditions in this table are given for reference, which should be varied depending on the machine, tooling, depth of cut, cutting fluid and other conditions  
 2) Use a holder of strong gripping force and machine of high stiffness  
 3) For TiN-Coated End Mills put cutting speed, feed up to 1.5-1.8 times faster  
 4) The feed, in long types, should be reduced by around 50%

**Materials**  
 1. Mild Steels (Up to 115 x 10<sup>3</sup> lb/in<sup>2</sup>)  
 2. Mild Steel Forgings  
 3. Cast Iron  
 4. Hard Brass and Bronze  
 5. Copper

**1. High Tensile Steels** (145 x 10<sup>3</sup> - 200 x 10<sup>3</sup> lb/in<sup>2</sup>)  
 2. Tool Steels  
 3. Medium Strength Titanium Alloys

**1. High Tensile Sheets** (145 x 10<sup>3</sup> - 200 x 10<sup>3</sup> lb/in<sup>2</sup>)  
 2. Heat Resistant High Alloys  
 3. High Strength Titanium Alloys  
 4. Woods

**1. Aluminum**  
 2. Alloyed Aluminum  
 3. Plastic Materials

## Premium HSS Jobber Length Drill Sets

These Premium HSS drills can be used in a variety of applications. Their surface treatment increases abrasion resistance, which reduces the amount of chip welding and improves chip flow.

| Description                       | Pieces Per Set | Code No. | Price \$ |

Drilling & Holemaking

## Premium HSS Jobber Length Drills

These Premium HSS drills can be used in a variety of applications. Their surface treatment increases abrasion resistance, which reduces the amount of chip welding and improves chip flow.

| Size (in.) | Decimal Equivalent | Flute Length (in.) | Overall Length (in.) | Code No. | Price \$ |
|------------|--------------------|--------------------|----------------------|----------|----------|

## Black & Gold Jobber Length Drills

- Black & Gold finish extends tool life
- 135° split point penetrates faster and prevents bit "walk"

| Size (in.) | Decimal Equivalent | Flute Length (in.) | Overall Length (in.) | Code No. | Price \$ |
|------------|--------------------|--------------------|----------------------|----------|----------|

Drilling & Holemaking

## Slow Spiral HSS Drills

Used in shallow hole drilling of aluminum and magnesium alloys and die cast parts.

### Fractional Sizes

## Fast Spiral HSS Drills

These drills are designed primarily for drilling in non-ferrous materials such as Aluminum, Zinc die cast, and some plastics. They are successfully used in mild steel deep holes where chip packing occurs with standard helix drills.

### Fractional Sizes

## Premium HSS Stub Drills

These Premium HSS drills can be used in a variety of applications. Their surface treatment increases abrasion resistance, which reduces the amount of chip welding and improves chip flow.

## Taper Length Drills

Taper length drills are designed for general purpose drilling where longer length is required.

### Fractional Sizes

| Size (in.) | Decimal Equiv. (in.) | Flute Length | Overall Length | HSS Code No. | Price \$ | Cobalt 135° Split Point Code No. | Price \$ |
|------------|----------------------|--------------|----------------|--------------|----------|----------------------------------|----------|

## Taper Shank Drills HSS — Metric

Flute length and overall length are approximately the same as corresponding fractional.

| Size (mm) | Decimal Equiv. (in.) | Flute Length | Overall Length | Morse Taper No. | HSS Code No. | Price \$ |
|-----------|----------------------|--------------|----------------|-----------------|--------------|----------|
| 3.00      | 0.1181               | 1-7/8        | 5-1/8          | 1               | 114318       | 34.36    |
| 3.20      | 0.1260               | 1-7/8        | 5-1/8          | 1               | 114319       | 35.86    |
| 3.50      | 0.1378               | 2-1/8        | 5-3/8          | 1               | 114320       | 35.86    |
| 3.80      | 0.1496               | 2-1/8        | 5-3/8          | 1               | 114321       | 35.86    |

## Oil Hole Drills HSS — Straight Shank

These drills are designed with oil holes the length of the land section of the drill to deliver a high pressure oil flow to the cutting edges. The resulting coolant flow flushes chips out of the hole to reduce heat and chip packing problems common to deep hole drilling applications. Surface speeds may be increased 30% or more over standard drill styles.

| 5                               | 13-3/4         | 114968   | 2,856.14 |

## Oil Hole Drills HSS — Taper Shank

Oil Hole Drills feature coolant passages throughout the length of the body. These allow a coolant (air, oil or vapour mist) to reach the cutting edges. The resulting flow cools and lubricates the cutting edges and also aids in the extraction of chips.

- Standard length

| Size (in.) | Decimal Equiv. (in.) | Flute Length (in.) | Overall Length (in.) | Morse Taper No. | HSS Code No. | Price \$ |

## Carbide Tipped Drills

Designed for drilling abrasive and non-ferrous materials such as castings, hard rubber, and copper alloys. **They are NOT recommended for drilling steel or other ferrous materials.**

- High speed steel bodies

## Fractional Sizes

## RC65 Straight Flute Drills — Carbide Tipped

For drilling and centre drilling heat treated high speed steel up to 65HRC. The special point design provides a free cutting action that minimizes heat and produces a smooth finish.

## Centre Drills HSS

These drills are used for starting and centering screw machine operations. Their short flute and overall length increase rigidity while minimizing runout.

# HSS (M4) Spade Drill

For general purpose applications in a variety of materials and for drilling in applications where added toughness is required such as unstable set ups on manual machines or cross hole drilling.

Drilling & Holemaking

## Super HSCO (T15) Spade Drill

For drilling in high alloy materials and exotic materials, T15 may also be used in general purpose applications where increased speeds and enhanced wear resistance is required.

## Recommended Blade Selection, Speeds & Feeds

### When To Use M-4:

- Loose machines
- Manual machines
- Cross hole drilling

### When To Use T15:

- On CNC machines
- When M-4 life needs to be extended
- Abrasive drilling

Note: The speeds and feeds listed above are considered a general starting point for all applications. Factors such as material, material hardness, coolant pressure, hole diameter and length to diameter ratio should also be considered when making these recommendations. Speed and feed reductions are recommended when using extended length holders.

## Throw-Away Drill Inserts — Coolant Pressure

## Throw-Away Drill Inserts Spade Drill Horsepower Consumption Rate

### Metal Removal Rates (MRR)

Example: 1.50 dia. drill @ 6.412 IPM

### Volume of Cylinder Method: $D^2 \times 0.785 \times L$

D = Hole Diameter

L = Length in IPM

0.785 is Constant

Material Drilled 4140 250 BHN:

Cutting Data: 180 SFM (458 R.P.M.) x 0.014 Feed per Rev.

458rpm x 0.014 = 6.412 IPM (L)

$D^2 (1.5)^2 \times 0.785 \times L (6.412) = 5 \text{ C.U. In./Min (MRR)}$

**MRR of 5 x 1.4 Energy Value = 7HP**

## Metal Removal Rates (MRR)

- Cubic inches of metal removal per unit of horsepower
- Unit horsepower (HPu) is the amount of power to remove a volume of metal in a period of time
- HPu = power to cut 1 cubic inch per minute – found in tables

### AVERAGE UNIT HORSEPOWER VALUES OF ENERGY PER UNIT VOLUME

| Material         | BHN       | HPu [HP/(in <sup>3</sup> )min.] |
|------------------|-----------|---------------------------------|
| Carbon Steels    | 150 - 200 | 1.0                             |
|                  | 200 - 250 | 1.4                             |
|                  | 250 - 350 | 1.6                             |
| Leaded Steels    | 150 - 175 | 0.7                             |
| Cast Irons       | 125 - 190 | 0.5                             |
|                  | 190 - 250 | 1.6                             |
| Stainless Steels | 135 - 275 | 1.5                             |
| Aluminum Alloys  | 50 - 100  | 0.3                             |
| Magnesium Alloys | 40 - 90   | 0.2                             |
| Copper           | 125 - 140 | 0.7                             |
| Copper Alloys    | 100 - 150 | 0.7                             |

## Single Flute Countersinks HSS — 60°, 82°, 90°, 100°, 120°

- Radial relief generated in the first 90 degrees behind the cutting edge, ensures smooth, chatter-free cutting without overfeeding and makes the tool self-centering
- Steam black oxide surface treatment enhances tool life and prevents galling
- The best style countersink for use in hand held applications
- 100% CNC manufactured to tighter than industry standard tolerances

## Single Flute TiN Coated Premium Cobalt Countersinks — 60°, 82°, 90°, 100°, 120°

- Excellent for countersinking abrasive, high-strength, heat resistant, exotic and other difficult to machine materials
- TiN coated for higher surface hardness and better lubricity to enhance productivity and longer tool life

## Carbide Single Flute Countersinks — 60°, 82°, 90°, 100°

- For highly abrasive and hard to machine materials
- For production applications in cast iron, alloy steel, or glass reinforced plastics
- Long running carbide eliminates the high cost of tool changes in production situations
- Rigid set-up a must – not suited for hand held applications
- Tools 3/8" and over have solid carbide heads on hardened steel shanks

## 90° Cobalt 3-Flute Countersinks

- M35 Cobalt
- Wide flutes provide good chip evacuation
- Positive cut
- Constant profile aids regrinding of the tool
- Self-centering of the cutting mill (three bearing points) virtually eliminates vibration

## 90° Cobalt 3-Flute Countersinks - TiN Coated

- M35 Cobalt - TiN coated
- Wide flutes provide good chip evacuation
- Positive cut
- Constant profile aids regrinding of the tool
- Self-centering of the cutting mill (three bearing points) virtually eliminates vibration

121855

## 6-Flute Countersinks HSS — 60°, 82°, 90°, 100°, 110°, 120°

- Flutes are staggered to ensure smoother, chatter-free cutting action
- Steam black oxide surface treatment enhances tool life and prevents galling
- 100% CNC manufactured to tighter than industry standard tolerances

## 6-Flute TiN Coated Premium Cobalt Countersinks — 60°, 82°, 90°, 100°, 110°, 120°

- Excellent for countersinking abrasive, high-strength, heat resistant, exotic and other difficult to machine materials
- TiN coated for higher surface hardness and better lubricity to enhance productivity and longer tool life

## GS Tooling Collet Chucks & Collets

Unmatched precision and performance, at a price point you'll love!

See Pages G18-43

## Chucking Reamers HSS

**QUALITY  
IMPORT**

For general purpose reaming of almost any metal, in drill presses, turret lathes or screw machines.

- Cutting ends are ground with a 45° chamfer for easy hole entry
- Built for machine use, with shorter, deeper flutes than hand reamers
- Right Hand Spiral
- Right Hand Cut
- H7 Tolerance

### Straight Flute

- Used for general purpose reaming

### Spiral Flute

- Cut with smoother, chatter-free action than straight flute reamers
- Used on more difficult-to-ream materials and holes with irregularities such as keyways
- Easy to guide in the work

## Taper Pin Reamers HSS — Hand

Used to ream holes into which standard taper pins will fit.

- Taper 1/4" per foot
- Ideally used in the attachment of gears, pulleys to shafts
- Straight and left hand spiral flutes are intended for hand reaming

- Recommended that the drilled hole be a few thousandths smaller than the small diameter of the finished reamed hole
- Straight flutes
- Straight shank
- Left hand spiral
- Right hand cut

## Taper Pin Reamers HSS — Helical Flute

Designed for machine reaming of taper pin holes, helical flutes reduce chip packing thereby reducing breakage.

- Taper 1/4" per foot
- Straight shank

## Expansion Chucking Reamers HSS

### High Speed Steel

An economical high production reamer, expansion feature permits reamer to be resharpened many times to its original diameter, saving on replacement costs.

## High Performance Taps

Recommended Cutting Conditions

We have taken the guesswork out of your tap selection!

### HSSE-V3 ANSI SHANK Yellow Ring Pg. C3

#### Yellow Ring HSSE-V3 Steels and Other Materials Up to 35HRC

For Tough Materials including:

- HIGH CARBON STEEL
- HIGH ALLOY
- TITANIUM
- ALUMINUM

| Materials Main Group | Materials Sub-Group                      | Condition  | Hardness (HRC) | Cutting Speed (FPM) |
|----------------------|--|------------|----------------|---------------------|
| Tool Steels          | 01, A-2, D-2, H-13, P-20                 | Annealed   | <35            | 15-25               |
| Medium Carbon        | 1030, 1035, 1038, 1040, 1045, 1050       | Normalized | <28            | 20-40               |
| Alloyed High Carbon  | 1065, 1070, 1080, 1090, 1095, 1561, 1572 | Normalized | <32            | 20-30               |
| High Strength        | 4140, 4340                               | Normalized | <32            | 20-30               |
| Titanium             | Commercially Pure                        | Annealed   | <32            | 15-30               |
| Stainless Steel      |  | Annealed   | <29            | 20-30               |
| Aluminum             | Cast, Wrought                            | -          | -              | 30-90               |

### HSSE-V3 ANSI SHANK Orange Ring Pg. C6

#### Orange Ring HSSE-V3 for Stainless Steel and Other Materials

For STAINLESS STEEL as well as:

- LOW CARBON STEELS
- MEDIUM CARBON STEELS
- ALLOYED HIGH CARBON

| Materials Main Group | Materials Sub-Group                            | Condition  | Hardness (HRC) | Cutting Speed (FPM) |
|----------------------|--|------------|----------------|---------------------|
| Stainless Steel      | 200 Series                                     | Annealed   | <28            | 20-35               |
|                      | 300 Series, 17-4 PH, 15-5, A286                | Annealed   | <28            | 20-35               |
|                      | 400 Series                                     | Annealed   | <29            | 20-35               |
|                      | 400 Series                                     | Hardened   | 35-42          | 15-20               |
|                      | 17-4PH, 15-5, A286                             | Hardened   | 35-42          | 15-20               |
| Low Carbon Steels    | 1010, 1018                                     | Normalized | <20            | 25-50               |
| Alloyed High Carbon  | 1050, 1065, 1070, 1080, 1090, 1095, 1561, 1572 | Normalized | <25            | 20-30               |
| Beryllium            |  |            | <25            | 20-30               |

### HSSE-V3 ANSI SHANK Green Series Pg. C7

#### Green Series HSSE-V3 for Aluminum and Other Materials

For ALUMINUM:

- PURE/LOW
- DIE CAST

| Materials Main Group | Materials Sub-Group                       | Condition | Hardness (HRC) | Cutting Speed (FPM) |
|----------------------|---|-----------|----------------|---------------------|
| Steels               | Sheet, Low/Medium Carbon, Stainless Steel | Hardened  | <20            | 20-50               |
| Aluminum             | Pure/Low                                  | -         | -              | 30-60               |
| Aluminum             | Die Cast                                  | -         | -              | 30-60               |

# Yellow Ring HSSE-V3 Spiral Point Taps — Black Oxide Finish

## HSSE-V3% Vanadium

- Superior performance in hardened tool steels such as 4140, 4340, H13, D2
- Up to 35HRC

Designed for high-speed tapping applications. Developed to withstand the high stress and high heat associated with high-speed CNC production tapping. Features a unique free-cutting design with a special tempering and geometry which contributes to extra tool life.

• 4.5 Pitch lead (Intermediate)

## Inch

| Tap      | No. Flutes | Overall Length (in.) | Thread Length (in.) | Black Oxide Code No. | H2 Limit Price \$ | Black Oxide Code No. | H3 Limit Price \$ | Black Oxide Code No. | H4 Limit Price \$ |

# Threading & Tapping

## Yellow Ring HSSE-V3 Spiral Flute Taps — Black Oxide Finish

### HSSE-V3% Vanadium

- Superior performance in hardened tool steels such as 4140, 4340, H13, D2
- Up to 35HRC

Designed for high-speed tapping applications. Developed to withstand the high stress and high heat associated with high-speed CNC production tapping. Features a unique free-cutting design with a special tempering and geometry which contributes to extra tool life.

• 2.5 Pitch lead (Bottoming)

### Inch

| Tap      | No. Flutes | Overall Length (in.) | Thread Length (in.) | Black Oxide Code No. | H2 Limit Price \$ | Black Oxide Code No. | H3 Limit Price \$ | Black Oxide Code No. | H4 Limit Price \$ |

## Yellow Ring 4" & 6" O.A.L. Spiral Point HSSE-V3 Taps — Inch

### HSSE-V3% Vanadium

- Superior performance in hardened tool steels such as 4140, 4340, H13, D2
- Up to 35HRC

Designed for high-speed tapping applications. Developed to withstand the high stress and high heat associated with high-speed CNC production tapping. Features a unique free-cutting design with a special tempering and geometry which contributes to extra tool life. Designed for long reach applications.

## Yellow Ring 4" & 6" O.A.L. Spiral Flute HSSE-V3 Taps — Inch

### HSSE-V3% Vanadium

- Superior performance in hardened tool steels such as 4140, 4340, H13, D2
- Up to 35HRC

Designed for high-speed tapping applications. Developed to withstand the high stress and high heat associated with high-speed CNC production tapping. Features a unique free-cutting design with a special tempering and geometry which contributes to extra tool life. Designed for long reach applications.

• 2.5 Pitch lead (Bottoming)

| 1/2-14  | 4          | 6"                   | 1.375               | 122438   | 218.77   |

## HSS Roll Form Taps

Extended life results from tap geometry that allows optimum cutting performance and close control over tapped hole size. Superior wear resistance, heat treated for toughness.

- Used for thread forming in copper, brass, aluminum, die castings, leaded steels, low carbon steels and stainless steels

| Tap           | Thread Limits | Overall Length (in.) | Thread Length (in.) | Code No. | Price \$ |

Alloy / High Carbon Steels    Stainless Steel    Aluminum

## HSS Ground Taps

- High Speed hand taps
- High Speed spiral point
- 30° slow spiral ground thread taps

## 93 Series Tap Wrenches

- For holding taps, drills, reamers and small tools to be turned by hand
- Body is centered for use on lathe centres or drilling machines to start tap straight
- Jaws conform to the tool being held and are heat treated
- Wrenches have sliding handle which is frictionally held
- Designed to hold square shanks

| Cap. Tap Size | Cap. Square Shank | Body Length | Starrett No. | Sowa Code No. | Price \$ |

## Tapping Speed Guide

### Tapping Speed Guide

Proper tapping speeds are very important in obtaining efficient tapping results. There are many factors which affect proper tapping speeds, some of which are listed below.

#### Material Factors:

- Thermo-conductivity of the material and wall thickness as it affects heat dispersion
- Variations in carbon content of steel
- Hard spots in material
- Depth of hole to be tapped
- Percentage of full thread to be tapped

#### Tap Factors:

- Major diameters, pitch and lead
- Style of tap
- Width of lands
- Amount of hook or rake
- Length of chamfer
- Bottoming taps normally require slower speeds than plug chamfered taps

| Materials                       |  |            | Speed<br>Feet/Minute |
|---------------------------------|--|------------|----------------------|

## Conversion Table, Surface Feet Per Minute to Revolutions Per Minute

Proper tapping speeds are determined best by experiment. In the table below, speeds shown should be used as a guide only, and the suggested surface feet per minute adjusted upward or downward until the best results are obtained.

| Surface Feet Per Minute | 20   | 25   | 30   | 40   | 50   | 60   | 70   | 80   | 90   | 100  | 110  | 120  | 130  | 140  | 150  |
|-------------------------|------|------|------|------|------|------|------|------|------|------|------|------|------|------|------|
| Tap Size                | RPM  |      |      |      |      |      |      |      |      |      |      |      |      |      |      |
| <b>0</b>                | 1273 | 1592 | 1910 | 2546 | 3183 | 3820 | 4456 | 5093 | 5730 | 6366 | 7003 | 7639 | 8276 | 8913 | 9549 |

#### Mechanical Factors:

- Type of tapping machine and holder; speeds for small diameter taps are often governed by the limitations of the machine
- Condition of tapping machine and spindle
- Type of fixture; vertical or horizontal tapping (faster speeds for vertical tapping)
- Method of feeding the tap
- Cutting fluid used and method of application
- The optimum speed for tapping is the highest speed that conditions permit, consistent with economic tool life

## ANSI Tap Dimensions

| Mach. Screw Size No. | Nominal Fractional Diameter (in.) | Nominal Metric Diameter (mm) | Tap Dimensions — Inches |               |               |                |                |

## Tap/Drill Chart — Inch

To minimize tapping problems and lengthen tool life, use the largest drill possible to produce a minor diameter that will result in the lowest percentage of full thread consistent with adequate strength. A minor diameter that provides a 55% to 65% thread is sufficient for most requirements, but in some cases a higher percentage of thread may be necessary to conform with the minor diameter limits of the thread class specified.

### Tap Drill Sizes

Drills generally cut holes larger than their diameters. In the table to the right, the probable percentages of full thread were determined by the average amount oversize the various drills are expected to cut.

### SUGGESTED PIPE TAP DRILL SIZES

| Tap Size | Pipe Tap Drill Size |          |
|----------|---------------------|----------|
|          | Taper               | Straight |
| 1/16     | D                   | —        |
| 1/8      | R                   | S        |
| 1/4      | 7/16                | 29/64    |
| 3/8      | 37/64               | 19/32    |
| 1/2      | 23/32               | 47/64    |
| 3/4      | 59/64               | 15/16    |
| 1        | 1-5/32              | 1-3/16   |
| 1-1/4    | 1-1/2               | 1-33/64  |
| 1-1/2    | 1-47/64             | 1-3/4    |
| 2        | 2-7/32              | 2-7/32   |
| 2-1/2    | 2-5/8               | —        |
| 3        | 3-1/4               | —        |

\* Sizes given permit direct tapping without reaming the hole, but only give a full thread for the first two or three threads

† For Dryseal Straight Pipe Threads suggested drill sizes are as shown, except; 1/4" pipe, use 0.444 drill size

### TAP/DRILL SELECTION

| Tap   | Tap Drill | Decimal Equiv. of Tap Drill | Theo. Oversize Mean (%) | Probable Oversize Mean | Probable Hole Size | % of Threads |
|-------|-----------|-----------------------------|-------------------------|------------------------|--------------------|--------------|
| 0-80  | 56        | 0.0465                      | 83                      | 0.0015                 | 0.0480             | 74           |

# Threading & Tapping

## Tap/Drill Chart — Inch — Cont'd

### Formula: Percentage of Full Thread

$$\frac{\text{Threads Per Inch} \times \text{Major Dia. of Tap} - \text{Drill Dia.}}{0.01299} = \text{Percentage of Full Thread}$$

Example: Determine percentage of full thread for 2" – 12N Tap, using 1.9219" Drill.

$$2.0000 - 1.9219 = 0.0781 \div 0.01299 = 6.012$$

Threads Per Inch = x 12  
Theoretical Percentage of Full Threads = 72.144

### Formula: Tap Drill Size

$$\frac{\text{Major Dia. of Tap} - 0.1299 \times \text{Percent of Full Thread}}{\text{Number of threads Per inch}} = \text{Drill Size}$$

Example: Determine drill size for 2"–12N Tap, 70% Full Thread.  
Basic Major Diameter of Tap = 2.0000"

$$0.01299 \times 70 = 0.9093 \div 12 = 0.0758"$$

Theoretical Drill Size = 1.9242"  
Nearest Standard Drill Size 1 59/64 = 1.9219"

## Carbide Tipped Boring Bars

- Black oxide coating retains lubrications to aid in wear-resistance and chip flow
- Carbide-tips cut faster than high speed steel
- Commonly used on ferrous and non-ferrous materials including cast iron, steel and steel alloys

Cutting Tools

# Cutting Tools

## Square Ground Tool Bits — 5% Cobalt

Cobalt HSS ground tool bits exhibit superior performance when cutting forgings, castings and cuts of a heavy nature.

| Square Size | Overall Length (in.) | 5% Cobalt Code No. | Price \$ |
|-------------|----------------------|--------------------|----------|
| 1/8         | 2-1/2                | 102000             | 6.55     |

## Carbide Tipped Boring Bar Sets — C6

These bars are made of extra heavy construction ensuring that more steel is behind the cutting face for chatter-free and heavier cuts.

- Extra heavy construction - 100% longer tool life
- All shanks ground to +0.0" - 0.0010"
- Designed so that the same bar can bore flat bottomed holes or face

**QUALITY IMPORT**

## C2 Grade Carbide Mini Bore Tools

**BORITE**

- Ease of precision in small hole boring
- All mini bore tools fit in any of the Mini Tool Holders
- Carbide tools are interchangeable in holders

| Shank Dia. | Min. Bore Dia. | Max. Bore Dia. | Overall Length | Carbide Code No. | Price \$ |

## HSS Annular Cutters — Inch

- Eliminate multi-step drilling
- Lower cost per hole
- Better finishing
- More accurate, cleaner holes
- Longer tool life
- 3/4" shank diameter with two flats
- Cutters are interchangeable with other standard hole cutting systems

## Heavy Duty Plain Milling Cutters

- Right hand

| Mill Dia. | Hole Size | Length of Cut | No. of Teeth | Right Code No. | Price \$ |
|-----------|-----------|---------------|--------------|----------------|----------|
| 3         | 1-1/4     | 1-1/4         | 8            | 140215         | 276.79   |
| 4         | 1-1/2     | 2             | 10           | 140245         | 556.45   |
| 4         | 1-1/2     | 3             | 10           | 140250         | 820.88   |
| 4-1/2     | 2         | 6             | 10           | 140265         | 2,340.42 |

## Involute Gear Cutters

Used to mill spur gears having a 14-1/2° pressure angle. For each diametral pitch priced, 8 cutters are required to produce a full set of gears from 12 teeth to a rack. Eight cutters are made for each diametral pitch. When ordering state diametral pitch and the number of cutters from the table in accordance with the number of teeth to be cut. Specify arbor hole where choice exists.

These cutters may be sharpened repeatedly without changing their original form.

| Cutter No. | Range of Teeth Cut |
|------------|--------------------|
| 1          | 135 to Rack        |
| 2          | 55 to 134          |
| 3          | 35 to 54           |
| 4          | 26 to 34           |
| 5          | 21 to 25           |
| 6          | 17 to 20           |
| 7          | 14 to 16           |
| 8          | 12 to 13           |

## Screw Slotting Saws

### High Speed Steel

Standard screw slotting saws are available in 1-3/4" diameter with 90 teeth, 2-1/4" diameter with 60 teeth and 2-3/4" diameter with 72 teeth. Also available in a 2-3/4" diameter and 1" hole with 56 teeth.

### With 90 teeth

## Solid Tungsten Carbide Saw Blades

### Slotting, Slitting, Mica Undercutting

- Standards
- Metrics
- Radius Saws
- Circular Slitting Knives
- Specials
- "V" Cutters
- Re-Sharpener
- All saws are hollow ground to our standards, or your specifications
- Sizes priced are considered standard saws
- For metrics, special sizes, or tolerances, call or write for availability and prices. Many variations can be made, some at no additional cost
- If you need engineering assistance in selecting or designing a saw, we're only a phone call away and delighted to help
- When ordering, specify: O.D.; I.D.; thickness; no. of teeth; hub (if desired); and any special tolerances or extras. Various quantity discounts are available on all saws
- Although not standard on carbide saws, the manufacturer can provide keyways upon request, at an additional cost

## Revolving Knurling Tool Holder

The Revolving Head Knurling Tools embody all the features of standard model Knurling Tools plus one important extra – these tools are fitted with four pairs of knurls; any of which can be instantly brought to bear on the workpiece. No time is lost changing knurls. Furnished with press-style, standard face diamond pattern knurls in fine and coarse pitch.

### Holder

| Holder Size     | Dia. | Knurl Face Size | Hole | Code No. | Price \$ |
|-----------------|------|-----------------|------|----------|----------|
| 20 x 30 x 200mm | 20mm | 10mm            | 6mm  | 474200   | 523.25   |

### Replacement Knurls

| Size          | Replacement Knurls         | Pitch    | Code No. | Price \$ |
|---------------|----------------------------|----------|----------|----------|
| 20 x 10 x 6mm | Straight coarse            | 20 x 1   | 474230   | 18.33    |
| 20 x 10 x 6mm | Straight fine              | 20 x 0.6 | 474235   | 18.33    |
| 20 x 10 x 6mm | Diagonal coarse right hand | 20 x 1   | 474240   | 18.33    |
| 20 x 10 x 6mm | Diagonal fine right hand   | 20 x 0.6 | 474245   | 18.33    |
| 20 x 10 x 6mm | Diagonal left hand coarse  | 20 x 1   | 474250   | 18.33    |
| 20 x 10 x 6mm | Diagonal left hand fine    | 20 x 0.6 | 474255   | 18.33    |

## Keyway Broach Sets With Collared Bushings

- Specialty tools designed for cutting keyways in machined holes
- Typically used manually with an arbor press or hydraulic press to produce the keyways
- Well suited for use in a variety of ferrous and non-ferrous materials

## Shim Sets For Keyway Broaches — Inch

**NOTE:**  
Extra shims are available in sets.  
Please refer to the column Shims  
Required in the broach chart. Note  
that shims correspond to broach size,  
not the bushing type.

| Size         | Thickness | Length x Width | Hassay EDP No. | Set Size | Code No. | Price \$ |

## Collared & Plain Bushings — Inch

- Used in conjunction with keyway broaches and shims to cut the keyway
- Used manually with an arbor press or hydraulic press and broaches to produce the keyways
- Straight precision slot acts as a guide for the broach

| Diameter                         | Length  | Hassay EDP No. | Code No. | Price \$ |

## Keyway Broaches — Metric

- Specialty tools designed for cutting keyways in machined holes
- Typically used manually with an arbor press or hydraulic press to produce the keyways
- Well suited for use in a variety of ferrous and non-ferrous materials

| Broach      | Keyway Width Tol. | Dim.          | No. Shims | Cut Length Min/Max | Hassay EDP No. | Code No. | Price \$ |

## Shim Sets For Keyway Broaches — Metric

### NOTE:

Extra shims are available in sets. Please refer to the column Shims Required in the broach chart. Note that shims correspond to broach size, not the bushing type.

| Size        | Length Thickness | Hassay x Width | EDP No. | Set Size | Code No. | Price \$ |

## Collared & Plain Bushings — Metric

- Used in conjunction with keyway broaches and shims to cut the keyway
- Used manually with an arbor press or hydraulic press and broaches to produce the keyways
- Straight precision slot acts as a guide for the broach

| Diameter (mm)                    | Diameter (in.) | Hassay EDP No. | Code No. | Price \$ |

## Square Broaches

- Used to machine internal and external surfaces, such as holes, keyways, and teeth of internal gears
- Designed to be used manually with an arbor press to produce the square holes
- Well suited for use in a variety of ferrous and non-ferrous materials
- Each tooth is progressively larger and each cuts slightly deeper than the tooth before

## Full Square Broaches — Inch

- Used to machine internal and external surfaces, such as holes, keyways, and teeth of internal gears
- Designed to be used manually with an arbor press to produce the square holes
- Well suited for use in a variety of ferrous and non-ferrous materials

## Hexagon Broaches

- For cutting hexagonal shaped holes in round machined holes
- Designed to be used manually with an arbor press or hydraulic press
- Well suited for use in a variety of ferrous and non-ferrous materials

## Keyseating Broaches

- Side relief eliminates drag in multiple-pass broaching
- Precision grinding of the rake face insures consistent performance and free cutting action after several sharpenings
- An undercut pilot allows easier entry on each pass

## Hex Rotary/Punch Broaches — M42 Cobalt

- Provides edge toughness for standard operations, and resists heat to better effect tool life in machining most metals
- For broaching materials such as ductile iron, tool steel, stainless steels, titanium alloys. This superior grade of HSS provides significantly longer tool life with these more difficult to machine alloys.

## CNC — Single Point Keyway Broaches

### A CNC Broaching Alternative

Broaching keyways on CNC machines today is as common as turning a part. It will eliminate part handling and improve your control when you design your process to incorporate short effective nibbling broaches that take the place of much longer tools and sometimes timely set up on secondary machines.

Blind hole and through hole CNC keyway broaching with standard tools that are off the shelf, will give you a profitable alternative and save you time.

Blind hole or through hole CNC keyway broaching is achieved through the use of single point nibbling cutters that are designed with two separate cutting surfaces at 180° apart. The one piece construction is created on a high speed tooling blank that is a common size round shank with ground timing flats to align the keyway for timing to the part it is broaching. These tools will offer long tool life, and can be easily sharpened many times for extended tool life. Ideally designed for either CNC lathe or CNC vertical machining centres, these tools can get the job done quickly and effectively:

- For a CNC lathe, the tool is mounted directly into the turret on centreline while a setscrew-locking holder will lock the tool in place and position
- For a CNC vertical machining centre, a collet will hold the tool shank and provide timing orientation. With the spindle locked, the broach can be brought in line with the pre-prepared bore diameter and chamferlead of the part to start broaching

With the spindle locked, the broach can be brought in line with the pre-prepared bore diameter and chamfer lead of the part to start broaching the keyway at a speed of 10 - 30 in/min and an in-feed of 0.003 -0.005 depth per pass, using a flood coolant for lubrication during the cut. The in-feeding cycle is repeated until the desired depth of the keyway is achieved. Chips can be removed from the bottom of the hole in a couple of ways:

- If the hole is a blind hole bore, remove the chips by either prior trepanning the bottom of the keyway area and allow chips to fall away
- Or pre-drill a hole from the outside to the inside of the part at the bottom of the keyway location.
- With a through hole, you can broach right through, but do not disengage with the part, and simply de-burr the keyway upon completion.

### Things That You Should Know:

- Standard tooling will come with common shank diameters
- The keyway size and length or depth of cut will determine the shank size
- Strength and rigidity in the set-up will give you longer tool life
- Consider using the larger shank size to process your jobs
- Keyway production will achieve excellent finishes and better accuracy
- You can design and create your own special tool with our help

### The Advantages

- Complete the part on one machine
- Only way to keyway a blind hole
- Cut down on set-up time
- Become more flexible with machining
- Manage small lot production
- Use cost effective standard tooling
- No bushing guide required
- No hydraulic press or pull required
- No additional operator needed

## Applications

**ROTARY/PUNCH BROACHES:** Used in a variety of machines to cut polygons in blind holes: Any type of CNC or manual turning, milling, drilling or screw machine. The practical forming length of rotary/punch broaching is usually up to 1-1/2 times the size of the broach (measured across flats).

**ROTARY BROACH HOLDERS:** For optimal tool life in large production settings these broaches are used in Rotary Broach Holders. Holders and broaches are sold separately and available from stock for immediate delivery. These holders are for use on any type CNC or manual turning, milling, drilling or screw machine. The holder has an internal live spindle, which holds the end cutting broach tool. The centreline of the cutting tool is offset at 1° from the centreline of the workpiece. This causes the broach to wobble creating a shearing effect as the broach is advanced into the workpiece or vice versa as described below.

**BROACHING A ROTATING WORKPIECE:** In a turning or screw machine, the holder is mounted stationary while its internal live spindle and the broach rotates after contact with the rotating workpiece. At the appropriate feed, the workpiece is “sheared” by the pressure of the broach through a wobbling type action producing the polygon shape desired.

**BROACHING A STATIONARY WORKPIECE:** In a milling or drilling machine, the holder is mounted into and rotates with the machine spindle while its internal live spindle along with the broach remains stationary upon contact with the stationary workpiece. While the machine spindle is rotating, the broach’s pressure shears the polygon shape into the workpiece (wobbling type action).

**PUNCHING VERSUS ROTARY BROACHING:** Many applications can be achieved without the rotary broach holder. For the purpose of merely punching a polygon into an existing pilot hole, these broaches have successfully been used with universal machining methods.

## Rotary Broaching Set-Up Plugs

For hex broach set-up only.

## Swiss Style Rotary Hex Punch Broaches

For use with Swiss Style Non-Adjustable Holders

- Consistent high tolerance forms for long production runs
- Superb surface finishes
- Outstanding tool life in Stainless & Titanium
- M2 for use with mild steel (HSS)
- PM-M4 for use with Stainless Steel, Titanium & other high alloy steels

# Swiss Style Non-Adjustable Rotary Broach Holders

## Swiss Style Holders

- No centre indicating required – self-centering
- Smaller head diameter eliminates interference on tool blocks
- Longer shank can be cut to proper length
- Short head length for limited back work space
- Built in wobble cutting feature 1° angle
- Heavy duty bearing takes 2,250 lbs. pushing force
- Swiss made quality high-precision
- Fits most swiss type tool blocks and gang machines
- Holds 8mm shank swiss style rotary punch broaches

| Shank Dia. | Shank Length | Hassay EDP No.   | Code No. | Price \$ |
|------------|--------------|------------------|----------|----------|
| 5/8        | 1-1/2        | HSP-2160-158-038 | 182033   | 2,692.15 |

## Self Centering Holders

Designed for CNC machines, the new 2100 Series Broach Holder meets the challenge. Faster and easier setup.

- Places rotary broach on centre, eliminates the need to indicate the holder
- Cylindrical shank design with Weldon Notch perfect for lathe or machining centre applications
- Micro-manufacturing includes medical, dental, automotive and aircraft micro components, with micro precision systems that require high precision tolerance and quality
- Holds 8mm shank Swiss Style Rotary Punch Broaches

| Shank Dia. | Shank Length | Hassay EDP No. | Code No. | Price \$ |

# Quick Change ER Collet Punch & Index Broach ER Holder Systems

## For Swiss and CNC machining

When orientation and concentricity of an internal polygon profile is crucial, an ER holder can be used to securely hold a punch or index broach tool and accurately align the tool to centre, while ensuring perfect alignment of the profile orientation. **These quick change holders can be preset and reloaded in seconds.**

## Punch Broach / Boring Adaptors & Nuts

| ER Size | Bore Dia. | Nut Thread                  | Hassay EDP No. | Code No. | Price \$ |

With around 45,000 standard tools for turning, milling, holemaking and threading, Walter offers you outstanding productivity and reliability from an extensive range of precision, high-quality machining tools from the Walter, Walter Titex and Walter Prototyp competence brands.

## Tiger-tec® Gold

High-performance turning  
Reliable improvements in cost-efficiency

The new generation of cutting tool materials from Walter has arrived and is already redefining peak performance in machining. But how can we set new standards in a segment that already seems to be optimized?

Walter raises the bar through a determination to better ourselves over and over again. Along with superior technology, Walter also has our customers to thank, whose challenges are at the heart of Walter's drive. Having mastered milling and holemaking, Tiger-tec® Gold has conquered the third machining discipline – turning.

High-performance holemaking  
Guaranteed process reliability

High-performance milling  
Significant improvements in productivity

|-------|--|---|--|---|---|---|
|       |  |   |  |   | Cutting Condition   | Quality of Tip  |
| P     | P01                                      | Steels, Cast Steels   | Precision Turning, Precision Boring                                | Small cutting area in high cutting speed. Expect good dimension and surface with no vibration.                      |    |    |
|       | P10                                      | Steels, Cast Steels   | Turning, Copy Machining, Threading Cutting, Surface Finish Milling | Small cutting area in high cutting speed or good working condition.   |   |   |
|       | P20                                      | Steels, Cast Steels, Malleable Cast Iron  | Turning, Copy Machining, Milling, Planing                          | Medium cutting area in medium cutting speed and small cutting area in planing.                                      |   |   |
|       | P30                                      | Steels, Cast Steels, Malleable Cast Iron  | Turning, Milling, Planing  | Medium/large cutting area in low/medium cutting speed or poor working condition.                                    |   |   |
| M     | M10                                      | Steels, Cast Steels, Cast Iron  | Turning, Milling   | Small/medium cutting area in medium/high cutting speed or using in common for castability cast iron.                |    |    |
|       | M20                                      | Steels, Cast Steels, Cast Iron  | Turning, Milling   | Medium cutting area in medium cutting speed or no using in common for steels, cast iron. Or poor working condition. |   |   |
|       |  | Hadfield, Steels, Austenite Steels, Special Cast Iron                                       | Turning, Milling   | Medium cutting area in medium cutting speed or poor working condition.  |   |   |
|       | M30                                      | Steels, Cast Steels, Cast Iron, Austenite Steels, Special Cast Iron, Heat Resisting Alloy   | Turning, Milling, Planing, Cutting-Off                             | Medium/large cutting area in medium cutting speed. Or working condition is worse than M20.                          |   |   |
| K     | K01                                      | Cast Iron   | Precision Turning, Precision Boring, Surface Finish Milling        | Small cutting arear in high cutting speed or no vibration.  |  |  |
|       |  | High Hardness Cast Iron, Quenched Steels  | Turning  | Small cutting area in exfrom low cutting speed or no vibration.   |   |   |
|       |  | Black Lead, Hard Paper, Ceramic High Si-Al  |  | No vibration.   |   |   |
|       | K10                                      | Cast Iron, Malleable Cast Iron  | Turning, Milling, Boring, Reamer                                   | Small/medium cutting area in medium cutting speed. Or Generd working in comparating.                                |   |   |
|       |  | Quenched Steels   | Turning  | Small cutting area in low cutting speed or no vibration in comparative.   |   |   |
|       |  | Si-Al Alloy, High Hardness Copper, Glass, Ceramic, Hard Rubber, Hard Paper, Synthetic Resin |  | No vibration in comparative.  |   |   |
|       | K20                                      | Cast Iron (Hb200 and Below)   | Turning, Milling, Planing, Boring, Reamer, Broach                  | Medium/large cutting speed in medium cutting speed or general working demanding high toughness.                     |   |   |
| K30   | Low Hardness Cast Iron, Copper, Aluminum | Turning, Milling, Planing, Copy Machining   | Large cutting area or poor working condition.                      |   |   |   |
